*The Soviet Union and National Liberation Movements in the Third World* Galia Golan, 2022-12-28 The Soviet Union and National Liberation Movements in the Third World 1988 is a systematic comparison of Soviet theory about and actual behaviour toward movements for national liberation in the Third World In this definitive study Professor Golan demonstrates that Soviet behaviour toward such movements is consistent with Soviet theory as stated in the writings and speeches of high level influential within the Party military and academic communities In so doing she advances our understanding of the rules of thumb that Soviet leaders appeared to follow in deciding whether and how to assist the varied types of anti imperialist and separatist movements in the developing world The first part of the book provides a detailed analysis of the various schools of thought among Soviet writers concerning different aspects of national liberation movements and the second part analyses actual Soviet behaviour toward numerous movements around the world

*National Liberation Movements in Office* Elena Torreguitar, 2009 Originally presented as the author's thesis Ph D Boston University 2008

*Southern African Liberation Movements and the Global Cold War 'East'* Lena Dallywater, Chris Saunders, Helder Adegas Fonseca, 2019-06-17 In the global context of the Cold War the relationship between liberation movements and Eastern European states obviously changed and transformed Similarly forms of material aid and ideological encouragement underwent changes over time The articles assembled in this volume argue that the traditional Cold War geography of bi polar competition with the United States is not sufficient to fully grasp these transformations The question of which side of the ideological divide was more successful or lucky in impacting actors and societies in the global south is still relevant yet the Cold War perspective falls short in unfolding the complex geographies of connections and the multipolarity of actions and transactions that exists until today Acknowledging the complexities of liberation movements in globalization processes the papers thus argue that activities need to be understood in their local context including personal agendas and internal conflicts rather than relying primarily on the traditional frame of Cold War competition They point to the agency of individual activists in both Africa and Eastern Europe and the lessons practices and languages that were derived from their often contradictory encounters In Southern African Liberation Movements authors from South Africa Portugal Austria and Germany ask What role did actors in both Southern Africa and Eastern Europe play What can we learn by looking at biographies in a time of increasing racial and international conflict And which creative solutions need to be found to combine efforts of actors from various ideological camps Building on archival sources from various regions in different languages case studies presented in the edition try to encounter the lack of a coherent state of the art They aim at combining the sometimes scarce sources with qualitative interviews to give answers to the many open questions regarding Southern African liberation movements and their connections to the East

**Liberation Movement Tactics** Corbin Shepherd, AI, 2025-05-02 Liberation Movement Tactics explores the multifaceted nature of resistance against oppression providing insights into why some liberation movements succeed while others fail It

**Transnational Histories of Southern Africa's Liberation Movements** Jocelyn Alexander, JoAnn McGregor, Blessing-Miles Tendi, 2020-05-21 Transnational Histories of Southern Africa's Liberation Movements offers new perspectives on southern Africa's wars of national liberation drawing on extensive oral historical and archival research Assuming neither the primacy of nationalist loyalties as they exist today nor any single path to liberation the book unpicks any notion of a straightforward imposition of Cold War ideologies or strategic interests on liberation wars This approach adds new dimensions to the rich literatures on the Global Cold War and on solidarity movements The contributors trace the ways that ideas and practices were made adopted and circulated through time and space through a focus on African soldiers politicians and diplomats The book also asks what motivated the men and women who crossed borders to join liberation movements how Cold War influences were acted upon interpreted and used and why certain moments venues and relations took on exaggerated importance The connections among liberation movements between them and their hosts and across an extraordinarily diverse set of external actors reveal surprising exchanges and lasting legacies that have too often been obscured by the assertion of monolithic national histories Tracing an extraordinarily diverse set of interactions and exchanges Transnational Histories of Southern Africa's Liberation Movements will be of great interest to scholars of Southern Africa Transnational History the Cold War and African Politics The chapters were originally published as a special issue of the Journal of Southern African Studies

**Historicising the Women's Liberation Movement in the Western World** Laurel Forster, Sue Bruley, 2019-07-09 The Women's Liberation Movement WLM of the late 1960s 1970s and 1980s emerged out of a particular set of economic and social circumstances in which women were unequally treated in the home the workplace and in culture and wider society As part of the WLM women collected together in disparate groups and contexts to express their dissatisfaction with their role and position in society making their concerns apparent through consciousness raising and activism This important time in women's history is revisited in this collection which looks afresh at the diversity of the movement and the ways in which feminism of the time might be reconsidered and historicised The contributions here cover a range of important issues including feminist art local activism class distinction racial politics perceptions of motherhood girls education feminist print cultures the recovery of feminist histories and feminist heritage and they span personal and political concerns in Britain Canada and the United States Each contributor considers the impact of the WLM in a different context reflecting the variety of issues faced by women and helping us to understand the problems of the second wave This book broadens our understanding of the impact and the implication of the WLM explores the dynamism of women's activism and radicalism and acknowledges the significance of this movement to ongoing contemporary feminisms The chapters in this book were originally published as a special issue of Women's History Review

