Critical Perspectives in Canadian Music Education Carol A. Beynon,Kari K. Veblen,2012-09-01 Music education in Canada is a vast enterprise that encompasses teaching and learning in thousands of public and private schools community groups and colleges and universities It involves participants from infancy to the elderly in formal and informal settings Nevertheless as post secondary faculties of music and programs are growing significantly academic books and materials grounded in a Canadian perspective are scarce This book attempts to fill that need by offering a collection of essays that look critically at various global issues in music education from a Canadian perspective Topics range from a discussion of the roots of music education in Canada and analysis of music education practices across the country to perspectives on popular music distance education technology gender globalization Indigenous traditions and community music in music education Foreword by composer R Murray Schafer *Greek and Roman Education* Mark Joyal,J.C Yardley,Iain McDougall,2022-01-31 Modern western education finds its origins in the practices systems and schools of the ancient Greeks and Romans It is in the field of education in fact that classical antiquity has exerted one of its clearest influences on the modern world Yet the story of Greek and Roman education extending from the eighth century B C into the Middle Ages is familiar in its details only to relatively few specialists Containing nearly 300 translated texts and documents *Greek and Roman Education A Sourcebook* is the first book to provide readers with a large diverse and representative sample of the primary evidence for ancient Greek and Roman education A special feature of this Sourcebook is the inclusion not only of the fundamental texts for the study of the subject but also unfamiliar sources that are of great interest but are not easily accessible including inscriptions on stone and Greek papyri from Egypt Introductions to each chapter and to each selection provide the guidance which readers need to set the historical periods themes and topics into meaningful contexts Fully illustrated and including extensive suggestions for further reading together with an index of passages explored students will have no further need for any other sourcebook on Greek and Roman education **Cultural Policy** Diane St-Pierre,Monica Gattinger,2021-03-30 How do Canadian provincial and territorial governments intervene in the cultural and artistic lives of their citizens What changes and influences shaped the origin of these policies and their implementation On what foundations were policies based and on what foundations are they based today How have governments defined the concepts of culture and of cultural policy over time What are the objectives and outcomes of their policies and what instruments do they use to pursue them Answers to these questions are multiple and complex partly as a result of the unique historical context of each province and territory and partly because of the various

objectives of successive governments and the values and identities of their citizens Cultural Policy Origins Evolution and Implementation in Canada's Provinces and Territories offers a comprehensive history of subnational cultural policies including the institutionalization and instrumentalization of culture by provincial and territorial governments government cultural objectives and outcomes the role of departments Crown corporations other government organizations and major public institutions in the cultural domain and the development dissemination and impact of subnational cultural policy interventions Published in English

Why Public Schools? Jenice L. View, Daniel A. Laitsch, Penelope M. Earley, 2013-03-01 What is the purpose of public education What is the value of taxpayer supported public schools Who is invited to answer these questions Except among policymakers few publicly answer or debate these questions Instead the neoliberal forces of competition and deregulation seem to be driving education decision making The formal education system is seen as a tool for personal and national economic growth Much of the education policy debate is centered on how to attain academic success as measured by standardized high stakes tests and evaluations But how to educate children and youth is a second order question The first question must be what is the purpose of schooling and is it limited to the presumed answer that it is to prepare workers so our nations can sustain economic superiority Students parents teachers business people artists retirees First Nations people military veterans and religious professionals are not typically invited to answer these questions despite their stake in educational outcomes Twenty four such people including professional educational policy makers and scholars offer their thoughts in these essays from the

US and Canada The intended audience for this volume includes all who are concerned with the future of public schools in both nations Canada Patrick C.
