Improving Education in a World of Politics M. Scott Norton, 2018-10-05 This book centers on the fact that public education is involved in the politics of the world just as other systems and organizations are involved in competing for the values and resources of the many communities Keeping education out of politics or politics out of education is fallacious As long as public education is financed by taxes local state or national it must compete with other agencies and programs for the available tax dollars These realities make it necessary for school leaders to be knowledgeable of how the values and resources of the school community are distributed This need calls for an understanding of how important decisions are made or not made that affect the outcomes of public education If public schools are to remain relevant and in the main stream of public issues and related decisional outcomes they must become more knowledgeable of the political world of education and how important decisions are determined regarding educational support

Mawhinney,2015-12-22 This is an assessment of the reluctance of American education institutions to undergo change and reform at a time when it is considered necessary The lack of public confidence in educational institutions is discussed along with the subsequent consequences Education, Politics and Religion James Arthur,Liam

Gearon,Alan Sears,2010-06-28 In recent years a number of popular books have savaged religion arguing it is a dangerous delusion that poisons human societies and relationships This is but the most recent manifestation of a secularising agenda that has been sweeping contemporary democratic societies since the Enlightenment This book pushes back against that agenda examining its key assumptions and arguing that the exclusion of religious people and ideas from education and the public square is both undemocratic and unwise For the most part the book draws arguments and examples from Christianity

the religious tradition of the authors but it recognises that many religions share the concerns and possibilities examined The book examines contemporary expressions of the secularising agenda in Western democracies with particular focus on how that is played out in education It demonstrates how republican theory understood within a faith perspective provides a shared understanding and substantive basis for education within a Western democracy It explores the historical connections and disconnections between religion and civic life in the West from ancient to contemporary times and examines religiously based civic action and pedagogical approaches contending both have the potential to contribute greatly to democracy It will be of value to any who are interested in exploring how democracies can include the voices of all their citizens the religious and the secular *International Education: Politics and Policies* Ma José GARCÍA RUIZ, 2013-04-01 The present book aims to analyse key features of the field of International Education It also intends to study crucial elements of the relevant dimensions of the dichotomy Politics versus Policies Educational policy and politics together constitute a vast field of research and intellectual endeavour Policy and Politics are two words that are often confused with regard to their connotations There is in fact some difference between the two words Policy is a principle Politics is all about organizational process
