Education Européenne:

A European Education Romain Gary, 2018-04-03 A NOVEL OF DESPERATE LOVE BITTER HOPE CHILLING COURAGE AND RELENTLESS BRAVERY THIS quietly terrible parable for our times was first published in France fifteen years ago and was awarded the Prix de Critiques It was translated into fourteen languages but not into English Since then M Gary has won international fame with several other books Now an entirely rewritten and M Gary hopes a much improved version of A EUROPEAN EDUCATION is published in English for the first time A too hasty glance at A EUROPEAN EDUCATION might give the impression that no novel has ever borne a more sadly ironical title because this is a story of innocence educated in all the horrors and atrocities of modern war But some of the graduates of the twentieth century's school of despair learned something other than the subjects taught They learned that man's dream of freedom of dignity and of love is immortal that his faith in a future without hatred cannot be destroyed Orville Prescott in THE NEW YORK TIMES A EUROPEAN EDUCATION is a story of unmitigated privation and terror But it is also the story of the human heart's triumph over evil even in the exercise of evil A EUROPEAN EDUCATION is about a group of partisans called the green ones because they live in the forests of Poland They hide in caves steal food and sabotage every effort of the Germans Before the book ends the hero has become a man he has killed he has learned how to steal without being caught how to make friends with the Germans whom he intends to kill and how to love The title is inherent in Janek's bitter summing up of what he has learned all this European education comes down to is to teach you how to find the courage to shoot a man who sits there with lowered head This may not be Romain Gary's most popular book but it is a little masterpiece and may prove to be his THE CHICAGO TRIBUNE

What Secondary Education for a Changing Europe? Pierre Luisoni, Council of Europe. Council for Cultural Co-operation, 1997-01-01 On cover Education On title page A secondary education for Europe *Ideas and European Education Policy, 1973-2020* Marina Cino Pagliarello, 2022-04-26 This book analyses the transformation of European Education Policy from 1973 to 2020 In doing so it offers a unique insight into the changes of European education from a predominantly national concern to a supranational policy framework driven by an economic discourse concerning productivity and employability The book shows that the idea of the Europe of Knowledge did not originate in the Lisbon Strategy of 2000 but rather was the result of a gradual development that started in the mid 1980s This begun with the establishment of a specific problem definition of education as a solution for Europe's lack of competitiveness a definition that was incrementally constructed by the European Commission and the European business community Highlighting significant and unexplored questions such as the role of European transnational business in education and the role of the problem entrepreneur in defining policy issues this book will provide a comprehensive perspective on European Education Policy that will be of interest to all students of European Politics Education Policy and Public Policy Educational Freedom in Eastern Europe Charles Leslie Glenn, 1995 The story of the Communist takeover of education and the recent revival of educational freedom in post Communist societies **A History of Popular Education** Sjaak Braster, Frank Simon, Ian Grosvenor, 2014-10-20 Popular Education is a concept with many meanings With the rise of national systems of education at the beginning of the nineteenth century it was related to the socially inclusive concept of citizenship coined by privileged members with vested interests in the urban society that could only be achieved by educating the common people or in other words the uncontrollable masses that had nothing to lose In the twentieth century Popular Education became another word for initiatives taken by religious and socialist groups for educating working class adults and women However in the course of the twentieth century the meaning of the term shifted towards empowerment and the education of the oppressed This book explores the several ways in which Popular Education has been theoretically and empirically defined in several regions of the world over the last three centuries It is the result of work by scholars from Europe and the Americas during the 31st session of the International Standing Conference on the History of Education ISCHE that was organised at Utrecht University the Netherlands in August 2009 This book was originally published as a special issue of *Paedagogica Historica* The English Catalogue of Books Published from January, 1835, to January, 1863, 1864 **Schools for the Future Europe** John Sayer, Lynn Erler, 2012-03-01 Academics policy makers and professionals explore the development of EU education policy its impact on practice and potential future directions after the Lisbon treaty **Notes on National Education in Continental Europe** John F. MOSS (Clerk of the Sheffield School Board.), 1873 **Modernisation of higher education in Europe: funding and the social dimension 2011** EURYDICE, 2011 There is

an urgent need to address the social dimension of higher education more forcefully and coherently particularly in view of the economic downturn across Europe This is the conclusion of the new Eurydice report which looks at national policies on access to higher education funding and student support The report covering eu Member States plus Iceland Liechtenstein Norway and Turkey suggests that countries are struggling to adapt their higher education systems to meet the challenges brought about by rapid societal change in recent years In particular they need to open up opportunities for more people to benefit from higher education matching this objective with coherent measures funding and monitoring to evaluate their impact European leaders have agreed a headline target that 40% of 30 34 year olds should have a higher education qualification by 2020 an increase from just over 33% today The study focuses on three key topics policies to widen participation in higher education funding trends and the impact of student fee and support systems It reveals that approaches to meet shared European objectives vary greatly between countries and have different impacts on the performance of higher education For example there seems to be an East West divide regarding routes to higher education for non traditional candidates such as adult learners and people entering university on the basis of skills gained in the workplace rather than school qualifications The report highlights changes in higher education spending in response to the crisis Over the past academic year 2010 11 compared to 2009 10 budgets were most increased in Lithuania Liechtenstein Austria France Finland and Malta while the deepest cuts were made in Greece Ireland Iceland 8 10% decrease as well as in Spain Italy the Czech Republic and Slovakia up to 3% decrease A glossary is included Individual chapters contain footnotes Contains 26 figures
