Education And Inequality:

Inequality in Education Donald B. Holsinger, W. James Jacob, 2009-05-29 *Inequality in Education Comparative and International Perspectives* is a compilation of conceptual chapters and national case studies that includes a series of methods for measuring education inequalities. The book provides up to date scholarly research on global trends in the distribution of formal schooling in national populations. It also offers a strategic comparative and international education policy statement on recent shifts in education inequality and new approaches to explore, develop and improve comparative education and policy research globally. Contributing authors examine how education as a process interacts with government finance policy to form patterns of access to education services. In addition to case perspectives from 18 countries across six geographic regions, the volume includes six conceptual chapters on topics that influence education inequality such as gender, disability, language and economics, and a summary chapter that presents new evidence on the pernicious consequences of inequality in the distribution of education. The book offers 1 a better and more holistic understanding of ways to measure education inequalities and 2 strategies for facing the challenge of inequality in education in the processes of policy formation, planning and implementation at the local, regional, national and global levels. *International Studies in Educational Inequality, Theory and Policy* Richard Teese, Stephen Lamb, Marie Duru-Bellat, 2007-06-03 Inequality is a marked and persistent feature of education systems both in the developed and the developing worlds. Major gaps in opportunity and in outcomes have become more critical than in the past thanks to the knowledge economy and globalization. The pursuit of equity as a goal of public policy is examined in this book through a series of national case studies. The book covers many different global contexts from the wealthiest to some of the poorest nations on earth. It therefore offers a broad range of different theoretical and methodological approaches and brings together extensive international experience in equity policy. Educational Inequalities Kalwant Bhopal, Uvanney Maylor, 2013-11-07 While there is considerable literature on social inequality and education, there is little recent work which explores notions of difference and diversity in relation to race, class and gender. This edited text aims to bring together researchers in the field of education located across many international contexts such as the UK, Australia, USA, New Zealand and Europe. Contributors investigate the ways in which dominant perspectives on difference, intersectionality and institutional structures underpin and reinforce educational inequality in schools and higher education. They emphasize the importance of international perspectives and innovative methodological approaches to examining these areas and seek to locate the dimensions of difference within recent theoretical discourses with an emphasis on race, class and gender as key categories of analysis. *High Stakes Education* Pauline Lipman, 2004 What are the implications of education accountability reforms, particularly in urban schools, in a political, economic and cultural context of intensifying globalization and increasing social inequality and marginalization along lines of race and class? *High Stakes Education* provides a cogent and critical examination of such questions, investigating concretely the political economy

of neoliberal education reforms and the cultural politics of race Using Chicago a standard bearer for high stakes testing and centralized regulation of schools as a case study noted scholar Pauline Lipman argues there is a strategic relationship between these policies and processes of economic restructuring racialized social control and globalization *Growing Gaps* Paul A. Attewell, Katherine S. Newman, 2010-11-05 Outlining the world wide race for educational advantage this book takes a comparative approach Covering almost every continent this book provides an overarching examination of who is actually able to benefit from economic growth and who because of the educational demands it brings about it shuts out Education, Inequality and Social Class Ron Thompson, 2019-02-25 Education Inequality and Social Class provides a comprehensive discussion of the empirical evidence for persistent inequality in educational attainment It explores the most important theoretical perspectives that have been developed to understand class based inequality and frame further research With clear explanations of essential concepts this book draws on empirical data from the UK and other countries to illustrate the nature and scale of inequalities according to social background discussing the interactions of class based inequalities with those according to race and gender The book relates aspects of inequality to the features of educational systems showing how policy choices impact on the life chances of children from different class backgrounds The relationship between education and social mobility is also explored using the concepts of social closure positionality and social congestion The book also provides detailed discussions of the work of Pierre Bourdieu and Basil Bernstein two important theorists whose contributions have generated thriving research traditions much used in contemporary educational research Education Inequality and Social Class will be essential reading for postgraduate and advanced undergraduate students engaged in the study of education childhood studies and sociology It will also be of great interest to academics researchers and teachers in training

Social Class and Educational Inequality Iram Siraj, Aziza Mayo, 2014-06-05 Social class is often seen as an intractable barrier to success yet a number of children from disadvantaged backgrounds still manage to show resilience and succeed against the odds This book presents the findings from fifty Child and Family Case Studies CFCS conducted with 13 16 year olds The authors look specifically at the roles that people and experiences at home in schools and in the wider community have played in the learning life courses of these children how these factors have affected their achievement and explanations and meanings given by respondents to the unique characteristics experiences and events in their lives Featuring the voices of real parents and children and backed up by a decade of quantitative data this is a compelling record that will help readers to understand the complex nature of social disadvantage and the interplay between risk and protective factors in homes and schools that can make for a transformational educational experience **Measuring Education Inequality in Developing Countries** Nichole Torpey-Saboe, 2018-06-19 This book constructs a measure of education inequality using time series cross national data and utilizes real world examples based on author interviews It provides insights into how classic trade theory might be applied more broadly to generate expectations not only about income

