Richard Price and the Ethical Foundations of the American Revolution Richard Price, 1779. Richard Price was a loyal although dissenting subject of Great Britain who thought the British treatment of their colonies as wrong not only prudentially financially economically militarily and politically but above all morally wrong. He expressed these views in his first pamphlet early in 1776. It concluded with a plea for the cessation of hostilities by Great Britain and reconciliation. Its analyses arguments and conclusions however along with its admiration for the colonists their moral position and qualities could hardly fail to contribute to their reluctant recognition that there was no real alternative to independence. Price found some of his views not only misunderstood but vilified by negative critics in the ensuing controversy. So he wrote a second pamphlet which was published in early 1777. He expanded his analysis of liberty extended its application to the war with America and greatly expanded his discussion of the economic impact upon Great Britain. After the war in 1784 he published a third pamphlet on the importance of the American Revolution and the means of making it a benefit to the world appending an extensive letter from the Frenchman Turgot. Implicitly the letter regards Price as a perceptive theorist of the revolution explicitly it identifies the problems facing the prospective new nation and expresses a wish that it will fulfill its role as the hope of the world. Selections in the appendices present a part of the pamphlet controversy and the selection of correspondence shows how seriously Price was regarded by Revolutionary leaders.
