Edsel Affair:

The Rest of the Edsel Affair C. Gayle Warnock, 2007 If someone had told me years ago that I was going to write a book I would have told them that they were crazy For years I've been writing down my deepest thoughts and emotions with absolutely no plans of exposing them to the public These writings act as short stories that chronicle my life's experiences These testimonies are emotional some of them are spiritual some of them funny some painful and some of them even deal with life's lessons that I had to struggle with on my own There would be times when my closest friends would share their secrets with me and because I felt deeply moved from what they shared I would put myself in their shoes and try to find a better way of resolving the issue Some of these encounters have even frustrated me so deeply that I would have absolutely no choice but to write them down just to get them off my chest My purpose is to inspire motivate and encourage those who want to make a difference or those who need another chance to make it right Every occurrence has allowed me to grow and be stretched in directions beyond explanation I enjoy writing poetry that every one can relate to These are more than just some words scribbled down on paper These are experiences and stories that I would like to share publicly I understand that any artistic expression may be subject to scrutiny This book is a reflection of me and anyone who can relate to it in some form or fashion It's for those who believe in the power of words and their ability to teach minister and heal **The Edsel Affair** C.

Gayle Warnock, 1980 Auto-Opium David Gartman, 2013-01-11 This much needed book is the first to provide a comprehensive history of the profession and aesthetics of American automobile design The author reveals how the appearance of the automobile was shaped by the social conflicts arising from America's mass production system He connects the social struggles of American society with the organizational struggles of designers to create symbol laden substitutes for the American dream Theoretically sophisticated lucid and compelling Auto Opium will appeal to all interested in the American obsession with the car **Auto Mania** Tom McCarthy, 2007-01-01 The twentieth century American experience with the automobile has much to tell us about the relationship between consumer capitalism and the environment Tom McCarthy contends In Auto Mania he presents the first environmental history of the automobile that shows how consumer desire and manufacturer decisions created impacts across the product lifecycle from raw material extraction to manufacturing to consumer use to disposal From the provocative public antics of young millionaires who owned the first cars early in the twentieth century to the SUV craze of the 1990s Auto Mania explores developments that touched the environment Along the way McCarthy examines how Henry Ford's fetish for waste reduction tempered the environmental impacts of Model T mass production how Elvis Presley's widely shared postwar desire for Cadillacs made matters worse how the 1970s energy crisis hurt small cars and why baby boomers ignored worries about global warming McCarthy shows that problems were recognized early The difficulty was addressing them a matter less of doing scientific research and educating the public than implementing solutions through America's market economy and democratic government Consumer and

producer interests have rarely aligned in helpful ways and automakers and consumers have made powerful opponents of regulation. The result has been a mixed record of environmental reform with troubling prospects for the future.

Innocents, Incidents, and Indiscretions C. Gayle Warnock, 1996 *The Challenge of Affluence* Avner

Offer, 2006-03-09 Since the 1940s Americans and Britons have experienced rising material abundance but also a range of social and personal disorders including family breakdown, obesity, and addiction. Drawing on the latest cognitive research, Avner Offer presents a detailed and reasoned critique of the modern consumer society. **From Family Firms to**

Corporate Capitalism Kristine Bruland, Patrick O'Brien, 1998 What explains the growth of a business and more broadly the development or decline of a whole economy? What role do particular entrepreneurs or indeed a culture of entrepreneurship play? Does the evidence suggest that a particular structure or organizational form was or should be adopted to ensure best practice and commercial success? These fundamental questions have long preoccupied business and economic historians. With the current expansion of business and management education and training, the investigations and findings of the historian may have wider significance and relevance. This volume has been stimulated by the work of Peter Mathias, one of the leading figures in this field in the post-war period. Here a number of his former students, many now internationally distinguished historians, pay tribute in a book that explores the move from family firms to corporate capitalism. In a series of chapters they explore at the level of the firm the myriad of micro decisions that ultimately help to explain the overall performance of industries, sectors, and national economies as they evolve through time. The contributors argue that sustained growth has never been a matter of a few spectacular technical breakthroughs. Instead, it rests on subtle economic and social transformations in cultures, in economic organizations, and in the roles of science and technology. Field & Stream, 1980-09 FIELD STREAM America's largest outdoor sports magazine celebrates the outdoor experience with great stories, compelling photography, and sound advice while honoring the traditions hunters and fishermen have passed down for generations.

Corporate Disasters: Gale, Cengage Learning, 2017-04-21 Corporate Disasters: What Went Wrong and Why profiles the biggest corporate mistakes or misdeeds throughout history, covering the people, the times, the decisions made. This volume covers Management and Leadership Failures. Each essay puts the business and its operators in the context of its own time, explaining the market, social, and technology forces at play, and each explores the key make-or-break decisions that led to disaster.

