Edthoughtswhat We Know About Math:

Mathematical Psychology Norbert Schwarzer, 2024-11-28 A drawback of standard approaches to try and understand the world of feelings such as love hate fear and anger plus consciousness via quantum concepts results from the old problem that Quantum Theory does not appear to be fully compatible with Einstein's General Theory of Relativity To overcome these difficulties we explicitly tried to avoid pushing any existing theory into the comprehension of the human mind and all its derivatives On the assumption that everything including consciousness may consist of attributes or properties and subjecting them to a general Hamilton extremal principle we surprisingly ended up in generalized Einstein field equations with the whole ensemble having the characteristics of a Quantum Gravity Theory The field of psychology has lacked a unified theory to support phenomenological observations until now and it took a mathematical physicist to find it With example concepts of group think and quantum gravity based human thought processes given among many more it provides a basis for understanding and mitigating and potentially even preventing socioeconomic debt cycles and war and it shows why love can become the black hole in a universe of feelings

Keith Laumer, 2016-02-29 When Marl Judson fleeing a rapacious government that wanted not just his fabulous wealth but his life crash landed on a uninhabited planet he thought he was marooned without hope of rescue so he prepared himself to live out his remaining years as best he could amidst the planet's weird hallucinogenic flora. But head twisting flowers which Judson learned to avoid were only part of the planet's weirdness it was possessed of some sort of field effect which made time play strange tricks temporal anomalies sometimes resulted in cause preceding effect and bizarre compressions and expansions of the normal pace of events. In such an environment time had no meaning. As Judson lived centuries alone or only decades or is it years. Or all of the above. He doesn't quite know but when another ship crashes the strange time effects allowed him to conduct an experiment aimed at producing a perfect society a veritable Judson's Eden. The Snake arrives in the form of the government that marooned him and the Snake wants Judson's Eden for itself. **The Road to Universal Logic** Arnold Koslow, Arthur Buchsbaum, 2014-10-10 This is the first volume of a collection of papers in honor of the fiftieth birthday of Jean Yves B ziau.
