Edmund Husserl's Origin Of Geometry:

Edmund Husserl's Origin of Geometry Jacques Derrida, 1989-01-01 Edmund Husserl's Origin of Geometry An Introduction 1962 is Jacques Derrida's earliest published work In this commentary interpretation of the famous appendix to Husserl's The Crisis of European Sciences and Transcendental Phenomenology Derrida relates writing to such key concepts as differing consciousness presence and historicity Starting from Husserl's method of historical investigation Derrida gradually unravels a deconstructive critique of phenomenology itself which forms the foundation for his later criticism of Western metaphysics as a metaphysics of presence The complete text of Husserl's Origin of Geometry is included

Edmund Husserl's Origin of Geometry Jacques Derrida, 1978 Edmund Husserl's Origin of geometry (Edmund Husserl's L'origine de la géométrie, engl.) Jacques Derrida, 1978 **Jacques Derrida and the Challenge of History** Sean Gaston, 2018-11-23 This important new book argues that Jacques Derrida's work can be treated as the basis for a distinctive historiography The possibility of seeing Derrida not as a philosopher of language but as a philosopher of history has become more apparent with the recent publication of Derrida's 1964-1965 seminar Heidegger The Question of Being and History We now know that the problem of history was at the heart of Derrida's writing in the mid 1960s prior to the publication of his best known work Of Grammatology 1967 Arguing that Derrida's scholarship in the 1960s and early 1970s on historicism historicity and the problem of history can be treated as the basis for a philosophy of history Sean Gaston focuses on Derrida's work from the mid 1970s to the mid 1990s and his relentless questioning of context memory and narrative as the delineation of a deconstructive historiography The book raises a challenge for historians to think about both deconstruction and historiography arguing that contemporary philosophy can provide a basis for thinking about history in the name of a deconstructive historiography that is not incompatible with rigorous historical scholarship Husserl's Crisis of the European Sciences and Transcendental Phenomenology Dermot Moran, 2012-08-23 The Crisis of the European Sciences is Husserl's last and most influential book written in Nazi Germany where he was discriminated against as a Jew It incisively identifies the urgent moral and existential crises of the age and defends the relevance of philosophy at a time of both scientific progress and political barbarism It is also a response to Heidegger offering Husserl's own approach to the problems of human finitude history and culture The Crisis introduces Husserl's influential notion of the life world the pre-given familiar environment that includes both nature and culture and offers the best introduction to his phenomenology as both method and philosophy Dermot Moran's rich and accessible introduction to the Crisis explains its intellectual and political context its philosophical motivations and the themes that characterize it His book will be invaluable for students and scholars of Husserl's work and of phenomenology in general **The Concept of World from Kant to Derrida** Sean Gaston, 2013-09-20 In the mid-eighteenth century metaphysics was broadly understood as the study of three areas of philosophical thought theology psychology and cosmology This book examines the fortunes of the third of these formidable metaphysical concepts the world

Sean Gaston provides a clear and concise account of the concept of world from the mid eighteenth century to the end of the twentieth century exploring its possibilities and limitations and engaging with current issues in politics and ecology He focuses on the work of five principal thinkers Kant Hegel Husserl Heidegger and Derrida all of whom attempt to establish new grounds for seeing the world as a whole Gaston presents a critique of the self evident use of the concept of world in philosophy and asks whether one can move beyond the need for a world like vantage point to maintain a concept of world From Kant to the present day this concept has been a problem for philosophy and it remains to be seen if we need a new Copernican revolution when it comes to the concept of world

The Ethics of Husserl's Phenomenology Joaquim Siles i Borràs, 2010-02-11 The Ethics of Husserl's Phenomenology aims to relocate the question of ethics at the very heart of Husserl's phenomenology This is based on the idea that Husserl's phenomenology is an epistemological inquiry ultimately motivated by an ethical demand that pervades his writing from the publication of Logical Investigations 1900-1901 up to The Crisis of European Sciences and Transcendental Phenomenology 1935 Joaquim Siles Borràs traces the ethical concepts apparent throughout Husserl's main body of work and argues that Husserl's phenomenology of consciousness experience and meaning is ultimately motivated by an ethical demand by means of which Husserl aims to re-define philosophy and re-found science with the aim of making philosophy and science capable of dealing with the most pressing questions concerning the meaningfulness of human existence

The History of Continental Philosophy Alan D. Schrift, 2013-04-12 From Kant to Kierkegaard from Hegel to Heidegger continental philosophers have indelibly shaped the trajectory of Western thought since the eighteenth century Although much has been written about these monumental thinkers students and scholars lack a definitive guide to the entire scope of the continental tradition The most comprehensive reference work to date this eight volume History of Continental Philosophy will both encapsulate the subject and reorient our understanding of it Beginning with an overview of Kant's philosophy and its initial reception the History traces the evolution of continental philosophy through major figures as well as movements such as existentialism phenomenology hermeneutics and poststructuralism The final volume outlines the current state of the field bringing the work of both historical and modern thinkers to bear on such contemporary topics as feminism globalization and the environment Throughout the volumes examine important philosophical figures and developments in their historical political and cultural contexts The first reference of its kind A History of Continental Philosophy has been written and edited by internationally recognized experts with a commitment to explaining complex thinkers texts and movements in rigorous yet jargon free essays suitable for both undergraduates and seasoned specialists These volumes also elucidate ongoing debates about the nature of continental and analytic philosophy surveying the distinctive sometimes overlapping characteristics and approaches of each tradition Featuring helpful overviews of major topics and plotting road maps to their underlying contexts A History of Continental Philosophy is destined to be the resource of first and last resort for students and scholars alike