distribution but also about investment in human capital The project explores the ways in which global trends toward urbanization and democratization might be expected to impact education inequality The author addresses contemporary issues in politics such as growing income inequality the backlash against globalization and free trade and concerns that democratic institutions are elite dominated and unresponsive to the needs of common citizens Educational Inequality Feyisa Demie,2019 What if disadvantage need not correlate with poor academic achievement If instead of researching the underachieving groups minorities children for whom English is not their home language and children of families in poor socioeconomic circumstances you look at what works in schools to raise the attainment of all these groups the results are compelling This inspiring book is grounded in Feyisa Demie s meticulous research and analysis of the high expectations and targeted interventions by schools in one poor inner city local authority LA Schools once in special measures are transformed to Outstanding by gifted leadership effective teachers who mirror the school s intake and a governing body and community of parents all working towards the same goals This LA s schools raise their children s attainment at Key Stage 2 and GCSE to levels that far surpass the national average and allow students to access top universities Back cover **Educational Inequality and School Finance** Bruce D. Baker,2018 In *Educational Inequality and School Finance* Bruce Baker a scholar of education finance and the economics of education offers a comprehensive examination of how U S public schools receive and spend money **The Sociology of Educational Inequality** William Tyler,2011-12-08 What is the most significant factor for explaining why some individuals are more successful than others genetic inheritance privileged background or luck Although conventional approaches stress the prime importance of one of these Tyler argues that such theories fail to deal adequately with the complexity of educational inequality and suggests that Boudon s model of opportunity and mobility would provide us with a more productive explanation By applying this model to post war British education he shows how we might effectively think our approaches to the cycle of deprivation comprehensive reform and educational spending *History of Inequalities in American Education* Marta Zapala-Kraj,2015-02-15 Research Paper from the year 2015 in the subject Pedagogy History of Pedagogy grade 5 0 language English abstract Education affects every part of our lives For the majority of people education level determines income level place in the class system and even health Without quality education in ones youth he or she is quickly at a severe disadvantage then a peer who receives one In doing this research the author of this thesis has found the most important obstacles in the history of American education in order to present what factors led to such a situation in American schools the author decided to divide the paper in three following parts each discussing different aspect of inequalities found in educational history The problems of education inequality are deeply rooted throughout American history In the South segregation was upheld in the Supreme Court in the Plessy vs Ferguson Case in 1896 which mandated that schools be segregated into black and white What is more the educational inequalities reach out even deeper not only did race and skin color made difference in accesss to knowledge The sex played also a vital role in it

The history of American education is written down by the numerous minor cases of women who were forbidden to learn just because they were not born men *Law & Education Inequality* Susan C. Bon, Jeffrey C. Sun, 2015-07-01 Over the past decade No Child Left Behind Common Core Race to the Top data mining initiatives Title IX gender equity Individuals with Disabilities Education Act Americans with Disabilities Act and executive actions on immigration illustrate key federal initiatives that have redefined standards priorities and practices within educational institutions Similarly state policies in terms of school funding school choice teacher qualifications student bullying and other measures have added another layer of complexity to the education law and policy dialogue particularly when addressing matters of education inequality These emergent policies beget the question how have these policies contributed to easing the effects of educational inequality The purpose of this book is to examine the role of law as potentially countering or impeding desirable education reforms and it calls on readers to consider how policymakers lawyers social scientists and educators might best alter the course in an effort to advance a more just and less unequal educational system *Dismantling Educational Inequality* Pedro R. Portes, 2005 This long awaited solution oriented book helps readers understand how inequality is organized in our public educational system A four component developmental model provides a policy oriented framework that takes into account how children are socialized in and out of schools Given an educational system that produces unequal opportunities for student learning closing the gap requires thinking out of a box and the current conglomeration of social and economic policies A multi level strategy that aims for all to be educated at grade level through a coordinated national strategy is presented to eliminate educational inequality This is a must read controversial book that offers educators and policy makers a fundamental understanding of how the achievement gap can be eliminated at the population level **Education, Inequality, and National Policy** Nelson F. Ashline, Thomas R. Pezzullo, Charles I. Norris, 1976 **Cracks in the Schoolyard—Confronting Latino Educational Inequality** Gilberto Q. Conchas, 2015-11-13 In *Cracks in the Schoolyard* Conchas challenges deficit models of schooling and turns school failure on its head Going beyond presenting critical case studies of social inequality and education this book features achievement cases that depict Latinos as active actors not hopeless victims in the quest for social and economic mobility Chapters examine the ways in which college students high school youth English language learners immigrant Latino parents queer homeless youth the children of Mexican undocumented immigrants and undocumented immigrant youth all work in local settings to improve their quality of life and advocate for their families and communities Taken together these counternarratives will help educators and policymakers fill the cracks in the schoolyard that often create disparity and failure for youth and young adults Contributors Nancy Acevedo Gil Alejandra S Albarran Edeline M Burciaga Leo R Chavez Gilberto Q Conchas Isiaah Crawford Cindy Cruz Briana M Hinga Eduardo Mosqueda Leticia Oseguera Louie F Rodriguez Kip T Ilez and Irene I Vega Conchas provocative and compelling case studies in education position him once again as a leading voice in challenging commonsense notions of Latino school failure Kris D Guti

