Social Policy and Social Dimensions on Vulnerability and Resilience in Europe Birgit Bütow,María Luisa Gómez Jiménez,2015-05-04 There are two tendencies in present public discussions Social problems have their causes in the individual and are thus not a problem of socio economic inequality Consequently we find an increasing policy in Europe of selfactivation and self help as

substitutes of social work On the other hand new types of social vulnerability and challenges for social work and social policy are detected which are discussed in the book in their European dimensions Beginning in the last century in Europe processes of social exclusion are discussed as common phenomena of the crisis in social welfare systems They have their origins in the radical changes in paid employment the weakening of family ties and the increasing incapability of the welfare state to promote social inclusion New types of social vulnerabilities are emerging containing chances as well as risks They are discussed in two ways On the one hand the implementation of indicator based management systems of social services is attempted which implies a range of chances and risks in ethical and professional self image On the other hand there are self help movements social networks and other social types of resilience which are often a complement or support to Social Work Yet there is a policy to substitute Social Work by a strategy of self activation Both developments are signs of the present and indicators of the future of Social Work They show the necessity of clarifying the social and political scopes and prospects of Social Work in societies at the crossroads of enhancing civility human development and social security or overburden the vulnerable who face new dimensions of psychological ecological and economic distress This book is an attempt to bring together several European discussions concerning Social Work and social politics

Social Work and Social Development James Midgley, Amy Conley, 2010-05-19. Social workers have been involved in social development for many years, but it is only recently that these ideas have been explicitly applied to social work practice. The result is that a new and distinctive approach to social work practice, known as developmental social work, has emerged. Developmental social work emphasizes the role of social investment in professional practice. These investments meet the material needs of social work's clients and facilitate their full integration into the social and economic life of the community. Developmental social workers believe that client strengths and

capabilities need to be augmented with public resources and services if those served by the profession are to live productive and fulfilling lives. Although developmental social work is inspired by international innovations particularly in the developing countries, it is highly relevant to practice in the United States and other Western nations. In the first book to lay out a clear framework for developmental social work practice, chapters will focus on the traditional fields of social work practice showing how social investment strategies can be adopted by social workers in their daily practice with populations including families and children, people with mental illness, homeless youth, people with disabilities, the elderly, and those in the correctional system. By facilitating clients' full social and economic participation through a variety of strategies such as microenterprise or asset building programs, practitioners can help bring about meaningful changes in clients' lives and throughout their communities. The editors and contributors offer a highly original exposition of developmental social work theory and practice, providing a definitive guide to an emerging and exciting new approach to practice.
