Educology Of The Free:

Educology of the Free Elizabeth Steiner,1981-01-01 *Life-Practice Educology* Lan Ye,2020-03-23 In Life Practice Educology A Contemporary Chinese Theory of Education Ye Lan presents the theory of a contemporary Chinese school of Educology It consists of two main parts The first part proposes a fully formulated view on Life Practice School of Educology and expounds on current thinking in China that denies the independence of educology as a discipline The second part explains both inherited and new understandings of the Life Practice School of Educology covering Chinese traditional culture and the current debate It further refines the Chinese understanding of Education jiaoyu as teaching the knowledge of nature and society and cultivating a self consciousness towards life **Educational Technology Beyond Content** Brad Hokanson,Gregory Clinton,Andrew A. Tawfik,Amy Grincewicz,Matthew Schmidt,2020-04-09 This book is the outcome of a research symposium sponsored by the Association for Educational Communications and Technology AECT Consisting of twenty four chapters including an introduction and conclusion it argues that informational content should not be the main element of education and that to provide more for learners it is necessary to go beyond content and address other skills and capabilities It also discusses the false premise that learning is complete when the information is known not when learners seek more their own directions answers and ideas The authors assert that the ability to synthesize solve problems and generate ideas is not based on specific content although education often focuses solely on teaching content Further they state that content can be separated from the learning process and that instructional design and educational technology must be about the skills habits and beliefs to be learned *Philosophy of Lifelong Education* Kenneth Wain,2016-10-04 This book first published in 1987 provides a rigorous philosophical analysis of lifelong education The author presents his arguments simply and directly so that the book is accessible to students who are new to philosophy and adult education

Intersections Across Disciplines Brad Hokanson,Marisa Exter,Amy Grincewicz,Matthew Schmidt,Andrew A. Tawfik,2020-12-15 This volume is the result of the annual Summer research symposium sponsored by the Association for Educational Communications and Technology AECT The twenty two chapters in this volume seek to examine how learning and the design of instruction is interdisciplinary and connective in terms of research and practice The book is generally divided into three areas Theory Research and Application This framework shaped the authors interactions discussions and the informal context of the symposium Writings are included on multiple levels including research and practice on learning across disciplines including instructional design and how design thinking is inherently interdisciplinary How learning is designed for general audiences or for purposely integrated educational experiences has also been examined *Resources in Education* ,1993 **Kinesis** ,1983 *Toward a Grammar of Curriculum Practice* Edmund C. Short,2023-07-01 Curriculum planning can be conceptualized in various ways and curriculum planners necessarily must adopt a particular approach in order to facilitate their thinking and decision making However the history of curriculum planning suggests that existing

conceptualizations are sometimes confusing imprecise or not as helpful as they might be There is a need for a new conceptualization that overcomes the limitations of these earlier conceptions Through conceptual analysis and concept development the author presents curriculum planning as a form of educational practice distinct from other practices such as teaching administration and policy making Short s grammar of curriculum practice describes a set of key concepts and the meaningful relationships among them that define the essential elements of curriculum and of curriculum planning

Motivation Science Myint Swe Khine,2024-12-06 This volume explores human machine collaboration and provides machine generated auto summaries of emerging research trends in motivation science Each chapter presents summaries of pre defined themes and includes an editor written introduction It covers various topics from classic theories such as Maslow s hierarchy of needs to cutting edge research in neuroscience and cultural influences on motivation The book offers valuable insights into what makes us tick and how to harness motivation to improve our lives The book is organized into six chapters covering interrelated topics such as the motivation science emotion based motivation educational motivation self regulated learning motivation and technology and motivation and neuroscience The auto summaries have been generated by a recursive clustering algorithm via the Dimensions Auto summarizer by Digital Science The editor of this book selected which SN content should be auto summarized and decided its order of appearance Please note that these are extractive auto summaries consisting of original sentences but are not representative of the original paper since we do not show the full length of the publication Please note that only published SN content is represented here and that machine generated books are still at an experimental stage
