Education 225 Diversity In Education:

Encyclopedia of Diversity in Education James A. Banks, 2012-05-17 The diversity education literature both nationally and internationally is broad and diffuse. Consequently, there needs to be a systematic and logical way to organize and present the state of research for students and professionals. American citizens need to understand the dynamics of their increasingly diverse communities and institutions and the global world in which we live, work and lead. With continually evolving information on diversity policies, practices and programs, it is important to have one place where students, scholars, teachers and policymakers can examine and explore research, policy and practice issues and find answers to important questions about how diversity in U.S. education is enriched with theories, research and practices in other nations. Explained and communicated, and how they affect institutional change at both the K-12 and postsecondary levels. With about 700 signed entries with cross references and recommended readings, the *Encyclopedia of Diversity in Education* (4 volumes in both print and electronic formats) will present research and statistics, case studies and best practices, policies and programs at pre and postsecondary levels. Diversity is a worldwide phenomenon, and while most of the entries in the *Encyclopedia* will focus on the United States, diversity issues and developments in nations around the world, including the United States, are intricately connected. Consequently, to illuminate the many aspects of diversity, this volume will contain entries from different nations in the world in order to illuminate the myriad aspects of diversity. From A to Z, this *Encyclopedia* will cover the full spectrum of diversity issues, including race, class, gender, religion, language, exceptionality, and the global dimensions of diversity as they relate to education. This four-volume reference work will be the definitive reference for diversity issues in education in the United States and the world.

Education, Law and Diversity Neville Harris, 2020-01-09 This new edition of *Education, Law and Diversity* provides extensive updated analysis from a legal perspective of how the education system responds to social diversity and how the relevant social and cultural rights of individuals and groups are affected. It spans wide-ranging areas of school provision, including types of school, including faith schools, the school curriculum, choice of school, out of school settings and duties towards children with special needs and disabilities. It gives extensive coverage to children's rights in the context of education and includes considerable new material on issues including relationships and sex education, exclusion from school, home education, equal access, counter extremism and academisation. The new edition also retains and updates areas of debate in the book, such as those concerned with multiculturalism and the position of religion in schools. It continues to focus on England but also makes reference to other jurisdictions within the UK and internationally. It is essential reading for anyone interested in the legal and related policy issues surrounding children's education today.

Education, Religion and Diversity L. Philip Barnes, 2014-02-05 In this thoughtful and provocative book, Philip Barnes challenges religious educators to re-think their field and proposes a new post-liberal model of religious education to help them do so. His model both confronts prejudice and intolerance and also allows the voices of different religions to be heard and critically explored.

While *Education Religion and Diversity* is directed to a British audience the issues it raises and the alternative it proposes are important for those educators in the United States who believe that the public schools have an important role in teaching students about religion. Walter Feinberg, Professor Emeritus of Education Policy Organization and Leadership at the University of Illinois Urbana Champaign, Philip Barnes offers a penetrating and lucid analysis of the strengths and weaknesses of modern religious education in Britain. He considers a range of epistemological and methodological issues and identifies two contrasting models of religious education that have been influential: what he calls a liberal and a postmodern model. After a detailed review and criticism of both, he outlines his own new post liberal model of religious education, one that is compatible with both confessional and non confessional forms of religious education yet takes religious diversity and religious truth claims seriously. Essential reading for all religious educators and those concerned with the role of religion in schools.

Bernd Schröder, Professor of Practical Theology and Religious Education, University of Göttingen: What place if any does religious education have in the schools of an increasingly diverse society? This lucid and authoritative book makes an incisive contribution to this crucial debate.

Roger Trigg is Emeritus Professor of Philosophy, University of Warwick and Senior Research Fellow, Ian Ramsey Centre, Oxford. The challenge of diversity is central to education in modern liberal democratic states and religious education is often the point where these differences become both most acute and where it is believed of all curriculum subjects, resolutions are most likely to be found. *Education Religion and Diversity* identifies and explores the commitments and convictions that have guided post confessional religious education and concludes controversially that the subject as currently theorised and practised is incapable of challenging religious intolerance and of developing respectful relationships between people from different communities and groups within society. It is argued that despite the rhetoric of success, which religious education is obliged to rehearse in order to perpetuate its status in the curriculum and to ensure political support, a fundamentally new model of religious education is required to meet the challenge of diversity to education and to society. A new framework for religious education is developed which offers the potential for the subject to make a genuine contribution to the creation of a responsible, respectful society.

Education Religion and Diversity is a wide ranging provocative exploration of religious education in modern liberal democracies. It is essential reading for those concerned with the role of religion in education and for religious and theological educators who want to think critically about the aims and character of religious education.
