Liberating Grammar:

The Cambridge Guide to Pedagogy and Practice in Second Language Teaching Jack C. Richards, Anne Burns, 2012-01-31 This collection of original articles provides an overview of key issues and approaches in contemporary language teaching

Ellipsis William S. Allen, 2012-02-01 What is the nature of poetic language when its experience involves an encounter with finitude with failure loss and absence For Martin Heidegger this experience is central to any thinking that would seek to articulate the meaning of being but for Friedrich H Iderlin and Maurice Blanchot it is a mark of the tragic and unanswerable demands of poetic language In *Ellipsis* a rigorous original study on the language of poetry the language of philosophy and the limits of the word William S Allen offers the first in depth examination of the development of Heidegger s thinking of poetic language which remains his most radical and yet most misunderstood work that carefully balances it with the impossible demands of this experience of finitude an experience of which H Iderlin and Blanchot have provided the most searching examinations In bringing language up against its limits Allen shows that poetic language not only exposes thinking to its abyssal grounds but also indicates how the limits of our existence come themselves traumatically impossibly to speak

Tradition(s) Stephen H. Watson, 1997 What exactly is tradition Stephen H Watson provides a fine grained account of tradition that draws on Gadamer who conceives of tradition in terms of continuity and Foucault who engages in critique through the presentation of difference Tradition s accomplishes this through a series of original readings of Kant and post Kantian German philosophy

Scientific Conceptualization and Ontological Difference Dimitri Ginev, 2019-07-22 Ginev works out a conception of the constitution of scientific objects in terms of hermeneutic phenomenology Recently there has been a revival of interest in hermeneutic theories of scientific inquiry The present study is furthering this interest by shifting the focus from interpretive methods and procedures to the kinds of reflexivity operating in scientific conceptualization According to the book s central thesis a reflexive conceptualization enables one to take into consideration the role which the ontic ontological difference plays in the constitution of scientific objects The book argues for this thesis by analyzing the formation of objects of inquiry in a range of scientific domains stretching from highly formalized domains where the quest for objects identities is carried out in terms of objects emancipation from structures to linguistic and historiographic programs that avoid procedural objectification in their modes of conceptualization The book sets up a new strategy for the dialogue between the theories of scientific inquiry and hermeneutic phenomenology

Being and Time Martin Heidegger, 2025-02-11T00:00:00Z First published in the original German in 1927 this translation first published in the US by Harper and Row Publishers in 1962 public domain What is the meaning of being This is the central question of Martin Heidegger s profoundly important work in which the great philosopher seeks to explain the basic problems of existence A central influence on later philosophy literature art and criticism as well as existentialism and much of postmodern thought

Extensions Stephen H. Watson, 1992-08-25

Heidegger's Metaphysics Aengus Daly, 2024-07-25

Heidegger's *Metaphysics* explores how Heidegger continued the project of Being and Time developing a new kind of metaphysics through a critique of Kantian transcendental philosophy Drawing on Heidegger's published work lecture courses drafts and correspondence from the late 1920s it reconstructs the philosophical justification for this project its implications for Heidegger's phenomenology of time and his understanding of philosophical concept formation Daly proposes that Heidegger's project neither failed nor remained indebted to a Kantian transcendental framework and challenges the widespread interpretation of Heidegger as a critic of metaphysics This work examines a wide range of themes that have been largely neglected in discussions of Heidegger's work including a phenomenology of the mythical world in dialogue with Ernst Cassirer's work the origin of religious concepts the development of a temporality of thrownness and Heidegger's critique of Kantian transcendentalism It finishes by challenging the separation of Heidegger's philosophy from his politics and asks what we can retrieve from his project today

