Faces In The Clouds A New Theory Of Religion:

Faces in the Clouds Stewart Elliott Guthrie, 1995-04-06 Religion is universal human culture No phenomenon is more widely shared or more intensely studied yet there is no agreement on what religion is Now in *Faces in the Clouds* anthropologist Stewart Guthrie provides a provocative definition of religion in a bold and persuasive new theory Guthrie says religion can best be understood as systematic anthropomorphism that is the attribution of human characteristics to nonhuman things and events Many writers see anthropomorphism as common or even universal in religion but few think it is central To Guthrie however it is fundamental Religion he writes consists of seeing the world as humanlike As Guthrie shows people find a wide range of humanlike beings plausible Gods spirits abominable snowmen HAL the computer Chiquita Banana We find messages in random events such as earthquakes weather and traffic accidents We say a fire rages a storm wreaks vengeance and waters lie still Guthrie says that our tendency to find human characteristics in the nonhuman world stems from a deep seated perceptual strategy in the face of pervasive if mostly unconscious uncertainty about what we see we bet on the most meaningful interpretation we can If we are in the woods and see a dark shape that might be a bear or a boulder for example it is good policy to think it is a bear If we are mistaken we lose little and if we are right we gain much So Guthrie writes in scanning the world we always look for what most concerns us living things and especially human ones Even animals watch for human attributes as when birds avoid scarecrows In short we all follow the principle better safe than sorry Marshalling a wealth of evidence from anthropology cognitive science philosophy theology advertising literature art and animal behavior Guthrie offers a fascinating array of examples to show how this perceptual strategy pervades secular life and how it characterizes religious experience Challenging the very foundations of religion *Faces in the Clouds* forces us to take a new look at this fundamental element of human life

Faces in the Clouds Stewart Guthrie, 1992 **Crossing and Dwelling** Thomas A. TWEED, 2009-06-30 A deeply researched and vividly written study this book depicts religion in place and in movement dwelling and crossing Drawing on insights from the natural and social sciences Tweed's work is grounded in the gritty particulars of distinctive religious practices even as it moves toward ideas about cross cultural patterns It offers a responsible way to think broadly about religion a topic that is crucial for understanding the contemporary world *The Routledge Handbook of Evolutionary Approaches to Religion* Yair Lior, Justin Lane, 2022-11-30 The past two decades have seen a growing interest in evolutionary and scientific approaches to religion *The Routledge Handbook of Evolutionary Approaches to Religion* is an outstanding reference source to the key topics problems and debates in this exciting and emerging field Comprising over thirty chapters by a team of international contributors the handbook pulls together scholarship in the following areas evolutionary psychology and the cognitive science of religion CSR cultural evolution the complementarity of evolutionary psychology cognitive science and cultural evolution Within these sections central issues debates and problems are examined including Cliodynamics cultural group selection costly signaling dual inheritance theory

literacy transmitting narratives prosociality supernatural punishment cognition and ritual meme theory fusion theory sexual selection agency detection evoked culture social brain hypothesis theory of mind developmental psychology emergence theory social learning cultural cybernetics cultural epidemiology evolutionary and cultural psychology memetics by product and adaptationist theories of religion systems and information theory and computer modeling This Handbook is essential reading for students and researchers in religious studies and anthropology It will also be very useful to those in related fields such as psychology sociology of religion cognitive biology and evolutionary biology *Understanding Religion* Benson Saler, 2009 Since its founding by Jacques Waardenburg in 1971 Religion and Reason has been a leading forum for contributions on theories theoretical issues and agendas related to the phenomenon and the study of religion Topics include among others category formation comparison ethnophilosophy hermeneutics methodology myth phenomenology philosophy of science scientific atheism structuralism and theories of religion From time to time the series publishes volumes that map the state of the art and the history of the discipline **The Importance of Religion** Gavin Flood, 2011-11-07 The Importance of Religion reveals the significance of religion in modern times showing how it provides people with meaning to their lives and helps guide them in their everyday moral choices Provides readers with a new understanding of religion demonstrating how in its actions texts and world views religion is enduring and vividly engages with the mystery of the world Offers striking arguments about the relationship of religion to science art and politics Engagingly written by a highly respected scholar of religion with an international reputation **Mental Culture** Dimitris Xygalatas, William McCorkle, 2016-04-01 Why is the set of human beliefs and behaviours that we call religion such a widespread feature of all known human societies past and present and why are there so many forms of religiosity found throughout history and culture Mental Culture brings together an international range of scholars from Anthropology History Psychology Philosophy and Religious Studies to answer these questions Connecting classical theories and approaches with the newly established field of the Cognitive Science of Religion the aim of Mental Culture is to provide scholars and students of religion with an overview of contemporary scientific approaches to religion while tracing their intellectual development to some of the great thinkers of the past **The Red Planet** Bill Hatcher, 2024-04-16 We humans have an extraordinary capacity for compassion much of it in response to the atrocities we inflict on the planet its animals and each other The popular explanation for this paradox is that we evolved as carnivorous killer apes who gradually curbed our lust for violence with frequent exceptions by implementing humane social norms This explanation is so well worn especially in the American psyche that it epitomizes cliché So we could be forgiven for believing it when nearly every word is fiction Current research shows that our original biological and social programming is nonviolent So what changed What turned us from goddess worshiping plant eating peacemakers into god worshiping animal eating warmongers Find out in this fresh avant garde nonfiction The Red Planet Gendered Landscapes and Violent Inequalities and learn how our intrinsically feminine predilection for peace may yet save

