America      **The Calling of Law** Fiona Westwood, Karen Barton, 2016-04-01 As one of the learned professions requiring advanced learning and high principles law enjoys a special standing in society In return for its status and rank the legal profession is expected to exhibit the highest levels of honesty trust and morality the very values which underpin the legal system itself This in turn entrusts to legal education a particular problem of addressing not only the substantive elements of the body of law but a means through which the characteristics of the calling of law are imparted and instilled At a time when the very essence of the legal profession is under threat this book calls for a realignment of the legal curriculum and pedagogies so as to emphasise the development of culture over industry character over eloquence and calling over skill Chapters are grouped around the core content and key themes of Curiosity Calling Character and Conscientiousness Contract and Culture The volume includes contributions from leading experts drawn internationally and from other professional disciplines in order to present alternative approaches aimed at tackling common issues providing insight and

provoking debate      **Australian Clinical Legal Education** Adrian Evans, Anna Cody, Anna Copeland, Jeff Giddings, Peter Joy, Mary Anne Noone, Simon Rice, 2017-02-17 Clinical legal education CLE is potentially the major disruptor of traditional law schools core functions Good CLE challenges many central clichés of conventional learning in law everything from case book method to the 50 minute lecture And it can challenge a contemporary overemphasis on screen based learning particularly when those screens only provide information and require no interaction Australian Clinical Legal Education comes out of a thorough research program and offers the essential guidebook for anyone seeking to design and redesign accountable legal education that is education that does not just transform the learner but also inculcates in future lawyers a compassion for and service of those whom the law ought to serve Established law teachers will come to grips with the power of clinical method Law students struggling with overly dry conceptual content will experience the connections between skills the law and real life Regulators will look again at law curricula and ask law deans when      *The Global Clinical Movement* Frank S. Bloch, 2011 Clinical legal education is playing an increasingly important role in educating lawyers worldwide In *The Global Clinical Movement Educating Lawyers for Social Justice* editor Frank S Bloch and contributors describe the central concepts goals and methods of clinical legal education from a global perspective with a particular emphasis on its social justice mission With chapters written by leading clinical legal educators from every region of the world *The Global Clinical Movement* demonstrates how the emerging global clinical movement can advance social justice through legal education Professor Bloch and the contributors also examine the influence of clinical legal education on the legal academy and the legal profession and chart the global clinical movement's future role in educating lawyers for social justice *The Global Clinical Movement* consists of three parts Part I describes clinical legal education programs from every region of the world and discusses those qualities that are unique to a particular country or region Part II discusses the various ways that clinical programs and the clinical methodology advance the cause of social justice around the world Part III analyzes the current state of the global clinical movement and sets out an agenda for the movement to advance social justice through socially relevant legal education      **The Ethics Project in Legal Education** Michael Robertson, Lillian Corbin, Kieran Tranter, Francesca Bartlett, 2010-10-06 The contributions in this volume suggest that the ethics project in legal education is increasingly an international one Even though the strength of commitment by both the profession and the legal academy to ethics learning within law schools varies two fundamental questions confront all who work in this area First what is it that we want our students to learn or perhaps in what manner do we want our students to develop from the teaching of legal ethics Second how can we create a learning environment that will encourage the nature and quality of learning we think is important All the contributors to this volume take a strong stand on the importance of ethical legal practice and the role of law schools in developing students capacities in this area They share a belief in the essential need to encourage law students to engage with the moral dimensions of legal practice The questions that these scholars grapple with are therefore not of the
