Education Productivity And Inequality The East African Natural Experiment

Paul Glewwe

Education Productivity And Inequality The East African Natural Experiment:

Education, Productivity, and Inequality John B. Knight, R. H. Sabot, 1990 The relationship between resources devoted to education and the economy of developing nations is explored The research seeks to understand if and how investment in education translates into increased economic growth and labor productivity Additionally the function of education in reducing various dimensions of economic inequality is examined The two East African nations that are the study's focus Kenya and Tanzania have similar levels of income but they differ markedly in their public policy toward the provision of secondary education and thus in the educational attainment of the labor force The research findings provide strong backing for the human capital paradigm educational expansion is shown to raise labor productivity The results also show that making education less scarce diminishes inequality in access to education and in income Numerous figures and tables of data appear throughout this volume a list of 170 references is included DB *Overview of Educational Expansion, Productivity and Inequality* J. B. Knight, 1986 Comparison of the Kenyan and Tanzanian policies for secondary education , [Resources in Education](#) , 1991 *Bridges and Barriers* Eddie Williams, 2014-06-03 Recent decades have seen sub-Saharan Africa decline in both economic and human terms The rich North has responded with a barrage of well publicized initiatives from pop concerts to international commitments on debt relief aid trade and good governance Among the complex of factors necessary to sustain economic and human development education receives little media coverage although it is crucial However education must be effective This book argues that in Anglophone Africa education is not effective because of the use of English rather than children's first languages both as the medium of instruction and also as the language in which children are first taught to read Research is presented from Malawi and Zambia countries with contrasting language policies using evidence from tests in English and African languages small group discussions and classroom observation The findings show that English medium policies in Africa do not give students any advantage in English over first language policies while the use of English discriminates against girls and rural children The book concludes that much education in Africa is a barrier rather than a bridge to learning because of the prevailing language ideology which has resulted in massive over estimation of the value of English While appropriate language policies alone will not solve education and development difficulties in Africa they do have a positive contribution to make The evidence presented here suggests they are failing to make that contribution

Comparative Education Robert F. Arnove, Carlos Alberto Torres, 2003 Bringing together some of the leading names in comparative and international education this second edition provides new perspectives on the dynamic interplay of global national and local forces as they shape education systems in specific contexts **The Economics of School Quality Investments in Developing Countries** Paul Glewwe, 1999-07-05 This book presents a method to estimate the economic returns to investments in school quality While economists have long had methods to estimate rates of return to additional years of schooling until now there has been no method for analyzing returns to investments in school quality This is

regrettable because many if not most government education policies focus on school quality Empirical work using data from Ghana shows that investments in school quality have higher rates of return than investments in increased years in schooling The bulk of the study is written by Paul Glewwe with some coauthored and contributed pieces from his co researchers Jaikishan Desai Dean Jolliffe Raylynn Oliver and Wim Vijverberg who worked as research assistants on this project

English Language in India Jaskiran Bedi, 2019-08-13 This book examines the relationship between the English language and growth economic and inclusive in India It explores why English continues to be the language of aspiration long after Independence With the second largest English speaking population in the world today India is testimonial to how a linguistic legacy continues to cast a long shadow on its contemporary discourse in the economic arena The volume Explores how English language proficiency constitutes as human capital Draws in the latest India Human Development Survey data Investigates the relationship between the language and economic indicators such as wages household income and state growth Further investigates the role of English language in the inclusivity of growth Provides a snapshot of the pedagogy of English in the Indian education system First of its kind in scope this volume will be of great interest to scholars of economics education sociolinguistics development studies politics and sociology It will also be of great interest to the general reader

Girls' Education in the Twenty-first Century Mercy Tembon, Lucia Fort, 2008-01-01 Persuasive evidence demonstrates that gender equality in education is central to economic development Despite more than two decades of accumulated knowledge and evidence of what works in improving gender equality progress on the ground remains slow and uneven across countries What is missing Given that education is a critical path to accelerate progress toward gender equality and the empowerment of women what is holding us back These questions were discussed at the global symposium Education A Critical Path to Gender Equality and Women s Empowerment which was sponsored by the World Bank in October 2007 Girls Education in the 21st Century is based on background papers developed for the symposium The book s chapters reflect the current state of knowledge on education from a gender perspective and highlight the importance of and challenges to female education as well as the interdependence of education and development objectives The last chapter presents five strategic directions for advancing gender equality in education and their implications for World Bank operations Girls Education in the 21st Century will be of particular interest to researchers educators school administrators and policy makers at the global national regional and municipal levels

