Educational Testing Canadian Experience With Standards Examinations And Assessments:

Educational Testing United States. General Accounting Office, 1993 The experience of the Canadian provinces with large scale testing programs is reviewed to suggest answers to questions currently discussed in the United States regarding the proposed national system of achievement testing In the Canadian provinces tests are linked to provincial curricula Standards and assessments are not set by experts with no direct responsibility for implementing curriculum and instruction but are prepared with the cooperation of teachers and administrators Assessments cover broad subject areas and monitor the overall education system and examinations certify individuals mastery of specific high school courses The provinces have not found it necessary to attach high stakes to all tests Examination results are used in conjunction with teacher assigned grades and assessments have no consequences for individual students Safeguards have been developed for each type of test and provincial school funding formulas which are independent of the testing process tend to level resources among schools within a province Most Canadian educators and the public support the testing programs but they have no hard evidence that the programs lead directly to improved instruction Appendixes list characteristics of the provincial programs participants in site and telephone interviews and major contributors to the report Fourteen tables provide information about the testing programs Contains 8 references SLD **Educational Testing** ,1993-12 A review of the experiences of the Canadian

provinces with large scale testing programs to suggest answers to questions discussed currently in the U S regarding this proposal In the Canadian provinces tests are linked to provincial curricula and measure the extent to which students have achieved provincial standards developed through the widespread involvement of teachers provincial officials and subject area experts Standardized Testing in Canada Ross E. Traub, Canadian Education Association, 1994 A survey was undertaken to

obtain information about the use of standardized tests in assessing the achievement of Canadian elementary and secondary school students This information was garnered from the ministries or departments of education of all ten Canadian provinces and one territory and a sample of about 120 of the local school boards in the country The questionnaires sent to the ministries and school boards were similar and consisted of two parts The first part contained questions of a general nature about the province wide testing program if any that had been conducted during the 1991 92 school year The second part of the questionnaire was focused on the particular tests used in system wide testing by province or board during any of the four academic years 1989 90 to 1992 93 *Month in Review ...* ,1993-04 **Reports and Testimony** ,1993 *Resources in Education* ,1994