**From #RhodesMustFall Movements to #HumansMustFall Movements** Artwell Nhemachena, Jairo Kangira, 2021-05-14 Might it be possible that the world is being migrated into an era where the imperial periphery will be increasingly governed through Artificial Intelligence AI and robotics designed to replace human beings Celebrated as efficient strong unfailing tireless precise and beyond corruption AI and robots are set to replace African leaders who are imperially deemed to be and consistently condemned as corrupt failed weak and inefficient But if these AI and robots are neo imperial tools and machinations the million dollar question is whether empire is not returning to recolonise the supposedly inefficient Africans via the new technologies and machinism Where Africans once celebrated their liberation war movements empire has emplaced what it calls liberation technologies designed to supposedly liberate African youths from their own states and governments led by liberation movements Where Africans once celebrated their liberation war movements empire has placed its own NGOs CSOs spewing liberal ideologies designed to ostensibly liberate African youths from their own supposedly failed and corrupt states and government leaders With

Usually people think that privacy is the ability of an individual to isolate themselves or that it is a person's right to control access to their personal information. However, privacy is not just about revealing secret information; it also includes exploiting user personal data as the exploitation of personal data may lead to disastrous consequences. Protecting User Privacy in Web Search Utilization presents both multidisciplinary and interdisciplinary works on questions related to experiences and phenomena that can or could be covered by concepts regarding the protection and privacy of web service users. It further highlights the importance of web search privacy to the readers and educates them about recent developments in the field. Covering topics such as AI-based intrusion detection, desktop search engines, and privacy risks, this premier reference source is an essential resource for students and educators of higher education, data experts, privacy professionals and engineers, IT managers, software developers, government officials, archivists and librarians, privacy rights activists, researchers, and academicians. The International Law of Armed Conflict: Personal and Material Fields of Application Edward K.

Kwakwa, 2023-11-27. The underlying rationale for the international humanitarian law of war is the protection of individuals and victims of war. This book is a contribution to the study of human rights in general and humanitarian law in particular. It contains detailed information and analysis of the law and practice relating to international armed conflicts involving irregular combatants. The discussion focuses on the most controversial provisions of Additional Protocol I to the Geneva Conventions: the classification of wars of national liberation, the treatment of guerrillas and mercenaries upon capture, reprisals, and the question of supervision and implementation in such conflicts. The manuscript on which this book was based was awarded the 1991 Paul Reuter Prize by the International Committee of the Red Cross. The Creation of States in International Law James Crawford, 2006. Statehood in the early 21st century remains as much a central problem now as it was in 1979 when the first edition of *The Creation of States in International Law* was published. As Rhodesia, Namibia, the South African Homelands, and Taiwan then were subjects of acute concern, today governments, international organizations, and other institutions are seized of such matters as the membership of Cyprus in the European Union, application of the Geneva Conventions to Afghanistan, a final settlement for Kosovo, and still relations between China and Taiwan. All of these and many other disputed situations are inseparable from the nature of statehood and its application in practice. The remarkable increase in the number of States in the 20th century did not abate in the twenty-five years following publication of James Crawford's landmark study, which was awarded the American Society of International Law Prize for Creative Scholarship in 1981. The independence of many small territories comprising the residue of the European colonial empires alone accounts for a major increase in States since 1979, while the disintegration of Yugoslavia and the USSR in the early 1990s further augmented the ranks. With these developments, the practice of States and international organizations has developed by substantial measure in respect of self-determination, secession, succession, recognition, decolonization, and several other fields. Addressing such questions as the unification of Germany, the status of Israel and Palestine, and the continuing pressure from non-State groups to attain

statehood even in cases like Chechnya or Tibet against the presumptive rights of existing States James Crawford discusses the relation between statehood and recognition the criteria for statehood especially in view of evolving standards of democracy and human rights and the application of such criteria in international organizations and between states Also discussed are the mechanisms by which states have been created including devolution and secession international disposition by major powers or international organizations and the institutions established for Mandated Trust and Non Self Governing Territories Combining a general argument as to the normative significance of statehood with analysis of numerous specific cases this fully revised and expanded second edition gives a comprehensive account of the developments which have led to the birth of so many new states