School Enrollment Decline in Sub-Saharan Africa Joseph W. B. Bredie, Girindre K. Beeharry, 1998-01-01 The overarching objective of the World Bank s assistance to Sub Saharan African countries is poverty reduction through sustained economic growth at a high level and improved social services Past experience shows that a minimum level of educational attainment has been a prerequisite for the success of such a strategy The current level of education development has been low and the development of primary education has stagnated and even declined in some countries since the early 1980s This paper examines the likely causes for deteriorating enrollment rates in

Africa It looks at the constraints in the demand for schooling and gives possible reasons for stagnation Economic Policy Reform Anne O. Krueger, 2000 Anne O Krueger has assembled and deftly summarized an excellent set of papers on the major issues in economic reform in developing countries at the turn of the century Stanley Fischer International Monetary Fund The papers and commentary collected in this volume discuss vital contemporary thinking on economic policy reform in particular the difficulties that leave so much of the world mired in poverty Distinguished contributors address issues ranging from education and privatization to exchange rates and telecommunications reform providing an excellent overview of the current situation and the possible paths into the future **Labor Standards and Development in the Global Economy**, 1990 The Social Benefits of Education Jere R. Behrman, Nevzer Stacey, 2010-08-04 For decades the primary argument in justifying education has been based on its direct economic effects Yet education also provides social benefits for individuals and society at large including a better way of taking care of ourselves and consequently creating a better society to live in Though it is difficult to quantify these social benefits a more systematic analysis would improve our understanding of the full effects of education and provide a basis for considering related policies The Office of Research of the United States Department of Education commissioned a series of papers on measuring these effects of education Those papers revised and updated are collected here Kenneth J Arrow provides perspective on education and preference formation and Jere R Behrman considers general conceptual and measurement issues in assessing the social benefits of education and policies related to education These issues are taken up by experts in four fields health parenting the environment and crime Themes addressed include measurement issues regarding what we mean by education and its benefits basic analytical issues in assessing the impact of education on these social benefits using behavioral data and whether the social benefits of education justify public policy interventions Jere R Behrman is William R Kenan Jr Professor of Economics University of Pennsylvania Nevzer G Stacey is Senior Research Analyst Office of Educational Research U S Department of Education *Class Formation and Civil Society* Patrick M. Boyle, 2018-10-26 First published in 1999 this study of the politics of education in Cameroon the Congo and Kenya presents arresting empirical evidence that urban elites exiting public sector educational systems they have dominated in favour of private school networks of their own creation Seeking to enhance their offspring's chances for survival and even domination in a world of scarce resources and limited opportunities for employment elites see private schools as tools to shape newly emerging civil societies in Africa in their own image From a theoretical perspective the fresh evidence presented here shows that schooling has once again become a major social force influencing the balance of state and society in modern Africa Re-examining an older political tradition of class analysis and integrating it into more recent civil society perspectives the author shows that the abandonment of the unreliable education services of dysfunctional African states in favour of private schools has profound consequences for class articulation in societies dividing once again according to educational opportunities Rhetoric vs. Reality Michael Timpane, Dominic Brewer, Brian Gill, Karen

Ross,2001-12-12 How can the education of our nation s children be improved Vouchers and charter schools aim to improve education by providing families with more choice in the schooling of their children and by decentralizing the provision of educational services While supporters argue that school choice is essential to rescue children from failing schools opponents claim that it may destroy America s public education system The authors undertake an exhaustive and critical view of the evidence on vouchers and charter schools The book is a useful unbiased primer for all those interested in this controversial topic

