An Allegory** Edward MONRO, 1858 **Conversations on the Dark Secrets of Physics** Wilson Talley, Wendy Teller, 2013-06-29 The idea for this book began over four decades ago when Edward Teller began teaching physics appreciation courses at the University of Chicago Then as now Dr Teller believes that illiteracy in science is an increasingly great danger to American society not only for our children but also for our growing adult population On one hand the future of every individual on this globe is closely

related to science and its applications Fear of the results of science which has become prevalent in much of the Western World leads to mistaken decisions in important political affairs But this book speaks of no fears and of no decisions only of the facts that can prevent one of them and indirectly guide the others From the perspective of this book a second point is even more significant The first quarter of this century has seen the most wonderful and philosophically most important transformation in our thinking The intellectual and aesthetic values of the points of view of Einstein and Bohr cannot be overestimated Nor should they be hidden at the bottom of tons of mathematical rubble Our young people must be exposed to science both because it is useful and because it is fun Both of these qualities should be taken at a truly high value
