Educational Administration:

Educational Administration Robert Palestini, 2005-08-17 Educational Administration Leading with Mind and Heart 2nd edition takes an organization development approach to producing effective leadership Picture yourself standing in the middle of a dense forest Suppose you were asked to describe the characteristics of the forest what types of trees are growing in the forest how many acres of trees are there where are the trees thriving where are they not Faced with this proposition most people would not know where to start and would not be able to see the forest for the trees Newly appointed school administrators often have these same feelings of confusion when faced with the prospect of having to assume a leadership role in a complex organization like a school or school system Where does one start An effective way to start would be to systematically examine the components that make up an organization Such a system of organizational diagnosis and prescription will lead to a comprehensive and integrated analysis of the organization s strengths and weaknesses and point the way toward possible improvement This book suggests such a sequential and systematic approach Utilizing it effectively can produce dramatic and useful results

Reed, 1986 **The Knowledge Base in Educational Administration** Robert Donmoyer, Michael Imber, James Joseph Scheurich, 1995-07-01 For scholars and practitioners who are interested in or are concerned about knowledge based issues this book provides a needed antidote to narrow discussions of foundational issues The editors of this book maintain that discussions of a knowledge base in educational administration have typically been limited to a fairly traditional range of scholarly commentary reflective of the status quo within departments of educational administration over the past several decades Other views such as feminist views race ethnic based orientations those that dispute the very idea of a knowledge base and those that simply expand the traditional range have been given little attention within the knowledge base discourse The purpose of this book is thus to open up this discourse by broadening the range of viewpoints being considered

Greenfield on Educational Administration Thomas Greenfield, Peter Ribbins, 2005-08-08. This collection is a representative set of ten of the key papers which Thomas Greenfield, arguably the doyen of contemporary theories of educational administration, has published over the last twenty years. His writings, as they appear, are eagerly sought after and studied by scholars, students and practitioners in Britain and across the English speaking world but are not always readily available individually. The collection charts the development of Greenfield's views of social reality, as human invention and explores strands of argument on the nature of knowledge, on administrative theory and research on values, on the limits of science and the importance of human subjectivity, truth and reality. The volume is concluded by a discussion between Greenfield and Peter Ribbins which reflects on Greenfield's career and elaborates on the range of his complex and often controversial ideas.

Political Philosophy, Educational Administration and Educative Leadership Reynold Macpherson, 2013-10-01. In this book Reynold Macpherson initiates a politically critical theory of educative leadership as a fresh line of inquiry in the practice, research and theory of educational administration and educational leadership. Divided into four parts, the book introduces the sub discipline of political philosophy to the field of educational administration.

management and leadership It does this by clarifying the knowledge domain of each and identifying how four political ideologies specifically pragmatism communitarianism communicative rationalism and egalitarian liberalism have primarily informed and surreptitiously provided contestable justifications for power in the development of practice research and theory in the field of study The book goes on to offer three case studies illustrating how political philosophy can be used to interpret how people become leaders and administrators of educational institutions and systems Additional case studies then demonstrate how crises in governance in educational institutions and systems can be analyzed and improvements made using the tools of political philosophy The final part uses the sub discipline to critique the author s decades of research into educative leadership and concludes the book by both establishing the relativity of politically critical critique and the ideology it favours neo pragmatism Political Philosophy Educational Administration and Educative Leadership will provide practitioners researchers and theorists in educational administration management and leadership with a deeper appreciation of power by formally introducing them to the assumptions limits and tools of political philosophy Educational Administration in India Dr.Kotreshwaraswamy A.
