## **Education In Divided Societies:**

**Education in Divided Societies** T. Gallagher, 2004-10-18 All societies contain ethnic divisions. Traditionally, education has acted to promote social integration, but with the acknowledgement of diversity, do we know which system best promotes positive inter-community relations? *Education in Divided Societies* examines the experience of a range of systems, including those which provide common schools and those which place minorities in separate schools. The book argues that structures do not guarantee outcomes and that processes of dialogue and interconnected social systems provide the route to the future.

*Activist Pedagogy and Shared Education in Divided Societies*, 2022-02-14 Collaborative engagement between activist academics from Israel and Northern Ireland highlighted the challenges and potential of working through education to promote shared learning and shared life in divided societies. Following these initial explorations, the volume brought together educationalists from Europe, the United States, and South Africa to widen the range of experience and insights and broaden the base of the conversation. The result is this book on the role of shared education, not only in deeply divided societies but also in places where minorities face discrimination, where migrants face prejudice and barriers, or where society fails to deal positively with cultural diversity. Together, the contributors challenged themselves to develop theoretical and practical paradigms based on practical knowledge and experience to promote activist pedagogies. Their shared purpose was to work for more humane, just, and democratic societies in which education offers genuine hope for sustained transformational change. The four main themes around which the book is organized are: educating for democratic multicultural citizenship; models of shared learning; nurturing intercultural competencies; and reconciling dialogue in the face of conflicting narratives. The book draws on a wide range of international perspectives and insights to identify practical strategies for change in local contexts.

*Education and the Development of Social Integration in Divided Societies* Colin Irwin, 1991      **Citizenship Education in a Divided Society** Elizabeth Anderson Worden, 2022-12-30 This book examines the possibilities and realities of promoting citizenship, peace, and reconciliation through schooling in divided and post-conflict societies. With specific attention to the case of Northern Ireland and the Local and Global Citizenship (LGC) initiative, the book investigates the faltering progress to develop and teach school curricula aimed at promoting citizenship, as well as peace, tolerance, and mutual understanding. Following an overview of the scholarship on citizenship education, the author provides a broad social and political historical context within which to understand the educational reforms and changes that have taken place in Northern Ireland, highlighting various education initiatives of the 1970s, 1980s, and 1990s that sought to foster understanding of the other and promote reconciliation. The book's focus then shifts to the implementation of LGC, which began in 2007. Despite initially strong political support and a considerable investment in terms of financial and human resources, LGC has had limited impact. The book analyzes the obstacles impeding its success, which include marginalization within the curriculum and competing conceptions of the purpose of education. A concluding chapter reflects upon what we can learn from LGC's implementation.

and highlights innovative recent initiatives to bring the young people of Northern Ireland together This book will appeal to scholars and students of education studies with interests in citizenship education peace studies educational policy and curricula and practice      **Education in divided societies** ,1998      The Economics of Schooling in a Divided Society V. Borooah,C. Knox,2015-05-26 Countries that have suffered ethnic or religious conflict and become segregated societies reflect these divisions in education provision for their children Northern Ireland is a case study in point where a parallel system of schools offers education in Catholic maintained schools and Protestant de facto controlled schools While school segregation is the most obvious manifestation of Northern Ireland s fractured society there are more important issues of educational inequality with respect to schools and pupils This book analyses three issues in some detail segregation educational performance and inequality in educational outcomes between schools and between pupils from deprived and affluent family backgrounds Thus far public policies to tackle these issues have been met with limited success The authors consider an alternative approach which they term shared education the aim of which is to improve school performance and in so doing to dismantle some of the barriers between maintained and controlled schools      The Economics of Schooling in a Divided Society V. **Schools and the politics of religion and diversity in the Republic of Ireland** Karin Fischer,2016-09-01 Offers an in depth analysis of the historical political and ideological backdrop to the denominational education system in the Republic of