Routledge History of Philosophy Volume VIII Richard

Kearney,2003-12-23 Continental philosophy as it has emerged in the twentieth century is less a seamless fabric than a patchquilt of diverse strands Phenomenology hermeneutics existentialism structuralism critical theory deconstruction these are some of the salient movements which have developed in continental Europe between 1900 and the 1990 s though their influence is by no means confined to geographic location Continental thought has proved highly exportable circulating far beyond the frontiers of Europe to provoke strong responses in the intellectual world at large The fifteen articles in this volume outline and assess some of the issues and experiments of continental philosophy The first five span the twin movements of phenomenology and existentialism running from Husserl and Heidegger to Sartre Merleau Ponty and Levinas Subsequent essays deal with specific currents of continental thought in such areas as science Marxism linguistics politics aesthetics feminism and hermeneutics A final chapter on postmodernism highlights the manner in which so many concerns of continental thought culminate in a radical anti foundationalism This volume provides a broad scholarly introduction to this period for students of philosophy and related disciplines as well as some original interpretations of these authors It includes a glossary of technical terms and a chronological tube of philosophical scientific and other cultural events **Beyond Gated**

Politics Romand Coles, *Beyond Gated Politics* argues that the survival of democracy depends on recognizing the failings of disengaged liberal democracy and experimenting with more radical modes of democratic theory and action Romand Coles moves beyond the paradigms of political liberalism deliberative democracy and communitarian republicanism cultivating modes of public discourse that reflect and sustain the creative tension at the heart of democratic life and responsibility

Logics of Disintegration Peter Dews,2020-05-05 Over the last two decades contemporary French philosophy has exercised a powerful influence on intellectual life across both Europe and America Post structuralist strategies and concepts have played an important role in many forms of social cultural and aesthetic analysis particularly on the Left Despite the widespread reception however there has still been comparatively little analysis of the basic philosophical assumptions of post structuralism or of the compatibility of many of its central tenets with the progressive political orientations with which it is frequently associated In this book Peter Dews seeks to remedy this situation by setting post structuralist thought in relation to another more explicitly critical tradition in the philosophical analysis of modernity that of the Frankfurt School from Adorno to Habermas *Logics of Disintegration* will be of interest to readers across a wide range of disciplines from literary criticism to social theory which have felt the impact of post structuralism and to anyone who wishes to reach a balanced assessment of one of the most influential intellectual currents of our time *Merleau-Ponty's Philosophy* Lawrence

Hass,2008 A clear and comprehensive introduction to the thought of French philosopher Maurice Merleau Ponty **Genetic Codes of Culture?** William R. Schultz,2016-08-19 In this text first published in 1994 the author examines the interdisciplinary significance of the theory of science literature and philosophy according to the figures who achieved prominence in those fields Kuhn Bloom and Derrida Each scholar s theory is discussed in terms of its major concepts and the

book then relates their fields within the context of deconstruction's interdisciplinary movement. This title will be of interest to students of literature and philosophy. Jean-Luc Marion Dr Robyn Horner, 2013-05-28 Jean Luc Marion is one of the leading Catholic thinkers of our time, a formidable authority on Descartes and a major scholar in the philosophy of religion. This book presents a concise, accessible and engaging introduction to the theology of Jean Luc Marion. Described as one of the leading thinkers of his generation, Marion's take on the postmodern is richly enhanced by his expertise in patristic and mystical theology, phenomenology and modern philosophy. In this first introduction to Marion's thought, Robyn Horner provides the essential background to Marion's work as well as analysing the most significant themes for contemporary theology. This book serves as an ideal starting point for students of theology and philosophy as well as for those seeking to further their knowledge of cutting edge thinking in contemporary theology.

Europe, or The Infinite Task Rodolphe Gasché, 2008-12-22 What exactly does Europe mean for philosophy today? Putting aside both Eurocentrism and anti-Eurocentrism, Gasché returns to the old name Europe to examine it as a concept or idea in the work of four philosophers from the phenomenological tradition: Husserl, Heidegger, Patočka and Derrida. Beginning with Husserl, the idea of Europe became central to such issues as rationality, universality, openness to the other and responsibility. *Europe or The Infinite Task* tracks the changes these issues have undergone in phenomenology in order to investigate Europe's continuing potential for critical and enlightened resistance in a world that is progressively becoming dominated by the mono-perspectivism of global market economics. Rather than giving up on the idea of Europe as an anachronism, Gasché aims to show that it still has philosophical legs.