us *What is Religion?* Idinopulos, Brian C. Wilson, 2018-09-24 What is Religion consists of fourteen essays written by a selection of scholars who represent a wide spectrum of approaches to the academic study of religion Each of the essays is an effort not only to take stock of the present controversy concerning appropriate methodologies for the study of religion but also to take one giant step beyond that to formulate a precise definition of religion Given the considerable confusion today about what it is exactly that religious studies scholars take to be their subject matter when they presume to professionally teach about religion this volume provides a much needed forum for leading scholars to debate and clarify what professors of religious studies understand as the central object or objects under their scrutiny *Religion, Disease, and Immunology* Thomas B. Ellis, 2022-06-02 This book argues that religion has emerged over evolutionary time as a strategy for managing the transmission contraction and eradication of infectious disease From purity and pollution codes to blood sacrifices and irrational beliefs the book shows how religion supports not only the physiological immune system but the behavioral and psychological immune systems as well The book also addresses those moments when it appears that religion becomes maladaptive that is when religion causes autoimmune problems such as celibacy and anti vaccination Engaging material ranging from evolutionary and social psychology to human behavioral ecology biological anthropology Darwinian medicine and religious studies the book proposes that in order to understand the human animal's enduring fascination with religion one must take into account the enduring need to manage infectious disease **Religion and its Evolution** Carl Bruscia, Kim Sterelny, 2023-12-05 This book examines why individuals and communities invest heavily in their religious life through multidisciplinary perspectives It pursues philosophical psychological deep time historical and adaptive answers to this question Religion is a profoundly puzzling phenomenon from an evolutionary perspective Commitment to religions are typically expensive and most of the beliefs that motivate them cannot be true since religious belief systems are inconsistent with one another Yet some form of religion seems to be universal and resilient in historically known cultures though not if archaeology is to be trusted in human communities early in the evolution of our species We have collectively invented religion over about the last 100 000 years Stemming from an interdisciplinary workshop this book grapples with these challenges and features diverse contributions some offer evolutionary and historical analyses identifying hidden adaptive benefits to religion independent of the veracity of religious belief Others see connections between religious commitment and commitment to the social norms that make cooperative life possible and explore aspects of human psychology that make religious belief tempting Broad in scope and theoretically ambitious *Religion and Its Evolution Signals Norms and Secret Histories* will be a key resource for scholars and researchers of religious studies sciences of religion psychology anthropology the cultural evolution of religion and the sociology of religion This book was originally published as a special issue of *Religion Brain Behavior* **Religion: The Basics** Malory Nye, 2008-05-12 From the local to the global level religion is more than ever an important and hotly debated part of modern life in the twenty first century From silver rings to ringtones and from clubs to

