The Global Education Movement Toni Fuss

Kirkwood-Tucker, 2018-01-01 The pages of this book paint a portrait of thirteen scholars and their lifelong professional accomplishments in and contributions to teaching service and research in global international education around the world. Their extraordinary work contributed extensively to the development, direction, and growth of the global education movement in the United States initiated by James M. Becker as Director of School Services for the Foreign Policy Association, New York City, in the 1960s. These scholars were honored with the Distinguished Global Scholar Award presented by the International Assembly of the National Council for the Social Studies, the largest professional organization for social studies educators in the United States. Their narratives comprise an intriguing mosaic of backgrounds, scholarship, and contexts from which their extraordinary work blossomed in building bridges, not walls, among peoples and nations. The publication is intended to honor the professional achievements in global international education of these scholars who have devoted their professional lives to creating a better world through their work. More importantly, this book exposes globally minded individuals, educators, scholars, administrators, and policymakers around the world to empowering role models from Africa, Europe, and the United States and opportunity to learn about the multitude of professional activities, teachings, partnerships, exchange programs, and research in which they might engage to promote a deeper understanding about the cultural, geographic, economic, social, and technological interconnectedness of the world and its people, the very purpose of global education.

Social Innovations in Education, Environment, and Healthcare Chandan, Harish Chandra, 2024-07-17 In the 21st century, traditional approaches to societal challenges often fall short. The need for innovative solutions is palpable, grounded in the understanding that progress is contingent upon embracing change. Scholars, policymakers, and institutions grapple with the delicate balance between economic growth and social well-being. The dichotomy between technical and social innovations becomes apparent, necessitating a comprehensive understanding of their interplay. Social Innovations in Education, Environment, and Healthcare emerge as an illuminating solution. Authored by experts in the field, this book offers a compelling exploration of social innovation as the key to unlocking transformative change. By delving into the intricacies of ideation, collaboration, implementation, and value creation, the book provides a roadmap for scholars, policymakers, non-profit organizations, for-profit firms, and universities. It dismantles the barriers between developed and developing nations, advocating for a global perspective in the pursuit of inclusive and impactful social innovations.

Youth, Education, and Islamic Radicalism Mun'im Sirry, 2024-03-15 Youth Education and Islamic Radicalism offers groundbreaking analysis of religious intolerance and radicalization among high school and university students in modern day Indonesia. Indonesia is one of the most diverse countries in the world in terms of religion, ethnicity, and socioeconomic status, but also in the complexity of its education system. Youth Education and Islamic Radicalism examines the roots of religious intolerance among young Indonesians and explores the various ways in which educated youth navigate radical ideologies amid growing religious conservatism. The book presents nuanced explanations as to why one person becomes radicalized while another does not, calling into question the common assumption that religious radicalism is directly connected to terrorism. It problematizes the notion that the university is a significant hub, trigger, or birthplace of radicalization by asking: What makes education attractive for extremist recruitment? What shapes students' views? Under what circumstances do radicalization and deradicalization processes of educated youth take place? Youth Education and Islamic Radicalism identifies a constellation of factors that shape young people's views of religious diversity in Indonesia, demonstrating the ways in which they become radicalized in the first place and how, in some cases, they deradicalize themselves.

No Child Left Behind and the Transformation of Federal Education Policy, 1965-2005 Patrick J. McGuinn, 2006 Education is intimately connected to many of the most important and contentious questions confronting American society: from race to jobs to taxes, and the competitive pressures of the global economy have only enhanced its significance. Elementary and secondary schooling has long been the province of state and local governments, but when George W. Bush signed into law the No Child Left Behind Act in 2002, it signaled an unprecedented expansion of the federal role in public education. This book provides the first balanced, in-depth analysis of how No Child Left Behind (NCLB) became law. Patrick McGuinn, a political scientist with hands-on experience in secondary education, explains how this happened despite the country's long history of decentralized school governance and the longstanding opposition of both liberals and conservatives to an active, reform-oriented federal role in schools. His book provides the essential political context for understanding NCLB: the controversies surrounding its implementation and forthcoming debates over its reauthorization; how the struggle to define the federal role in school reform took center stage in debates over the appropriate role of the government in promoting opportunity and social welfare; how he places the evolution of the federal role in schools within the context of broader institutional, ideological, and political changes that have swept the nation since the 1965 Elementary and Secondary Education Act; chronicles the concerns raised by the 1983 report *A Nation at Risk* and shows how education became a major campaign issue for both parties in the 1990s. McGuinn argues that the emergence of swing issues such as education can facilitate major policy change even as they influence the direction of wider political debates and partisan conflict. McGuinn traces the Republican shift from seeking to eliminate the U.S. Department of Education to embracing federal leadership in school reform, then details the negotiations over NCLB: the forces that shaped its final provisions and the ways in which the law constitutes a new federal education.
