Stebleton, 2022-07-19 This timely book explores current trends and future possibilities for undergraduate career education the nature of the changing workplace and its impact on students in colleges and universities Built on decades of experience in career development and professional learning the editors raise and investigate multiple critical issues facing career educators in higher education today preparing students for the future of work exploring the increasing centrality of experiential learning in career education examining innovative paradigm shifts in career education and developing strategies for equity focused and inclusive programming for all students Reckoning with the effects of Covid 19 on the world of career development this book draws on contributions from leading scholars entrepreneurs and practitioners from across the fields of education business STEM and the humanities to offer an inclusive and innovation focused approach to supporting scholars practitioners and students involved with career education development and

counseling for a new generation and a new world of work      **International Handbook of Educational Policy** Nina Bascia, Alister Cumming, Amanda Datnow, Kenneth Leithwood, David Livingstone, 2008-05-14 Nina Bascia Alister Cumming Amanda Datnow Kenneth Leithwood and David Livingstone This Handbook presents contemporary and emergent trends in educational policy research in over 40 chapters written by nearly ninety leading researchers from a number of countries It is organized into five broad sections which capture many of the current dominant educational policy foci and at the same time situate current understandings historically in terms of both how they are conceptualized and in terms of past policy practice The chapters themselves are empirically grounded providing illustrations of the conceptual implications contained within them as well as allowing for comparisons across them The serendipity within chapters with respect to jurisdictional particularities and contrasts allows readers to consider not only a range of approaches to policy analysis but also the ways in which policies and policy ideas play out in different times and places The sections move from a focus on prevailing policy tendencies through increasingly critical and outsider perspectives on policy They address in turn the contemporary strategic emphasis on large scale reform substantive emphases at several levels on leadership and governance improving teacher quality and conceptualizing learning in various domains around the notion of literacies and concluding finally with a contrasting topic workplace learning which has had less policy attention and thus allows readers to consider both the advantages and disadvantages of learning and teaching under the bright gaze of policy      John Dewey and the Future of Community College Education Clifford P. Harbour, 2015-01-15 Honorable Mention 2016 PROSE Award Education Theory Today community colleges enroll 40% of all undergraduates in the United States In the years ahead these institutions are expected to serve an even larger share of this student population However faced with increasing government pressure to significantly improve student completion rates many community colleges will be forced to reconsider their traditional commitment to expand educational opportunity Community colleges therefore are at a crossroads Should they focus on improving student completion rates and divert resources from student recruitment programs Should they improve completion rates by closing developmental studies programs and limiting enrollment to college ready students Or can community colleges simultaneously expand educational opportunity and improve student completion In John Dewey and the Future of Community College Education Cliff Harbour argues that before these questions can be answered community colleges must articulate the values and priorities that will guide them in the future Harbour proposes that leaders across the institution come together and adopt a new democracy based normative vision grounded in the writings of John Dewey which would call upon colleges to do much more than improve completion rates and expand educational opportunity It would look beyond the national economic measures that dominate higher education policy debates today and would prioritize individual student growth and the development of democratic communities Harbour argues that this in turn would help community colleges contribute to the vital work of reconstructing American democracy John Dewey and the Future of Community College Education is essential
