## **Educational Imagination On The Design And Education Of School Programs:**

*The Educational Imagination* Elliot W. Eisner, 1994 *The Educational Imagination* explores the current state of American education and provides a historical view of earlier efforts to reform our schools. It describes the ideological positions of those who wish to shape the aims and content of school programs in ways that reflect their values.

*The Educational Imagination* Elliot W. Eisner, 1979 This paperback reprint of the 1994 edition is a highly regarded curriculum development book by one of the most prominent figures in the field. It is designed to help readers understand the major approaches to curriculum planning and the formation of educational goals. In this edition, Eisner provides a conceptual framework that shows learners the different ways in which the aims of education can be regarded and describes their implications for curriculum planning and teaching practices. Coverage is grounded in the belief that the appropriateness of any given educational practice is dependent upon the characteristics and context of the school program and the values of the community that program serves. Chapter titles include: Schooling in America, Where Are We Headed, Some Concepts, Distinctions and Definitions, Curriculum Ideologies, The Three Curricula That All Schools Teach, Educational Aims, Objectives and Other Aspirations, Dimensions of Curriculum Planning, On the Art of Teaching, The Functions and Forms of Evaluation, Reshaping Assessment in Education, Some Examples of Educational Criticism, and A Criticism of an Educational Criticism. For teachers and anyone else involved in planning educational curriculums.

*Postformal Education* Jennifer M. Gidley, 2016-08-05 This book explains why the current education model, which was developed in the 19th century to meet the needs of industrial expansion, is obsolete. It points to the need for a new approach to education designed to prepare young people for global uncertainty, accelerating change, and unprecedented complexity. The book offers a new educational philosophy to awaken the creative big picture and long-term thinking that will help equip students to face tomorrow's challenges. Inside, readers will find a dialogue between adult developmental psychology research on higher stages of reasoning and today's most evolved education research and practice. This dialogue reveals surprising links between play and wisdom, imagination and ecology, holism and love. The overwhelming issues of global climate crisis, growing economic disparity, and the youth mental health epidemic reveal how dramatically the current education model has failed students and educators. This book raises a planet-wide call to deeply question how we actually think and how we must educate. It articulates a postformal education philosophy as a foundation for educational futures. The book will appeal to educators, educational philosophers, pre-service teachers, educational and developmental psychologists, and educational researchers, including postgraduates with an interest in transformational educational theories designed for the complexity of the 21st century. This is the most compelling book on education I have

read for many years It has major implications for all who are in a position to influence developments in teacher education and educational policy

Gidley is one of the very rare scholars who can write intelligently and accessibly about the past present and future in education I was challenged and ultimately convinced by her contention that what masquerades as education today must be seen for what it is an anachronistic relic of the industrial past

Gidley s challenge is to co evolve a radically new education All who seek to play a part must read this book

**Designing Courses for Higher Education** Susan Toohey,1999-05-16 What issues need to be considered in designing a course or unit of study in higher education Who should be involved in designing a course and how can they best work together What should students get out of a course

Susan Toohey focuses not on teaching techniques but on the strategic decisions which must be made before a course begins She provides realistic advice for university and college teachers on how to design more effective courses without underestimating the complexity of the task facing course developers

In particular she examines fully the challenges involved in leading course design teams getting agreement among teaching staff and managing organizational politics She also explores the key role played by academics own values and beliefs often unexamined in shaping course design and student experience

In doing so she offers course designers both an understanding and a framework within which to clarify their own teaching purposes

*Designing Courses for Higher Education* is an accessible jargon free text providing practical assistance and enlivened by many examples of innovative practice and interviews with academics involved in course design

It is a key resource for college and university teachers

*Introduction to Education* William Edwin Segall,Anna Victoria Wilson,2004

*Introduction to Education* Second Edition is written for students beginning their study in education

As the school population increasingly reflects the diversity of America s population many prospective teachers typically from the middle classes will be unprepared for the diverse classrooms they will inevitably encounter

This text helps students prepare to be teachers in a pluralistic society whose classrooms represent an increasingly varied set of cultural histories and values

*Introduction to Education* Second Edition identifies and examines key educational topics and issues

A history of Education that goes beyond the standard Puritan background and begins instead with indigenous Americans and the influence of the Spanish

Surveys of a broad spectrum of children s backgrounds including experiences with drugs poverty and lack of access to vital cultural currency like the Internet

And provides numerous pedagogical aides

Reflective in text questions that challenge students to think beyond their own cultural backgrounds and to develop an appreciation for a variety of different cultures

Student Web materials including supplemental readings involving issues in contemporary American education in text case studies

An issues based guide to websites on hot topics like vouchers and the No Child Left Behind Act

Instructor s Manual with Test Bank still under construction
