Towards Very Large Knowledge Bases N. J. I. Mars, 1995 In the early days of artificial intelligence it was widely believed that powerful computers would in the future enable mankind to solve many real world problems through the use of very general inference procedures and very little domain specific knowledge With the benefit of hindsight this view can now be called quite naive The field of expert systems which developed during the early 1970s embraced the paradigm that Knowledge is Power even very fast computers require very large amounts of very specific knowledge to solve non trivial problems Thus the field of large knowledge bases has emerged
