## **Education Of An Army British Military:**

The Education of an Army Jay Luvaas, 1964      Ethics Education in the Military Nigel de Lee, 2017-03-02 With formal ethics education programmes being a rarity in most countries armed forces there is a growing importance for servicemen to undergo additional military ethics training But how do we ensure that soldiers learn the right lessons from it Furthermore how can we achieve a uniformity of approach The current lack of uniformity about what constitutes ethical behaviour and how troops should be educated in it is potentially a cause for serious alarm This book advances knowledge and understanding of the issues associated with this subject by bringing together experts from around the world to analyze the content mode of instruction theoretical underpinnings and the effect of cultural and national differences within current ethics programmes It also explores whether such programmes are best run by military officers chaplains or academic philosophers and reflects whether it is feasible to develop common principles and approaches for the armed forces of all Western countries This is an invaluable volume for military academies and staff colleges to enhance understanding of a matter which requires much further thought and which is becoming a vital force in influencing outcomes on the battlefields of the twenty first century The book will primarily be of interest to military officers and others directly involved in ethics education in the military as well as to philosophers and students of military affairs      *Military Education and the British Empire, 1815-1949* Douglas E. The Indian Army was the largest volunteer army during the Second World War Indian Army divisions fought in the Middle East North Africa and Italy and went to make up the overwhelming majority of the troops in South East Asia Over two million personnel served in the Indian Army and India provided the base for supplies for the Middle Eastern and South East Asian theatres This monograph is a modern historical interpretation of the Indian Army as a holistic organisation during the Second World War It will look at training in India charting how the Indian Army developed a more comprehensive training structure than any other Commonwealth country This was achieved through both the dissemination of doctrine and the professionalism of a small coterie of Indian Army officers who brought about a military culture within the Indian Army starting in the 1930s that came to fruition during the Second World War which informed the formal learning process Finally it will show that the Indian Army was reorganised after experiences of the First World War During the interwar period the army developed training and belief for both fighting on the North West Frontier and as an aid to civil power With the outbreak of the Second World War in addition to these roles the army had to expand and adapt to fighting modern professional armies in the difficult terrains of desert jungle and mountain warfare A clear development of doctrine and training can be seen with many pamphlets being produced by GHQ India that were in turn used to formulate training within formations and then used in divisional brigade and unit training instructions thus a clear line of process can be seen not only from GHQ India down to brigade and battalion level but also upwards from battalion and brigade level based on experience in battle that was absorbed into new training instructions Together with the added impetus for education in the army by 1945 the Indian Army had become a modern professional and national army      *Reader's Guide to Military History* Charles Messenger,2013-10-31

the academic parameters of the study of war in the twentieth century In presenting a complete genesis of the Makers project in the context of intellectual trends and historical contingency this book reflects on a more complex and nuanced appraisal of the development of scholarship on war In so doing it also offers contributions to the intellectual biographies of key figures in the history of war in the twentieth century such as Edward Mead Earle Peter Paret Gordon Craig and Theodore Ropp Making Makers contributes to an intellectual history of military history and contextualises the place of history and historians in strategic and security studies It is not only a history of the book but a history of the networks of scholars involved in its creation their careers and lines of patronage crossing international boundaries from Europe to the USA to Asia and Australia It is an investigation of ideas individuals and groups of work completed and scholarship produced as well as contingency and opportunities missed

Soldiers and Scholars Carol Reardon, 1990 The use and abuse of military history is the theme of this book The author scrutinizes the army's first systematic attempt to use military history to educate its future leaders and traces the army's struggle from the end of the Civil War to claim intellectual authority over the study of war