Creation's Slavery and Liberation Presian Renee Burroughs, 2022-11-03 What did the apostle Paul mean when he portrayed the creation as subjected to frustration and enslaved to destruction What forms of frustration and destruction might he have seen throughout the Roman Empire And how would he describe creation's condition today *Creation's Slavery and Liberation* addresses these questions by tracing the story of creation as it appears in Paul's own Scriptures the Tanakh Roman imperial propaganda Paul's letter to Rome and U.S. industrial agriculture This story reveals God to be the Creator who makes right justifies and makes alive through Jesus Christ and the Spirit Because God liberates justifies and vivifies the entire creation and since according to Paul creation's liberation is linked to humanity's glorification Paul expects Christians to pursue justice and nourish life Burroughs encapsulates key justice oriented and life supporting practices in seven eco ethical principles To make these principles come alive she describes the ways in which Roman imperial and American industrial regimes have caused injustice and destruction and instead she proposes more regenerative approaches to growing enjoying and sharing our daily bread

[The Ethics of Authorship](#) Daniel Berthold-Bond, 2011 An original and stimulating account of both Kierkegaard and Hegel that succeeds by focusing on the philosophy of language espoused by each thinker Berthold brings a rich tapestry of thinkers into play and provides unexpected entry into the lives of both writers David Macgregor University of Western Ontario

Wittgenstein and Phenomenology Oskari Kuusela, Mihai Ometita, Timur Uçan, 2018-06-04 This volume of new essays explores the relationship between the thought of Wittgenstein and the key figures of phenomenology Husserl Heidegger Levinas Merleau-Ponty and Sartre It is the first book to provide an overview of how Wittgenstein's philosophy in its different phases including his own so called phenomenological phase relates to the variety of phenomenological approaches developed in continental Europe In so doing the volume seeks to throw light on both sides of the comparison and to clarify more broadly the relations between analytic and phenomenological philosophy However rather than treating the interpretation of either phenomenological philosophy or Wittgenstein as an already settled issue several chapters in the volume examine and question received views

regarding them and develop alternatives to such views Wittgenstein and Phenomenology will be of interest to scholars working in philosophical methodology and metaphilosophy the philosophy of mind philosophy of language and logic and ethics

Liberating Judgment Douglas John Casson, 2011-01-03 Examining the social and political upheavals that characterized the collapse of public judgment in early modern Europe *Liberating Judgment* offers a unique account of the achievement of liberal democracy and self government The book argues that the work of John Locke instills a civic judgment that avoids the excesses of corrosive skepticism and dogmatic fanaticism which lead to either political acquiescence or irresolvable conflict Locke changes the way political power is assessed by replacing deteriorating vocabularies of legitimacy with a new language of justification informed by a conception of probability For Locke the coherence and viability of liberal self government rests not on unassailable principles or institutions but on the capacity of citizens to embrace probable judgment The book explores the breakdown of the medieval understanding of knowledge and opinion and considers how Montaigne's skepticism and Descartes rationalism interconnected responses to the crisis involved a pragmatic submission to absolute rule Locke endorses this response early on but moves away from it when he encounters a notion of reasonableness based on probable judgment In his mature writings Locke instructs his readers to govern their faculties and intellectual yearnings in accordance with this new standard as well as a vocabulary of justification that might cultivate a self government of free and equal individuals The success of Locke's arguments depends upon citizens willingness to take up the labor of judgment in situations where absolute certainty cannot be achieved

Heidegger on Logic Filippo Casati, Daniel Dahlstrom, 2022-09-22 This volume examines the implications of Heidegger's thinking for logic and for speaking logically of being in contrast to beings

Silence, the Word and the Sacred E.D. Blodgett, Harold Coward, 2010-10-30 The result of a dialogue between poets and scholars on the meaning and making of the sacred this book endeavours to determine how the sacred emerges in sacred script as well as in poetic discourse It ranges through scholarship in areas as apparently disparate as postmodernism and Buddhism The perspectives developed are various and without closure locating the sacred in modes as diverse as patristic traditions feminist retranslations of biblical texts and oral and written versions of documents from the world's religions The essays cohere in their preoccupation with the crucial role language plays in the creation of the sacred particularly in the relation that language bears to silence In their interplay language does not silence silence by rather calls the other as sacred into articulate existence

