Educational Freedom in Urban America David Salisbury,Casey Lartigue Jr.,2004-05-25 In 1954 the U S Supreme Court declared segregated public schools unconstitutional The ruling in Brown v Board of Education set public education on a course toward equality Yet five decades later schools are not equal Minority children living in America s inner cities suffer disproportionately from a failing education system with black and Hispanic students dropping out of public high schools at much higher rates than whites There is however reason for hope The expansion of school choice offers new opportunities for children struggling in failing schools In this collection a dozen leading scholars educators and reformers including Andrew Coulson Floyd Flake Frederick Hess and Paul E Peterson examine the legacy of Brown v Board and its relation to the modern day school choice movement A school administrator and a charter school founder also reveal the challenges and obstacles faced by enterprising teachers in trying to help their students Together these experts expose the modern barriers that deprive inner city children of a good education and call for increased school choice as the most effective way to achieve the goals of Brown v Board Educational Freedom in Urban America is essential reading for anyone concerned with the condition of our inner city schools and the racial and social inequities that still exist in American education Educational Freedom in Urban America

David F. Salisbury,Casey Lartigue,2004 This book offers a prescription for reform that includes freedom of choice among public and private schools **Academic freedom, institutional autonomy and the future of democracy** Sjur Bergan,Tony Gallagher,Ira Harkavy,2020-09-15 Academic freedom and institutional autonomy are essential for universities to produce the research and teaching necessary to improve society and the human condition Academic freedom and institutional autonomy are increasingly important components of the development of democracy At the same time these fundamental democratic values are subject to pressure in many countries The relationship between academic freedom institutional autonomy and democracy is fundamental it is barely conceivable that they could exist in a society not based on democratic principles and democracy is enriched when higher education institutions operate on this basis Higher education institutions need to be imbued with democratic culture and that in turn helps to promote democratic values in the wider society None of these issues are simple and the lines between legitimacy and illegitimacy are sometimes hard to discern as is illustrated by perspectives from Europe North America Asia Australia and the Mediterranean region **The American Bibliography of Slavic and East European Studies for 1994** Patt Leonard,Rebecca Routh,1997-05-31 This text provides a source of citations to North American scholarships relating specifically to the area of Eastern Europe and the former Soviet

Union It indexes fields of scholarship such as the humanities arts technology and life sciences and all kinds of scholarship such as PhDs
