F. Connell,1948 *Conversations, Choices and Chances* Anthony Bradney,2003-04-07 Most academics in university law schools would claim to offer a liberal education Few have thought very much about what a liberal education in law means Basing itself on a detailed examination of the theory of liberal education this book looks at what the liberal university law school should be doing in terms of its teaching research and administration *The Literature of Education* W. Kenneth Richmond,2019-01-15 Original blurb The volume of writing on educational topics has increased so prodigiously in recent years that the student is likely to lose himself in a sea of print This may lead him to opt for the first book that comes to hand or waste time rifling through half a dozen

when a thorough grasp of one key text is all that is needed Reading lists commonly look impressive not to say daunting In fact the multifarious titles conceal an enormous amount of duplication an endless raking over of other people s research findings It is a safe bet writes W Kenneth Richmond that less than 5 percent of the contents of any new book on education will be in any way original This critical bibliography originally published in 1972 is concerned with the noteworthy books and major official reports that had appeared in the English language during the twenty five years prior to publication In his introduction and in the commentaries prefacing each section the author explains the background to the genuinely new departures of the period and describes successive changes in the climate of educational opinion *Robert Lowe and Education* David William Sylvester, 2011-02-17 Mr Sylvester assesses Robert Lowe s 1811 1892 career and political importance *The Social Production of Knowledge in a Neoliberal Age* Justin Cruickshank, Ross Abbinnett, 2022-04-04 Higher education exposes a key paradox of neoliberalism The project of neoliberalism was said to be that of rolling back the state to liberate individuals by replacing government bureaucracy with the free market Rather than have the market serve individuals however individuals were to serve the market The marketisation reforms in higher education which sought to reshape knowledge production with students investing in human capital and academics producing transferable research to make higher education of use to the economy has resulted in extensive government bureaucracy and oppressive managerialist bureaucracy which is inefficient and expensive Neoliberalism has always had authoritarian aspects and these are now coming to bear on universities The state does not want critical and informed graduate citizens but a hollowed out public sphere defined by consumption willing servitude to the market and deference to state power Attempts to reshape universities with bureaucracy are now accompanied by a culture war attacking the production of critical knowledge The authors in this book explore these issues and the possibilities for resistance and progressive change **Thomas Huxley** Paul White, 2003 Dubbed Darwin s Bulldog for his combative role in the Victorian controversies over evolutionary theory Thomas Huxley has been widely regarded as the epitome of the professional scientist who emerged in the nineteenth century from the restrictions of ecclesiastical authority and aristocratic patronage Yet from the 1850s until his death in 1895 Huxley always defined himself as a man of science a moral and religious figure not a scientist Exploring his relationships with his wife fellow naturalists clergymen and men of letters White presents a new analysis of the authority of science literature and religion during the Victorian period showing how these different practices were woven into a fabric of high culture and integrated into institutions of print education and research He provides a substantially different view of Huxley s role in the evolution debates and of his relations with his scientific contemporaries especially Richard Owen and Charles Darwin English Culture and the Decline of the Industrial Spirit, 1850-1980 Martin J. Wiener, 2004-09-13 Drawing upon a wide array of sources Martin Wiener explores the English ambivalence to modern industrial society Social Paralysis and Social Change Neil J. Smelser, 1991-09-03 Neil Smelser s Social Paralysis and Social Change is one of the most comprehensive

histories of mass education ever written. It tells the story of how working class education in nineteenth century Britain often paralyzed by class religious and economic conflict struggled forward toward change. This book is ambitious in scope. It is both a detailed history of educational development and a theoretical study of social change at once a case study of Britain and a comparative study of variations within Britain. Smelser simultaneously meets the scholarly standards of historians and critically addresses accepted theories of educational change progress conflict and functional theories. He also sheds new light on the process of secularization the relations between industrialization and education structural differentiation and the role of the state in social change. This work marks a return for the author to the same historical arena Victorian Britain that inspired his classic work *Social Change in the Industrial Revolution* thirty five years ago. Smelser's research has again been exhaustive. He has achieved a remarkable synthesis of the huge body of available materials both primary and secondary. Smelser's latest book will be most controversial in its treatment of class as a primordial social grouping beyond its economic significance. Indeed his demonstration that class ethnic and religious groupings were decisive in determining the course of British working class education has broad ranging implications. These groupings remain at the heart of educational conflict debate and change in most societies including our own and prompt us to pose again and again the chronic question who controls the educational terrain.