rrez professor of Education University of California Berkeley Conchas has provided readers with an important gift authentic stories authentic struggles authentic strategies and authentic success This work debunks the deficit discourse around Latina o education with a complex analysis of how race community strengths and identity become assets for educational excellence The cases presented are rich powerful compelling and inspiring Essential reading for social justice advocates Tyrone Howard professor of Education at the University of California Los Angeles and author of *Why Race and Culture in Matters in Schools* In this groundbreaking volume Conchas ushers in a new paradigm for understanding Latina o student achievement The authors in this volume collaboratively and compellingly demonstrate the importance of understanding Latina o educational achievement by analyzing assets and agency in the lives of youths and their families This volume provides educators policymakers and scholars the critical hope and pragmatic agenda for developing a more just educational system the authors cogently teach us to identify and understand the plethora of contributions that Latina o students make to our educational system on a day to day basis Victor M Rios professor of Sociology and author of *Punished*

Constructing Educational Inequality Peter Foster, Roger Gomm, Martyn Hammersley, 2005-06-21 The issue of educational opportunity has long been of public concern and a major focus for educational research As a result there is now a substantial body of research findings in this field both quantitative and qualitative This work relates to various levels of the educational system and to different categories of student but particularly social class gender ethnicity and race The central trend has been to find persisting inequalities despite reform at system institutional and classroom levels Furthermore the educational system is frequently portrayed as playing a key role in reproducing wider social and economic inequalities This book examines the status of educational inequality as a social problem explores the conceptual issues surrounding it assesses a representative sample of recent research and seeks to clarify the relevant methodological ground rules thereby laying the basis for future research in the field

Socioeconomic Inequality and Educational Outcomes Markus Broer, Yifan Bai, Frank Fonseca, 2019-05-15 This open access book focuses on trends in educational inequality using twenty years of grade 8 student data collected from 13 education systems by the IEA s Trends in Mathematics and Science Study TIMSS between 1995 and 2015 While the overall positive association between family socioeconomic status SES and student achievement is well documented in the literature the magnitude of this relationship is contingent on social contexts and is expected to vary by education system Research on how such associations differ across societies and how the strength of these relationships has changed over time is limited This study therefore addresses an important research and policy question by examining changes in the inequality of educational outcomes due to SES over this 20 year period and also examines the extent to which the performance of students from disadvantaged backgrounds has improved over time in each education system Education systems generally aim to narrow the achievement gap between low and high SES students and to improve the performance of disadvantaged students However the lack of quantifiable and comprehensible measures makes it difficult to assess and monitor the effect of such

efforts In this study a novel measure of SES that is consistent across all TIMSS cycles allows students to be categorized into different socioeconomic groups This measure of SES may also contribute to future research using TIMSS trend data Readers will gain new insight into how educational inequality has changed in the education systems studied and how such change may relate to the more complex picture of macroeconomic changes in those societies

The Working Classes and Higher Education Amy E. Stich, Carrie Freie, 2015-12-22 Within the broader context of the global knowledge economy wherein the college for all discourse grows more and more pervasive and systems of higher education become increasingly stratified by social class important and timely questions emerge regarding the future social location and mobility of the working classes Though the working classes look very different from the working classes of previous generations the weight of a universal working class identity background amounts to much of the same economic vulnerability and negative cultural stereotypes all of which continue to present obstacles for new generations of working class youth many of whom pursue higher education as a necessity rather than a choice Using a sociological lens contributors examine the complicated relationship between the working classes and higher education through students distinct experiences challenges and triumphs during three moments on a transitional continuum the transition from secondary to higher education experiences within higher education and the transition from higher education to the workforce In doing so this volume challenges the popular notion of higher education as a means to equality of opportunity and social mobility for working class students

Quality and Inequality of Education Jaap Dronkers, 2010-07-03 This cogent analysis of data on education and society from a variety of sources sets out to provide answers to scientific and policy questions on the quality of education and the way it relates to various forms of inequality in modern societies particularly in Europe The authors examine not only the well known cross national PISA datasets but also the European Social Survey and TIMSS going further than many researchers by folding into their analyses economic legal and historical factors Most research up to now using the PISA data is restricted to educational research Interesting as that educational question is the chapters here use the PISA and other data to explore more profoundly the relationship between education and the various forms of inequality in European and other modern societies The work comes from two different perspectives one that looks at how the different characteristics of societies their economies and their educational systems influence the average educational achievements of specific groups of pupils such as immigrants in those societies and a second which explores how and in what degree the characteristics of schools educational systems and labour markets either hardens or softens differences in the educational outcomes of various groups of pupils With a special feature of the book being its emphasis on comparing Asian and European countries and with the content free of the political constraints that can often attend studies of these datasets this book will be an vital resource for educationalists and policy makers alike
