

SPECIES & ECOSYSTEM SURVIVAL

Every species plays a crucial role in the health and survival of its ecosystem. From food production to oxygen generation, pollination to seed dispersal, pest control, disease reduction, and waste recycling, each plant, animal and fungi is part of an intricate web of interconnected life.

Species roles are illustrated here using miombo woodland as an example – a forest type found across much of southern Africa.

1 Plants absorb carbon dioxide from the air and release oxygen that animals need to survive. Plants store carbon in their leaves, trunks and roots as well as in the soil around them. This reduces the amount of carbon dioxide entering the atmosphere and therefore helps reduce global warming. Plants help maintain water supplies by storing and releasing moisture, including floods and droughts.

2 Plants use energy from the sun, to convert carbon dioxide and water into glucose. This is the basis of food for almost all species in the world. Herbivores like elephants and antelopes eat plants and they can become food for carnivores like lions and wild dogs.

3 Flowering plants need to be pollinated to reproduce. Different species of insects, birds and mammals pollinate different plants. For example bats and moths pollinate baobab trees and many miombo species are pollinated by bees.

4 Many plants rely on animals to disperse their seeds, enabling new plants to grow. For example elephants, primates and birds eat fruit that disperses the seeds, fertilised by their dung, far from the parent plant.

5 Nature recycles everything, with many different species contributing to nutrient transfer. For example, dung beetles collect and bury faeces, cycling nutrients back into the soil. Millipedes feed on dead and decaying organic matter and transfer nutrients through their droppings.

6 Every species – including humans – contributes to ecosystem balance. Disrupting this balance can cause more negative consequences. For example, if natural habitat is reduced by humans, invasive animals like baboons and elephants may threaten existing people's farms, leading to community tensions. Disrupting habitat also increases the risk of disease transfer to humans.

7 There is a constant cycle of life and death, with many species helping dispose of dead matter, keeping the environment clean and healthy. For example vultures dispose of carcasses, helping prevent the spread of diseases like anthrax and rabies.

8 A healthy ecosystem has a balance of predators that keep pest populations under control. For example crocodiles eat fish and giraffes eat reeds, keeping their populations low. Many predators and omnivores reduce the number of sap-sucking insects such as mosquitoes and flies.

Speaking of Forms of Life Claudio Campagna, Daniel Guevara, 2023-11-26 Humans pose an unprecedented threat to life in all its great diversity of forms The human induced extinction rate has been compared to mass extinctions of the past But this language masks the fact that the crisis is due to voluntary and thus avoidable choices and actions *Speaking of Forms of Life* shows that at the root of this crisis is the tragic inadequacy of the language predominantly used to represent and address what we are doing including the language of sustainable development rights for animals and the rest of nature their intrinsic value and conservation of species as populations This talk alienates us from the other living things from what they actually are have and do and it perpetuates the harm and loss Campagna and Guevara compellingly argue on rigorous but accessible grounds that there is an alternative language to guide conservation in confronting the radically urgent ethical issues it faces This is a language with which we are all familiar mastered by naturalists from Aristotle to Audubon It articulates the primary value in life and the standard that must guide how human beings should live as one form of life among countless others This book is a homecoming for those who practice conservation to above all else secure a creature's ability to satisfy the necessities of its form of life This is an essential book for anyone who cares about conservation and is concerned about the frightening pace of extinctions The great theme of the book is the importance of the language in which we think and talk about living beings Daniel Guevara and Claudio Campagna make available for conservationists the ground breaking work of Philippa Foot and Michael Thompson on natural goodness and on our thought about living beings They show how it can be brought to bear on the threats that confront conservation and on disputes that may seem irresolvable I recommend *Speaking of Forms of Life* as strongly as I can Cora Diamond William R Kenan Jr Professor Emerita of Philosophy Professor of Law and University Professor University of Virginia Our current conservation language is shot through with economic platitudes that don't explain anyone's real motives for conserving biodiversity Campagna and Guevara's new book lays out a convincing alternative grounding conservation goals in the objective goodness of life's many ways of flourishing *Speaking of Forms of Life* is inspiring informative well grounded in the relevant philosophy and conservation literatures but never pedantic Both activists and thinkers will find much of value in *Speaking of Forms of Life* Philip Cafaro Professor of Philosophy Colorado State University *Speaking of Forms of Life* helps us confront the fact that language often obscures rather than facilitates our understanding of living things Our language reflects past misperceptions current ignorance and our shockingly limited intellectual ability to comprehend where we are in space and time and who we are with on this strange planet with its soap bubble coating of life The language in use has abetted and accelerated the catastrophic course we daily continue to choose *Speaking of Forms of Life* shows us why and how this must change It's a crucial revelation that we must heed because our species alone can consider changing course and our species alone must do so Carl Safina
