professionalisation and new nuances and intensities of regulation      *For Education* Carr, Wilfred,1995-02-01 In this text Carr provides a justification for reconstructing educational theory and research as a form of critical inquiry In doing this he confronts such philosophical questions as what is educational theory what is an educational practice and how are theory and practice related      **The RoutledgeFalmer Reader in the Philosophy of Education** Wilfred Carr,2021-04-29 This Reader brings together a wide range of material to present an international perspective on topical issues in philosophy of education today Focusing on the enduring trends in this field this lively and informative Reader provides broad coverage of the field and includes crucial topics With an emphasis on contemporary pieces that deal with issues relevant to the immediate real world this book represents the research and views of some of the most respected authors in the field today Wilfred Carr also provides a specially written introduction which provides a much needed context to the role of philosophy in the current educational climate Students of philosophy and philosophy of education will find this Reader an important route map to further reading and understanding      *Beyond Liberal Education* Robin Barrow,Patricia White,2013-01-11 This collection of essays by philosophers and educationalists of international reputation all published here for the first time celebrates Paul Hirst s professional career The introductory essay by Robin Barrow and Patricia White outlines Paul Hirst s career and maps the shifts in his thought about education showing how his views on teacher education the curriculum and educational aims are interrelated Contributions from leading names in British and American philosophy of education cover themes ranging from the nature of good teaching to Wittgensteinian aesthetics The collection concludes with a paper in which Paul Hirst sets out his latest views on the nature of education and its aims The book also includes a complete bibliography of works by Hirst and a substantial set of references to his writing      In Search of Subjectivities Michael A. practical knowledge Their definition of practice is wide and includes the generation of theory and the doing of research as well as front line teaching They show how notions of adult learning and the adult learner have been constituted mainly through theory and research in psychology and sociology and examine action research as a mode of understanding They conclude by looking at the curriculum implications for the teaching of adult education as reflective practice *Emerging Perspectives from Social Realism on Knowledge and Education* Graham McPhail,Richard Pountney,Leesa Wheelahan,2024-10-28 This book brings the key ideas and concepts of social realism to bear on current debates in the fields of knowledge and curriculum The key concern of this collection is to highlight matters related to knowledge and the influence these dimensions have on the formation of curricula pedagogy identity and equity in educational contexts Presenting new perspectives on the place of various types and forms of knowledge in contemporary education this book explores two central questions what type of knowledge is most important to include in a curriculum and what is meant by disciplinary knowledge The chapters use empirical examples to illustrate how the issues play out on a global stage interweaving the social justice concern of equitable access to disciplinary knowledge throughout In particular the authors address the emerging theorisation of issues related to the decolonisation of curricula the recontextualisation of non traditional knowledge into the curriculum and teacher education Offering new philosophical and theoretical perspectives this book will be of interest to researchers scholars and students examining the fields of knowledge and curriculum and the sociology of education more broadly *The Study of Education* Peter Gordon,2019-05-20 The inaugural lectures published in this volume reflect the many changes which have taken place in the study of education between the late 1970s and the mid 1980s Changes in society are reflected in the lectures on special needs education and multicultural education and the contributions of educational administration and comparative education as a field of study The SAGE Handbook of Educational Action Research Bridget Somekh,2009-05-19 There has been a huge growth of interest in action research in educational settings over the past 20 years across the Americas Europe Australia and Africa this Handbook provides a scholarly reference text that will inform the development of the field *Professionalism and Ethics in Teaching* David Carr,2005-06-20 Professionalism and Ethics in Teaching presents a thought provoking and stimulating study of the moral dimensions of the teaching professions After discussing the moral implications of professionalism Carr explores the relationship of education theory to teaching practice and the impact of this relationship on professional expertise He then identifies and examines some central ethical and moral issues in education and teaching Finally David Carr gives a detailed analysis of a range of issues concerning the role of the teacher and the managements of educational issues Professionalism and Ethics in Teaching presents a thought provoking and stimulating study of the moral dimensions of the teaching professions *International Educational Development and Learning through Sustainable Partnerships* S.