headscarves we often find the cultural role and discussion of religion in unexpected ways Now in its second edition Religion The Basics remains the best introduction to religion and contemporary culture available The new edition has been fully revised and updated and includes new discussions of the study of religion and culture in the twenty first century texts films and rituals cognitive approaches to religion globalization and multiculturalism spirituality in the West popular religion With new case studies linking cultural theory to real world religious experience and practice and guides to further reading Religion The Basics is an essential buy for students wanting to get to grips with this hotly debated topic Making Magic Randall Styers,2004 Randall Styers seeks to account for the vitality of scholarly discourse purporting to define and explain magic despite its failure to do just that He argues that it can best be explained in light of the European and Euro American drive to establish and secure their own identity as normative The Oxford Handbook of the Cognitive Science of Religion Justin L. Barrett,2022 Most comprehensive treatment of the cognitive science of religion Includes contributions from the field's founders and its rising stars Explores topics such as human nature ritual and mystical experiences Book jacket Origins of Religion, Cognition and Culture Armin W. Geertz,2014-09-11 Attempts to understand the origins of humanity have raised fundamental questions about the complex relationship between cognition and culture Central to the debates on origins is the role of religion religious ritual and religious experience What came first individual religious ecstatic experiences collective observances of transition situations fear of death ritual competence magical coercion mirror neurons or temporal lobe religiosity Cognitive scientists are now providing us with important insights on phylogenetic and ontogenetic processes Together with insights from the humanities and social sciences on the origins development and maintenance of complex semiotic social and cultural systems a general picture of what is particularly human about humans could emerge Reflections on the preconditions for symbolic and linguistic competence and practice are now within our grasp Origins of Religion Cognition and Culture puts culture centre stage in the cognitive science of religion The Hybrid Face Massimo Leone,2023-12-12 This original and interdisciplinary volume explores the contemporary semiotic dimensions of the face from both scientific and sociocultural perspectives putting forward several traditions aspects and signs of the human utopia of creating a hybrid face The book semiotically delves into the multifaceted realm of the digital face exploring its biological and social functions the concept of masks the impact of COVID 19 AI systems digital portraiture symbolic faces in films viral communication alien depictions personhood in video games online intimacy and digital memorials The human face is increasingly living a life that is not only that of the biological body but also that of its digital avatar spread through a myriad of new channels and transformable through filters post productions digital cosmetics all the way to the creation of deepfakes The digital face expresses new and largely unknown meanings which this book explores and analyzes through an interdisciplinary but systematic approach The volume will interest researchers scholars and advanced students who are interested in digital humanities communication studies semiotics visual studies visual anthropology cultural studies and

Evolutionary Perspectives on Social Psychology Virgil Zeigler-Hill, Lisa L. M. Welling, Todd K. Shackelford, 2015-05-06 This wide ranging collection demonstrates the continuing impact of evolutionary thinking on social psychology research This perspective is explored in the larger context of social psychology which is divisible into several major areas including social cognition the self attitudes and attitude change interpersonal processes mating and relationships violence and aggression health and psychological adjustment and individual differences Within these domains chapters offer evolutionary insights into salient topics such as social identity prosocial behavior conformity feminism cyberpsychology and war Together these authors make a rigorous argument for the further integration of the two diverse and sometimes conflicting disciplines Among the topics covered How social psychology can be more cognitive without being less social How the self esteem system functions to resolve important interpersonal dilemmas Shared interests of social psychology and cultural evolution The evolution of stereotypes An adaptive socio ecological perspective on social competition and bullying Evolutionary game theory and personality Evolutionary Perspectives on Social Psychology has much to offer students and faculty in both fields as well as evolutionary scientists outside of psychology This volume can be used as a primary text in graduate courses and as a supplementary text in various upper level undergraduate courses

Being Religious Mladen Turk, 2013-07-12 What makes us religious What is religion This book presents relevant research and theoretical proposals for evolutionary theories of religion and socially and ecologically adaptive theories of religion Most attempts to study religious behaviors through evolutionary biology and related disciplines are still very fragmentary Mladen Turk brings those theoretical approaches in dialogue with religious studies and theology through interpretation and critique that centers on revealing hidden theological assumptions and interpreting theoretical leaps of those approaches to religion In Being Religious Turk expounds understanding of religion as a complex interplay of various capacities arising from and influencing our biological and cultural makeup Our religious behaviors can influence our relationship towards each other and towards our environment in significant ways He shows how some aspects of complex religious behaviors can be understood better in light of human cognition and evolutionary biology At the same time he interprets this knowledge as being preliminary and at times inadequate in its claims of completeness and exhaustiveness because religious behaviors are niched within other religious behaviors and dependent on factors that various mono causal theoretical approaches cannot fully conceptualize
