**Education in Texas** Charles W. Funkhouser, 1996      **Education in Texas** Charles W. Funkhouser, 1983      *The Patchwork of World History in Texas High Schools* Stephen Jackson, 2022-11-30 This book traces the historical development of the World History course as it has been taught in high school classrooms in Texas a populous and nationally influential state over the last hundred years Arguing that the course is a result of a patchwork of competing groups and ideas that have intersected over the past century with each new framework patched over but never completely erased or replaced the author crucially examines themes of imperialism Eurocentrism and nationalism in both textbooks and the curriculum more broadly The first part of the book presents an overview of the World History course supported by numerical analysis of textbook content and public documents while the second focuses on the depiction of non Western peoples and persistent narratives of Eurocentrism and nationalism It ultimately offers that a more global accurate and balanced curriculum is possible despite the tension between the ideas of professional world historians who often de center the nation state in their quest for a truly global approach to the subject and the historical core rationale of state sponsored education in the United States to produce loyal citizens Offering a new conceptual understanding of how colonial themes in World History curriculum have been dealt with in the past and are now engaged with in contemporary times it provides essential context for scholars and educators with interests in the history of education curriculum studies and the teaching of World History in the United States

**Transforming the School-to-Prison Pipeline** Debra M Pane, Tonette S Rocco, 2014-02-05 Revolution not reform is required to release the power of teaching Virtually all teachers possess tremendous power which can be released given the proper exposure We can't get to that point by tinkering with a broken system We must change our intellectual structures definitions and assumptions then we can release teacher power Hilliard 1997 This book was written during a time of growing upheaval and disagreement about how America should educate its students particularly those who are poor diverse and failing school Dominant educational research newspapers and popular movies such as Waiting for Superman continually fuel public debates about whether our 21st century schools provide justice for all decrease the achievement gap and leave no child behind However even though one of teachers greatest concerns and why many leave the profession classroom discipline is rarely brought to the forefront of discussion As a result public discourse does not get into what actually happens during disciplinary moments that ultimately leads to the disproportional tracking of particular students into exclusionary school disciplinary consequences which funnels an underclass of students into the school to prison pipeline This book is a scholarly study presented here as a readable story and practical guide for walking teachers administrators and teacher education programs through the process of transforming traditional ways of thinking about classroom discipline and teaching in order to create student centered creative non punitive classrooms that authentically engage the most alienated and oppressed students in our schools and society

**Educational Psychology**, 1996 *Politics, Language, and Culture* Joseph W. Check, 2002-10-30 Politics language and culture are three of the most

powerful forces affecting education today yet they have been little discussed in relation to systemic school reform the new status quo of urban schools This book looks at their effects through the eyes of teachers administrators and insider outsiders who are actually living reform at the school level in four widely different urban school systems Chicago San Francisco and Oakland California and Boston The book also creates a statistical and conceptual picture of urban education and school reform as national phenomena with deep historical roots and offers a composite case study of an urban elementary school undergoing reform The author argues that urban school reform is failing because its basic strategy is misguided and because reform thinking has consciously ignored three essential sources of knowledge about school change Strategically efforts for reform have relied heavily on the widespread replication of nationally promoted exemplary programs This approach assumes that local schools lack the knowledge and will to solve their own problems and require prescriptive intervention from national models In fact the exemplary programs approach has yielded very limited success What is needed instead is the creation and long term support of unique local exemplary contexts that combine best practice approaches with local knowledge conditions and resources