Contemporary Continental Philosophy Stuart Sim, 2017-08-03 This title was first published in 2000. Contemporary continental philosophy is a widely used but in many ways a highly problematic term and its exact frame of reference is not always clear. In its more recent French manifestations, in particular, it continues to arouse considerable controversy and create bitter divisions with particularly hostile reactions to the work of Derrida and others. Much work in the recent continental tradition can be fitted into a longer running philosophical tradition of scepticism and scepticism has always had the power to provoke and unsettle the philosophical establishment. Presenting an overview of the philosophical landscape of the continental tradition since the 1940s, this book traces the establishment of the new super-scepticism as an intellectual paradigm with the power to threaten and disorientate existing world views and more traditional styles of philosophical discourse, marking the continental divide. Exploring how contemporary continental philosophy from existentialism to postmodernism can be characterised as this new more resistant form of scepticism, Sim identifies a clutch of key themes including difference, the subject, antifoundationalism, dialectics which have been obsessively worked over by key thinkers in the Existentialist/Postmodernist period and demonstrates how these have contributed to the development of a super-sceptical outlook. Presenting a new theme-led approach to provide an entry into current debates in continental philosophy, Stuart Sim reintegrates the work of Sartre into the more recent continental tradition and suggests that something qualitatively different

is now occurring in French philosophy **Understanding Derrida, Understanding Modernism** Jean-Michel Rabaté, 2019-05-30 This volume makes a significant contribution to both the study of Derrida and of modernist studies The contributors argue first that deconstruction is not modern neither is it postmodern nor simply modernist They also posit that deconstruction is intimately connected with literature not because deconstruction would be a literary way of doing philosophy but because literature stands out as a modern notion The contributors investigate the nature and depth of Derrida's affinities with writers such as Joyce Kafka Antonin Artaud Georges Bataille Paul Celan Maurice Blanchot Theodor Adorno Samuel Beckett and Walter Benjamin among others With its strong connection between philosophy and literary modernism this highly original volume advances modernist literary study and the relationship of literature and philosophy New Yearbook for Phenomenology and Phenomenological Philosophy Burt Hopkins, John Drummond, 2020-11-25 The New Yearbook for Phenomenology and Phenomenological Philosophy provides an annual international forum for phenomenological research in the spirit of Husserl's groundbreaking work and the extension of this work by such figures as Scheler Heidegger Sartre Levinas Merleau Ponty and Gadamer **Theory and Practice** Jacques Derrida, 2019-01-31 Now in paperback nine lectures from Jacques Derrida that challenge the influential Marxist distinction between thinking and acting Theory and Practice is a series of nine lectures that Jacques Derrida delivered at the cole Normale Supérieure in 1976 and 1977 The topic of theory and practice was associated above all with Marxist discourse and particularly the influential interpretation of Marx by Louis Althusser Derrida's many questions to Althusser and other thinkers aim at unsettling the distinction between thinking and acting Derrida's investigations set out from Marx's Theses on Feuerbach in particular the eleventh thesis which has often been taken as a mantra for the end of philosophy to be brought about by Marxist practice Derrida argues however that Althusser has no such end in view and that his discourse remains resolutely philosophical even as it promotes the theory practice pair as primary values This seminar also draws fascinating connections between Marxist thought and Heidegger and features Derrida's signature reconsideration of the dichotomy between doing and thinking This text available for the first time in English shows that Derrida was doing important work on Marx long before Specters of Marx As with the other volumes in this series it gives readers an unparalleled glimpse into Derrida's thinking at its best spontaneous unpredictable and groundbreaking **The Philosophy of Husserl** Burt Hopkins, 2015-01-28 As the founder of phenomenology Edmund Husserl has been hugely influential in the development of contemporary continental philosophy In The Philosophy of Husserl Burt Hopkins shows that the unity of Husserl's philosophical enterprise is found in the investigation of the origins of cognition being meaning and ultimately philosophy itself Hopkins challenges the prevailing view that Husserl's late turn to history is inconsistent with his earlier attempts to establish phenomenology as a pure science and also the view of Heidegger and Derrida that the limits of transcendental phenomenology are historically driven by ancient Greek philosophy Part 1 presents Plato's written and unwritten theories of eid and Aristotle's criticism of both Part 2

traces Husserl's early investigations into the formation of mathematical and logical concepts and charts the critical necessity that leads from descriptive psychology to transcendently pure phenomenology Part 3 investigates the movement of Husserl's phenomenology of transcendental consciousness to that of monadological intersubjectivity Part 4 presents the final stage of the development of Husserl's thought which situates monadological intersubjectivity within the context of the historical a priori constitutive of all meaning Part 5 exposes the unwarranted historical presuppositions that guide Heidegger's fundamental ontological and Derrida's deconstructive criticisms of Husserl's transcendental phenomenology The Philosophy of Husserl will be required reading for all students of phenomenology
