Teaching and Learning in Context Richard Tabulawa, 2013 Since the 1990s sub Saharan Africa has experienced unprecedented attempts at reforming teacher and student classroom practices with a learner centred pedagogy regarded as an effective antidote to the prevalence of teacher centred didactic classroom practices Attempts at reform have been going on all over the continent In fact learner centred pedagogy has been described as one of the most pervasive educational ideas in contemporary sub Saharan Africa and elsewhere Research has revealed that the major attempts have largely failed mainly because teachers have not been able to adopt instructional innovations to technical problems This failure is also related to lack of resources and poor teacher training programmes which lead to poor teacher quality among others This book attempts to explain why pedagogical change

has not occurred in spite of the much energy and resources that have been committed to such reforms The book also takes us inside what the author calls the socio cultural world of African classrooms to help us understand the reasons teachers dominate classroom life and rely disproportionately on didactic methods of teaching Its conceptual analyses capture the best of both the sociology and the anthropology of education in contexts of poverty as well as the politics of education The book concludes that a socio cultural approach should be the basis for developing culturally responsive indigenous pedagogies though these may or may not turn out to be in any way akin to constructivist learner centred pedagogies