Modern Poetry and the Idea of Language Gerald L. Bruns, 2001 Gerald Bruns's ground breaking analysis compares two contrasting functions of language the hermetic where language is self contained and self referencing and the Orphic which originates from a belief in the mythical unity of word and being Bruns lucidly depicts the distinctions and convergences between these two lines of thought by examining the works of Mallarmé Flaubert Joyce Beckett and others

Routledge Revivals: Pandora and Occam (1992) Horst Ruthrof, 2017-03-16 First published in 1992 this book evokes Pandora and Occam as metaphoric corner posts in an argument about language as discourse and in

doing so brings analytic philosophy to bear on issues of Continental philosophy with attention to linguistic semiological and semiotic concerns. Instead of regarding meanings as guaranteed by definitions, the author argues that linguistic expressions are schemata directing us more or less loosely toward the activation of nonlinguistic sign systems. Ruthrof draws up a heuristic hierarchy of discourses with literary expression at the top, descending through communication, reduced reference, and speech acts to formal logic and digital communication at the bottom. The book offers multiple perspectives from which to review traditional theories of meaning, working from a wide variety of theorists including Peirce, Frege, Husserl, Derrida, Lyotard, Davidson, and Searle. In Ruthrof's analysis, Pandora and Occam illustrate the opposition between the suppressed rich materiality of culturally saturated discourse and the stark ideality of formal sign systems. This book will be of interest to those studying linguistics, literature, and philosophy.

Liberation Ethics Thomas Louis Schubeck, 1993-01-01. Thoroughly researched, critically reasoned, and well written. Schubeck's book is a model of caring and careful discernment. Arthur McGovern, University of Detroit.

Rationality, Virtue, and Liberation Stephen Petro, 2013-11-19. This book explores the overlooked but vital theoretical relationships between R. M. Hare, Alan Gewirth, and Jürgen Habermas. The author claims their accounts of value, while failing to address classic virtue theoretical critiques, bear the seeds of a resolution to the ultimate question: What is most valuable? These dialectical approaches, as claimed, justify a reinterpretation of value and value judgment according to the Carnapian conception of an empirical linguistic framework or grammar. Through a further synthesis with the work of Philippa Foot and Thomas Magnell, the author shows that value would be literally meaningless without four fundamental phenomena which constitute such a framework: Logical Judgment, Conceptual Synthesis, Conceptual Abstraction, and Freedom. As part of the grammar of goodness, the excellence of these phenomena in a highly concrete way constitute the essence of the greatest good, as this book explains.

Virtue, Success, Pleasure, and Liberation Alain Daniélou, 1993-08-01. What is the nature of the social order that unquestionably produced one of the greatest and longest lasting civilizations known to humankind? Alain Daniélou, distinguished Orientalist, musicologist, and linguist, reveals the foundations of India's culture and the four aims of human life as they are viewed in the traditional Hindu society: virtue on a moral plane, success on the material and social planes, pleasure on a sensual plane, and liberation on a spiritual plane. Coexistent with these aims are the four stages of life: quest for knowledge, family life, retreat into the forest, and renunciation. A four-fold division can be found in all traditional societies throughout the world, symbolically representing the progression of creative consciousness into physical reality. In India, this division is reflected in the caste system, a social order that differs profoundly from those accepted in the contemporary Western world. Exploring the fundamental concepts of the caste system, the author addresses issues of race, individual rights, sexual mores, martial practices, and spiritual attainments. In this light, he exposes the inherent flaws and hypocrisies of our modern egalitarian governments and shows how the shadow side of the ancient caste system persists, disguised and unacknowledged, beneath contemporary economic regimes. Daniélou explains how

Hindu society has served as a model for the realization of human potential on many levels addressing sociological and human problems that are both timeless and universal *Liberation Theology and the Message of Salvation* Eugen Rosenstock-Huessy, 1978 Pittsburgh Theological Monograph Series General Editor Dikran Y Hadidian [A Liberation Theology of the Brain](#) Carmelo Santos-Rolón, 2025 Using insights from neuroscience theology and his experiences as pastor professor and activist Santos Rolon explores how science and theology illuminate God's decolonizing effects on the brain and nervous system Structures of injustice in the world must also be dismantled in us and the future that God is birthing is taking shape within us
