Kazamias,1969 **Education and the Quest for Modernity in Turkey** Eustace Anthony Evans,1966 **Education and the Quest for Modernity in Turkey, By Andreas M. Kazamias** Andreas M. Kazamias,1969 *The Modernization of Public Education in the Ottoman Empire 1839-1908* Selçuk Aksin Somel,2021-12-28 The aim of the Ottoman educational reforms was to raise a class of educated bureaucrats as a means of administrative centralization and a design to inculcate authoritarian and religious values among the population for the legitimization of state authority This study which deals with the modernization of Ottoman public education during the period of reform is based on sources such as Ottoman archives published documents textbooks and memoirs It discusses the main factors that led to Ottoman educational reforms The topics in this volume include the expansion of provincial education financial policies curricular issues the educational ideology of the Tanzimat 1839 1876 and the Hamidian periods 1878 1908 ethnic groups in the Balkans Anatolia and Arabia and the process of socialization The book particularly addresses those readers interested in the educational social and administrative history of the late Ottoman period **Education in Turkey** Arnd-Michael Nohl,Arzu Akkoyunlu-Wigley,Simon Wigley,2008 This book represents a major study of the development and present state of education in Turkey Turkey offers a unique context for studying education because of the tensions that exist between secularization and Islam top down social engineering and democratization and economic growth and social justice Education in Turkey brings together some of the leading educationalists in Turkey as well as a number of scholars from other disciplines The topics covered include the development and structure of primary secondary vocational and adult education the role of education in shaping citizenship and national identity human capital economic growth and educational inequalities This significant volume will be of particular interest to policy makers as well as researchers and students in education economics politics and Turkish studies **Atatürk and the Modernization of Turkey** Jacob Landau,2023-10-09 *International Handbook of Urban Education* William T. Pink,George W. Noblit,2008-09-03 It is evident that urban education has become the central focus of educators at the present time In the U S for example almost one third of all school age children attend schools in large urban school districts It is in these urban schools where the diversity of cultures and languages is highest and where student learning is most problematic What has emerged from recent work to improve urban schools is the insight that there is no one size fits all panacea Rather we have discovered that the local context shapes in critically important ways what will be effective at the school level The universality of the problematics with urban education together with the importance of understanding the local or situated context of improvement interventions brings into sharp focus the importance and timeliness of an undertaking like the International Handbook of Urban Education An important focus of the International Handbook of Urban Education will be the interrogation of both the social and political factors that lead to different problem posing and subsequent solutions within each region An important

question to be answered for example is what it takes in terms of resources political will and policy actions to improve urban education

The Politics of Education in Turkey Zühre Emanet,2023-06-15 Control over education has been a keenly contested area since the Justice and Development Party AKP came to power in Turkey Central to this contest has been the question of whose values would be passed down to future generations with the inculcation of gender segregation in primary schools a key marker in ongoing cultural battles over Turkey's secularist founding principles and the growing dominance of Islamist political movements This book offers an in depth analysis of gender inequality in action in the Turkish schooling system by examining changes in education provision and culture in the years since 2012 Based on two school ethnographies conducted in an AKP dominated district of Istanbul where the author worked as a teacher and researcher it examines neoliberal education policies and their co option by the AKP and other Islamist movements to promote their own agendas while also considering the effects of the struggle between rival Islamist groups Grounding its theoretical approach with empirical evidence of ideology in action it provides an important analysis of the way in which boys and girls are socialized in Turkey's public schooling system

Dewey, Education, and the Mediterranean ,2022-10-24 There are few if any other educational philosophers that have left their mark internationally as John Dewey has Author of 40 books and no less than 700 articles that appeared in over 140 journals Dewey's work has been translated into at least 35 languages His landmark Democracy and Education published over a century ago in 1916 is one of the most cited educational texts ever Dewey has inspired educators and provoked controversies in his day and still does so today This volume sets out to engage with Dewey's educational thought especially as it relates to its circulation in the countries bordering on the Mediterranean Authors consider his enduring influence and reflect on the push and pull forces that served to anchor progressivism in its multiple manifestations in the region The notion of a unidirectional force personified by Dewey that is somehow absorbed by the receiving country is

problematised by most if not all chapters in this volume Rather contributors carefully show how context affects a process marked by active appropriation re interpretation adaptation as well as resistance Sometimes a vibrant presence that still needs to be reckoned with at other times a ghostly figure nevertheless serving to sustain democratic aspirations in and through education Dewey and his message resonate challenge and demand a response

Internationalism and the New Turkey Erik Sjöberg, 2022-07-06 This book examines international education in Turkey after World War I In this period a movement for peace and international education among American educators emerged This effort however had to be reconciled with the nationalist projects of new nation states emerging from the war In the case of the Near East that meant coming to terms with the radically nationalist modernization project of Kemal Atatürk's Turkish Republic Using the case of Robert College an American educational institution in Istanbul which aimed to foster a future local elite of a multi ethnic and multi religious student body the book sheds light on the negotiation between two conceptions of modernity as represented by American internationalist ideals and the tenets of Kemalism the Westernizing yet deeply ethnocentric national ideology of post 1923 Turkey Based on recently declassified archival sources this study addresses the educational intentions and strategies for adjustment of college faculty It also offers a rare insight into the mindset of young students attempting to make sense of what internationalism and religious ethnic and national identity meant in the Ottoman past and in the new republican Turkey Focusing on Robert College and the forgotten case of its dean and social studies instructor Dr Edgar Jacob Fisher it addresses the little researched field of internationalism and peace education in interwar Turkey

Pedagogies and Curriculums to (Re)imagine Public Education Encarna Rodríguez, 2015-06-04 This book discusses current market based educational discourses and how they have undermined the notion of the public in public education by allowing private visions of education to define the public democratic imagination Against this discouraging background this text embraces Freire's understanding of hope as an ontological need and calls for finding new public grounds for our public imagination It further articulates Freire's mandate to unveil historically concrete practices to sustain democratic educational visions no matter how difficult this task may be by 1 presenting an in-depth description of the pedagogies and curriculums of eleven schools across historical and geographical locations that have worked or are still working with disenfranchised communities and that have publicly hoped for a better future for their students and by 2 reflecting on how the stories of these schools offer us new opportunities to rethink our own pedagogical commitment to public visions of education To promote this reflection this book offers the notion of publicly imagined public education as a conceptual tool to help understand the historical and discursive specificity of schools hopes and to re-claim public schools as legitimate sites of public imagination