Ireland      **Governing Through Pedagogy** Jessica Pykett, 2013-09-13 This edited collection brings together researchers from education human geography sociology social policy and political theory in order to consider the idea of the pedagogical state as a means of understanding the strategies employed to re educate citizens The book aims to critically interrogate the cultural practices of governing citizens in contemporary liberal societies Governing through pedagogy can be identified as an emerging tactic by which both state agencies and other non state actors manage administer discipline shape care for and enable liberal citizens Hence discourses of active citizenship participatory democracy community empowerment personalised responsibility behaviour change and community cohesion are productively viewed through the conceptual lens of the pedagogical state Chapters consider the spaces of schools universities the voluntary sector civil society organisations parenting initiatives the media government departments and state agencies as fruitful empirical sites through which pedagogy is worked and re worked This book was originally published as a special issue of Citizenship Studies      Separate to Unite Guiditta Fontana, 2014 This thesis contributes to theories of conflict regulation by showing that formal education while furthering the short term stability of power sharing by reproducing its core narratives and hierarchies may also plant the seeds of future conflicts It concludes that consociations may generate consociational education systems which help reproduce the basic building blocks of political consociations mutually exclusive confessional ethnic national and political communities A paradox characterises consociational education systems Initiatives that promote unity and integration in schools tend to generate backlashes against assimilation To further social cohesion and transition out of conflict education reforms need to accommodate the separate institutions and mutually exclusive identity forming narratives of the local communities in question      *Education Policy and Power-Sharing in Post-Conflict Societies* Giuditta Fontana, 2016-08-24 This book explores the nexus between education and politics in Lebanon Northern Ireland and Macedonia drawing from an extensive body of original evidence and literature on power sharing and post conflict education in these post conflict societies as well as the repercussions that emerged from the end of civil war This book demonstrates that education policy affects the resilience of political settlements by helping reproduce and reinforce the mutually exclusive religious ethnic and national communities that participated in conflict and now share political power Using curricula for subjects such as history citizenship education and languages and structures like the existence of state funded separate or common schools Fontana shows that power sharing constrains the scope for specific education reforms and offers some suggestions for effective ones to aid political stability and reconciliation after civil wars      **Peace Education in Conflict and Post-Conflict Societies** C. McGlynn, 2009-04-13 This collection of peace education efforts in conflict and post conflict societies brings together an international group of scholars to offer the very latest theoretical and pedagogical developments Rather than focus on ad hoc peace education efforts this book investigates the need for long term systemic approaches and innovative pedagogies      *Transformative Civic Education in Democratic Societies* Tetyana Hoggan-Kloubert, Paul E Mabrey III, Chad

Hoggan,2023-08-01 Democracy is neither inevitable nor guaranteed to last To survive democracy needs people adequately prepared to enact it Such preparation for effective citizenship in a complex and plural world requires an adult civic education one that goes beyond simple knowledge acquisition It requires a transformative education to help learners become agents and co shapers of their worlds This book offers examples of the roles that civic education has played and can play in different communities In this collection scholars from around the world report and reflect on civic adult education examining approaches paradigms and concepts that help us to act in culturally ethnically linguistically and religiously diverse societies

Trust in Divided Societies Abdalhadi M. Alijla,2020-11-26 When countries try to navigate through the aftermath of conflict trust is the main focus and the catalyst for rebuilding societies nations economies and democracies Trust is vital not only at an individual level but also at a community level trust is important to sustain peace and also works as a trigger to end conflicts But why are some divided societies more prone to the collapse of social trust than others This book uses empirical and case study research including qualitative comparative analysis QCA statistical methods observations and interviews to compare which policies and institutions to build trust have a greater impact on divided societies in the Middle East The book focuses on Lebanon Palestine and Syria but analyses the results from these societies by also comparing other political and ethno religiously divided societies beyond the MENA region The book does not want to forward a universal theory that gives us the origin of trust and how it is destroyed Rather it aims to provide a comprehensive explanation of generalised trust in divided societies and answer the question under which institutions is generalised trust in a divided society maintained or destroyed and how does this happen Of key importance to Abdalhadi Alijla is to highlight the formal and informal institutions that inspire an elevated level of trust to help make societies less vulnerable to internal conflict and also to give voice to the real people who live and experience divided societies

Young People's Rights in the Citizenship Education Classroom Helen Hanna,2019-06-29 This book explores the rights held by young people in the citizenship education classroom in the divided societies of Northern Ireland and Israel Against the backdrop of a long history of protracted conflict and division the author analyses how international rights obligations are reflected in the contested citizenship education curriculum in secondary schools Drawing upon extensive qualitative data as well as policy and curriculum documents the author reveals that understandings of education rights can be oriented around three themes minority group representation in the curriculum dealing with difference through pedagogy and preparing young people for life in a divided society This can be mapped onto the 42 A rights framework where education should be acceptable and adaptable However the variety of interpretations held by participants raises questions regarding the universality of international frameworks for education rights and the workability of such frameworks in the national and divided contexts While the contexts of Northern Ireland and Israel have much in common they are rarely compared this book will show that their comparison is as relevant as ever as issues of identity continue to affect everyday school life This book will be of interest to citizenship and history education

scholars as well as those who are concerned with the application of international human rights law      **Public Policy in a Divided Society** Alex McEwen, 2018-10-26 First published in 1999 this volume is focused on the framing and implementation of public policy in education in a society with deeply entrenched cultural and political identities as expressed by Protestants and Catholics through their different schooling systems      *Citizenship Education and Global Migration* James A. Banks, 2017-06-23 This groundbreaking book describes theory research and practice that can be used in civic education courses and programs to help students from marginalized and minoritized groups in nations around the world attain a sense of structural integration and political efficacy within their nation states develop civic participation skills and reflective cultural national and global identities
