Precey,2013-02-11 Inclusion is increasingly becoming one of the policy drivers shaping educational discourse and practice What constitutes the term inclusion itself and how ideas derived from the different perspectives on inclusion impact school leadership practice point to a highly contested field of enquiry Originally embedded in discourse relating to special education ideas relating to inclusion are attracting much broader appeal within system reforms in many jurisdictions This book seeks to keep the consideration of inclusion firmly in its broader context and to decouple it from the discourse relating to students with special educational additional needs This allows the authors to position their contributions more explicitly within

discourses that draw on difference and diversity as unavoidable features of schools Within this collection we address the current political dogmas in many countries that take a purely rational managerial approach to leadership arguing that this is not contributing to inclusion in schools In doing this the book seeks to shape current discourses on leadership by exploring perspectives which are likely to enhance our understanding of inclusion Tolerance respect listening clarifying language being comfortable with differences and ambiguity and articulating and challenging the rationale behind the way we do things around here are key aspects of inclusive leadership and also fundamental imperatives for writing this book It will be useful to those in education who are engaged in further academic study in education or in reflective practice and to anyone taking advanced programmes in educational leadership and management The international perspectives on the issue of inclusion informing this book ensure that this book will be essential for those engaged in a comparative analysis of leadership practice in different contexts or those concerned with the complexity of ensuring inclusive models of education

Education Policy Les Bell, Howard Stevenson, 2006-09-27 The study of educational leadership makes little sense unless it is in relation to who the leaders are how they are leading what is being led and with what effect Based on the premise that learning is at the heart of leadership and that leaders themselves should be learners the Leadership for Learning series explores the connections between educational leadership policy curriculum human resources and accountability Each book in the series approaches its subject matter through a three fold structure of process themes and impact Series Editors Clive Dimmock Mark Brundrett and Les Bell As global pressures focus increasing attention on the outcomes of education policy and on their implications for economic prosperity and social citizenship the experience of each individual learner is decisively shaped by the wider policy environment However there is often an underdeveloped understanding of how education policy is formed what drives it and how it impacts on schools and colleges This book explicitly makes these connections and links them to the wider challenges of educational leadership in a modern context Education Policy is divided into three sections which examine the development of policy at the levels of the nation state and individual institutions the forces that shape policies with emphasis on human capital theory citizenship and social justice and accountability research based case studies highlighting the application of policy in a range of situations The book provides a valuable resource for students practitioners middle managers and educational leaders in all sectors both in the UK and internationally who are engaged on masters and doctoral degrees or undertaking leadership training and preparation programmes

School Improvement Martin Thrupp, 2006-02-01 Martin Thrupp argues that there has to be a much bigger educational and social justice agenda to school improvement than the managerial approaches typically taken by government policy He critiques those school improvement texts courses and consultancies which mostly frame their analyses within the terms of current policy and therefore act to apologise for it An alternative more critical approach to school improvement is developed in the book and the author also provides examples of practical strategies to be employed within this approach

Educational Leadership and Nancy Fraser

Jill Blackmore, 2016-06-10 Drawing on the work of Nancy Fraser this book offers a critical view of contemporary educational leadership and reform discourses exploring how her key concepts of redistribution recognition and representation may apply to social and therefore educational justice Fraser offers a political and pragmatic reconciliation between feminist neo Marxist critical and post structuralist theories This book outlines how Fraser has worked on and worked over theories of social justice and how this can inform how we can understand educational theory policy and practice generally In particular the book focuses on the field of educational administration and leadership ELMA as it relates to equity issues such as school choice and inequality gender and inclusive leadership and alternative schooling Fraser s argument about scaling up social justice theory is shown to be highly salient given the emergence of the field of transnational education policy and its role in the context of intensified nation state and edu business competition Overall through the lens of Nancy Fraser s unitary framework this book considers epistemological questions about the nature of knowledge examines the relationship between the state the individual education and social movements addresses the difficulties and dilemmas which arise due to the intersections of gender class race sexuality and culture in a globalized context and illustrates how the principles of social justice can be mobilized by leaders in everyday practice Educational Leadership and Nancy Fraser is an illuminating read for those policymakers researchers and practitioners engaged in the field of educational administration

Richard Teese, Stephen Lamb, Marie Duru-Bellat, 2007-06-03 Inequality is a marked and persistent feature of education systems both in the developed and the developing worlds Major gaps in opportunity and in outcomes have become more critical than in the past thanks to the knowledge economy and globalization The pursuit of equity as a goal of public policy is examined in this book through a series of national case studies The book covers many different global contexts from the wealthiest to some of the poorest nations on earth It therefore offers a broad range of different theoretical and methodological approaches and brings together extensive international experience in equity policy Questioning

Leadership Gabriele Lakomski, Scott Eacott, Colin W. Evers, 2016-11-10 Questioning Leadership offers a diverse mix of cutting edge research in the field of educational leadership with contributions from expert and emerging leadership scholars It contextualises school leadership within broader social and historical contexts and traces its influence on school performance through time from its relatively modest role within a systems theory paradigm to its growing influence from the 1980s onwards as exercising leadership came to be perceived as being largely responsible for improving educational outcomes This book invites the reader to challenge the current orthodoxy of leader centrism and instead reflect more broadly on the various structural and institutional interrelationships that determine how a school functions successfully It poses challenging questions such as Is leadership really necessary for high quality school performance Can schools function effectively without

leadership Is it possible to describe the work that principals do without using the word leadership How do we challenge the assumption that leadership simply exists and that it is seen as the appropriate default explanation for school performance This book does not assume that leadership is the key to organisational performance although it acknowledges the work that principals do It goes against current orthodoxy and offers varied perspectives on how leadership might be repositioned vis vis organisational and institutional structures It also suggests some new directions for leading and learning and throws open a discussion on leadership that for too long has been captured by the assumption that the leader is the cause of organisational performance and learning outcomes in schools At a time when leadership s dominance seems unshakeable this is a bold book that should appeal to postgraduate students of educational leadership and management those undertaking training in educational administration and current school leaders interested in exploring the value of leadership for educational organisations

Educators, Professionalism and Politics Terri Seddon, John Levin, 2013 This title brings together contributions from around the world that analyse and reflect on the way curriculum is configuring and reconfiguring that world