Great Brand Blunders Rob Gray, 2014-02-25 What causes some marketing campaigns to go spectacularly wrong? Why might new product launches, publicity stunts, or rebranding exercises be doomed to failure? How can you prevent a social media backlash spiralling out of control? When should you apologise, cut your losses, make a U-turn? Great Brand Blunders takes an informed and at times acerbic look at the worst marketing and social media disasters of all time and treats them as an amazing learning opportunity. The first book for several years to examine brand failures and the first with a special focus on social media, Great Brand Blunders offers a mix of entertaining commentary and authoritative advice and

features several first hand interviews with those involved A fascinating roll call of over 150 A list brands in sticky situations the book will be required reading not only for professional marketers academics and students but for anyone interested in the gritty stories and testing challenges that lie behind the polished brand images marketers hope to present to the public From awful advertising to ridiculous brand extensions via misguided sales promotions and ill conceived social media activity Great Brand Blunders pulls no punches putting rash decisions under the microscope and offering advice on how to avoid landing in the same foul mess yourself

The Other Fifties Joel Foreman, 1997 From the Edsel to Eisenhower from Mau Mau to Doris Day and from Ayn Rand to Elvis contributors to The Other Fifties topple the decade's already weakened image as a time of unprecedented peace prosperity and conformity Representing the fifties as a period of cultural

transformation contributors reveal the gradual unmaking of traditions and value systems that took place as American culture prepared itself for the more easily observed cultural turbulence of the 1960s Well known contributors demonstrate how television the novel the Hollywood movie the Broadway musical and rock and roll assaulted midcentury American attitudes toward sexuality race gender and class so altering public sensibilities that what was novel or shocking in the fifties seems tame or even downright difficult to grasp today They also rebut the widely held view that 1950s consumerism led to cultural homogeneity replacing this view with a picture of robust popular markets that defied conservative controls and actively subverted conventional norms and values Brushing away the haze of an era The Other Fifties will help readers understand the decade not as placid or repressed but as a time when emancipatory desires struggled to articulate themselves

American Automobile Advertising, 1930-1980 Heon Stevenson, 2008-11-24 This book provides a comprehensive history of American print automobile advertising over a half century span beginning with the entrenchment of the Big Three automakers during the Depression and concluding with the fuel crises of the 1970s and early 1980s Advances in general advertising layouts and graphics are discussed in Part One together with the ways in which styling mechanical improvements and convenience features were highlighted Part Two explores ads that were concerned less with the attributes of the cars themselves than with shaping the way consumers would perceive and identify with them Part Three addresses ads oriented toward the practical aspects of automobile ownership concluding with an account of how advertising responded to the advance of imported cars after World War II Illustrations include more than 250 automobile advertisements the majority of which have not been seen in print since their original publication The Fords Peter Collier, David Horowitz, 2021-01-19 In The Fords An American Epic Peter Collier and David Horowitz tell the riveting story of three generations of Fords a dramatic story of conflict between fathers and sons played out against the backdrop of America's greatest industrial empire The story begins with the first Henry Ford the mechanical wizard tinkerer and mad genius who drove the automobile into the heart of American life and conquered the world with it An American Original by the end of his life he had become an embittered crank who so possessively loved the company he built that when his son Edsel tried to change it to suit the changing times Henry destroyed him It was left to Edsel's son Henry II to avenge him and save the Ford Motor Company in the postwar world From the details of the first Henry's illicit affair and illegitimate son to the life and loves of Hank the Deuce and his celebrated feud with Lee Iacocca this is an engrossing account of a vital chapter in American history The authors have added new material to this classic work showing how Henry II's line lost out to the line of his brother William Clay Ford in the quest to control this most American of companies in the twenty first century In addition to The Fords Peter Collier and David Horowitz are the authors of dynastic biographies of the Kennedys Roosevelts Rockefellers and Fondas Divining Desire Liza Featherstone, 2018-02-15 Over the course of the last century the focus group has become an increasingly vital part of the way companies and politicians sell their products and policies Few areas of life from salad dressing to health care legislation to

our favorite TV shows have been left untouched by the questions put to controlled groups about what they do and don't like. *Divining Desire* is the first ever popular survey of this rich topic. In a lively sweeping history, Liza Featherstone traces the surprising roots of the focus group in early twentieth century European socialism, its subsequent use by the *Mad Men* of Madison Avenue and its widespread deployment today. She also explores such famous failures of the method as the doomed launch of the Ford Edsel with its vagina shaped radiator grille and the even more ill fated attempt to introduce a new flavor of Coca Cola which prompted street protests from devotees of the old formula. As elites have become increasingly detached from the general public, they rely ever more on focus groups, whether to win votes or to sell products. And in a society where many feel increasingly powerless, the focus group has at least offered the illusion that ordinary people will be listened to and that their opinions count. Yet it seems the more we are consulted, the less power we have. That paradox is particularly stark today when everyone can post an opinion on social media, our 24 hour focus group, yet only plutocrats can shape policy. In telling this fascinating story, Featherstone raises profound questions about democracy, desire and the innermost workings of consumer society.

Making and Selling Cars James M. Rubenstein, 2003-04-01 From the creation of fast food to the design of cities to the character of our landscape, the automobile has shaped nearly every aspect of modern American life. In fact, the U.S. motor vehicle industry is the largest manufacturing industry in the world. James Rubenstein documents the story of the automotive industry, which despite its power is an industry constantly struggling to redefine itself and assure its success. *Making and Selling Cars: Innovation and Change in the U.S. Automotive Industry* shows how this industry made adjustments and fostered innovations in both production and marketing in order to remain a viable force throughout the twentieth century. Rubenstein builds his study of the American auto industry with care, taking the reader through this quintessentially modern history of production and consumption. Avoiding jargon while never oversimplifying, Rubenstein gives a detailed and straightforward account of both the production and merchandising of cars. We learn how the industry began and about its methods for building cars and the modern American marketplace. Along the way, there were many missteps and challenges: the Edsel, the fuel crisis, and the ascendancy of Japanese cars in the 1980s. The industry met these types of problems with new techniques and approaches. To demonstrate this, Rubenstein gives the reader examples of how the auto industry used to work, which he alternates with chapters showing how the industry has reinvented itself. *Making and Selling Cars* explains why the U.S. automotive industry has been and remains a vigorous shaper of the American economy.
