coining proverbs A picture is worth a thousand words was not as you might imagine the product of ancient Chinese wisdom it
was actually minted by advertising executive Fred Barnard in a 1921 advertisement for Printer s Ink magazine After all
Americans are first and foremost a practical people and proverbs can be loosely defined as pithy statements that are

word it features over 15 000 entries including uniquely American proverbs that have never before been recorded as well as
thousands of traditional proverbs that have found their way into American speech from classical biblical British continental
European and American literature Based on the fieldwork conducted over thirty years by the American Dialect Society this
volume is complete with historical references to the earliest written sources and supplies variants and recorded geographical
distribution after each proverb Many surprised await the reader in this vast treasure trove of wit and wisdom Collected here

Faull,1995 What was the role of anthropology in the German Enlightenment Why did this discipline emerge as one of the most popular modes of inquiry in the eighteenth century permeating fields as disparate as aesthetics medicine and law As the essays in this volume show the body of Enlightenment knowledge was by no means universal During the German Enlightenment the study of nature humanity and everything that humanity created was the

topic of the day But the period that defined moral reason as the sovereign human faculty also applied its scrutiny to the body that such a mind inhabited What did it look like Could moral superiority be deduced from physiognomy In the massive effort to educate the German populace on what were seen to be the fundamental a priori differences physical and moral between the sexes and the races the European bourgeois man was considered to embody all human virtues and talents and stem from the only race and sex capable of ruling itself democratically and rationally To examine the role of anthropology in this enterprise contributors to this volume were asked to investigate what constitutes the German Enlightenment's interaction between its self proclaimed rationalism and the pervasive presence of the non rational that is the corporeal