The Elgar Companion to Development Studies David Clark,2006 If handbooks can be inspiring this is it Like a true companion it takes in its stride conversations both big and small Its entries do not just present an international and multidisciplinary mix but true to life they work on several different scales And importantly the book makes its authority evident For it is like an extended website but with all the added advantages of an encyclopaedia that actually tells you about the authors and the sources on which they have drawn The resulting compilation is highly intelligent thoughtful and above all usable Dame Marilyn Strathern University of Cambridge UK The Elgar Companion to Development Studies is a major production in the development studies field authored by a star studded cast of contributors With 136 entries covering a vast range of topics it should quickly establish itself as a leading work of reference We should all feel indebted to David Clark who has successfully brought this substantial publishing project to completion John Toye University of Oxford UK This is a most comprehensive handbook on development studies It brings together a wide varied array of carefully crafted summaries of 136 key topics in development by an international cast of well respected academics and other experts in respective areas of study The handbook is heavily interdisciplinary organically combining economic political historical social cultural institutional ethical and human aspects of development While the wide range of entries might appear as a simple glossary listing or an encyclopedic collection each of the 136 entries offers more depth and discussion than the average handbook Viewed in this light this companion is highly likely to become known as a leading reference work on the topic Highly recommended Ismael Hossein Zadeh Choice The Elgar Companion to Development Studies is an innovative and unique reference book that includes original contributions covering development economics as well as development studies broadly defined This major new Companion brings together an international panel of experts from varying backgrounds who discuss theoretical ethical and practical issues relating to economic social cultural institutional political and human aspects of development in poor countries It also includes a selection of intellectual biographies of leading development thinkers While the Companion is organised along the lines of an encyclopaedia each of its 136 entries provide more depth and discussion than the average reference book Its entries are also extremely diverse they draw on different social science disciplines incorporate various mixes of theoretical and applied work embrace a variety of methodologies and represent different views of the world The Elgar Companion to Development Studies will therefore appeal to students scholars researchers policymakers and practitioners in the field of development as well as the interested layman

Labor Markets and

Economic Development Ravi Kanbur, Jan Svejnar, 2009-05-07 As developing and transition economies enter the next phase of reforms labor market issues increasingly come to the fore With the increased competition from globalization the discussion is shifting to the need for greater labor market flexibility and the creation of good jobs Moreover the greater actual and perceived insecurity in labor markets has generated a new agenda on how to structure safety nets and labor market regulation The older questions of the links between the formal and informal labor market reappear with new dimensions and significance More generally it is clear that an accurate understanding of how labor market structures function is essential if we are to analyze alternative policy proposals in the wake of these concerns Oddly enough in spite of this great importance there are no recent monographs that bring together rigorous studies produced by academic researchers on these various issues This book fills that gap Under the steady editorship of Ravi Kanbur and Jan Svejnar the contributors flourish in their attempts to enliven these debates Labour Markets and Economic Development S. M. Ravi Kanbur, Jan Svejnar, 2009 This book looks at the links between the formal and informal labor market in developing and transition economies working towards an accurate understanding of labour markets and analyzing alternative policy proposals International Handbook of Development Economics Amitava Krishna Dutt, Jaime Ros, 2008-01-01 The essays are concise yet comprehensive and each essay contains a substantial set of references which an interested researcher or student could follow up In addition to representing multidisciplinary interactions this collection encompasses several different perspectives within development economics so the reader can learn for example both about neoclassical approaches and dependency theories in the same volume This makes the collection unique and all the more valuable This is a very good reference collection as the individual essays are informative and provide a good overall perspective on the topic that they set out to address The extensive bibliography at the end of each essay adds further value to this collection Ashwini Deshpande Economic and Political Weekly These new volumes impress along two dimensions First they highlight important connections between economic development and variables such as culture warfare and ethnicity which are sometimes ignored by mainstream economists Second they analyze the economic development experience of different regions such as Africa Latin America and East Asia a valuable reference for scholars and practitioners in the field Highly recommended H A Faruq Choice This two volume original reference work provides a comprehensive overview of development economics and comprises contributions by some of the leading scholars working in the field Authors are drawn from around the world and write on a wide range of topics After providing an introduction to the subject by examining issues like the meaning and measurement of development historical and interdisciplinary approaches empirical regularities and data problems the contributors provide a wealth of perspectives on and analyses of development economics They discuss alternative approaches to development the macroeconomics of growth factors and sources of economic development such as capital labor entrepreneurship resources and technology major sectors of concern such as agriculture industry services and the informal sector and international issues such as trade capital

and labor flows and technology transfers Income distribution and poverty the state and other institutions and actual development experiences are explored The contributors provide analytical contributions as well as the relation between these contributions and real world and policy issues from a variety of alternative perspectives Scholars students policymakers and other development practitioners will all find this comprehensive reference invaluable Knowledge, Power and Dissent Guy R. Neave, 2006-01-01 This publication is based on the discussions of the 2004 Global Colloquium on Research and Higher Education Policy of the UNESCO Forum for Higher Education Research and Knowledge held in Paris in December 2004 It contains contributions from 17 international experts in the field of higher education which explore the global rise of the knowledge society and its implications for higher education and for sustainable human development in the future
