Libya Since Independence:

Libya Since Independence (RLE Economy of Middle East) J.A. Allan, 2014-10-24 Since its independence in 1951 Libya has experienced rapid economic and social change. Many of these developments though dramatic have not been comprehensively documented until now. One of the problems that Libya has had to face has been the absorption of burgeoning oil revenues and here the Libyan experience accords with that of other oil rich states. The country has embarked on ambitious policies based on oil wealth. This book charts the development of traditional agricultural way of life and the growth of new industrial projects and transport systems. The effect of Libya's new wealth on its social and political systems is also considered in detail. In conclusion the importance of Libya's frontiers are discussed although Libyan international interests have been wide ranging in recent years its real external interests are to extend its natural resource base for its future developments will be founded on Libya's perception of its territorial entitlement. First published in 1982 **The Maghreb Since 1800** Knut S. Vikør, 2024-11-01 The Maghreb the region that today encompasses Morocco Algeria Tunisia and Libya is a region apart within the larger Muslim and Arab world. Today the focus of popular uprisings for democracy and participation it underwent long periods of colonisation and anti colonial nationalist resistance both peaceful and militant. To understand the nature of today's developments in North Africa we need fully to appreciate the tumultuous history of the region and how its four discrete countries followed different trajectories some marked by a continuity of social and political structures in both the colonial era and as independent states while others were marked by sharp ruptures and violent struggles. These historical differences are still visible in the current era and tell us much about the societies in question. This short history of the Maghreb surveys its development from the coming of Islam to the present day but with greatest emphasis on the modern period from the early nineteenth century onwards. It follows the French protectorates Morocco and Tunisia and how their nationalist movements forged the independent states that followed and it chronicles the wars of resistance and liberation in Algeria and Libya and how these conflicts also marked their independence with a long running civil war in the former and the recent uprising against the Gaddafi regime in the latter **The Libyan Revolution and its Aftermath** Peter Cole, Brian McQuinn, 2015-01-02 This book offers a novel incisive and wide ranging account of Libya's 17 February Revolution by tracing how critical towns communities and political groups helped to shape its course. Each community whether geographical e.g. Misrata Zintan tribal communal e.g. Beni Walid or political e.g. the Muslim Brotherhood took its own path into the uprisings and subsequent conflict of 2011 according to their own histories and relationship to Muammar Qadhafi's regime. The story of each group is told by the authors based on reportage and expert analysis from the outbreak of protests in Benghazi in February 2011 through to the transitional period following the end of fighting in October 2011. They describe the emergence of Libya's new politics through the unique stories of those who made it happen or those who fought against it. *The Libyan Revolution and its Aftermath* brings together leading journalists academics and specialists each with

Vandewalle, 1998 Although Libya and its current leader have been the subject of numerous accounts few have considered how the country's tumultuous history its institutional development and its emergence as an oil economy combined to create a state whose rulers ignored the notion of modern statehood Dirk Vandewalle supplies a detailed analysis of Libya's political and economic development since the country's independence in 1951 basing his account on fieldwork in Libya archival research in Tripoli and personal interviews with some of the country's top policymakers **Libya since Independence** Dirk Vandewalle, 2018-09-05 Although Libya and its current leader have been the subject of numerous accounts few have considered how the country's tumultuous history its institutional development and its emergence as an oil economy combined to create a state whose rulers ignored the notion of modern statehood International isolation and a legacy of internal turmoil have destroyed or left undocumented much of what researchers might seek to examine Dirk Vandewalle supplies a detailed analysis of Libya's political and economic development since the country's independence in 1951 basing his account on fieldwork in Libya archival research in Tripoli and personal interviews with some of the country's top policymakers Vandewalle argues that Libya represents an extreme example of what he calls a distributive state an oil exporting country where an attempt at state building coincided with large inflows of capital while political and economic institutions were in their infancy Libya's rulers eventually pursued policies that were politically expedient but proved economically ruinous and disenfranchised local citizens Distributive states according to Vandewalle may appear capable of resisting economic and political challenges but they are ill prepared to implement policies that make the state and its institutions relevant to their citizens Similar developments can be expected whenever local rulers do not have to extract resources from their citizens to fund the building of a modern state *Africa, Asia, and South America Since 1800* A.
