**Facing Nuclear War** Donald B. Kraybill, 1982      The New Face of War Bruce D. Berkowitz, 2010-05-11 As American and coalition troops fight the first battles of this new century from Afghanistan to Yemen to the Philippines to Iraq they do so in ways never before seen Until recently information war was but one piece of a puzzle more than a sideshow in war but far less than the sum total of the game Today however we find information war revolutionizing combat from top to bottom Gone are the advantages of fortified positions nothing is impregnable any longer Gone is the reason to create an overwhelming mass of troops now troop concentrations merely present easier targets Instead stealth swarming and zapping precision strikes on individuals or equipment are the order of the day based on superior information and lightning fast decision making In many ways modern warfare is information warfare Bruce Berkowitz's explanation of how information war revolutionized combat and what it means for our soldiers could not be better timed As Western forces wage war against terrorists and their supporters in actions large and small on several continents The New Face of War explains how they fight and how they will win or lose There are four key dynamics to the new warfare asymmetric threats in which even the strongest armies may suffer from at least one Achilles heel information technology competition in which advantages in computers and communications are crucial the race of decision cycles in which the first opponent to process and react to information effectively is almost certain to win and network organization in which fluid arrays of combat forces can spontaneously organize in multiple ways to fight any given opponent at any time America's use of networked elite ground forces in combination with precision guided bombing from manned and unmanned flyers turned Afghanistan from a Soviet graveyard into a lopsided field of American victory Yet we are not invulnerable and the same technology that we used in Kuwait in 1991 is now available to anyone with a credit card and access to the Internet Al Qaeda is adept in the new model of war and has searched long and hard for weaknesses in our defenses Will we be able to stay ahead of its thinking In Iraq Saddam's army is in no position to defeat its enemies but could it defend Baghdad As the world anxiously considers these and other questions of modern war Bruce Berkowitz offers many answers and a framework for understanding combat that will never again resemble the days of massive marches on fortress like positions The New Face of War is a crucial guidebook for reading the headlines from across our troubled planet      The Face of War Martha Gellhorn, 2018-11-20 A collection of first rate frontline journalism from the Spanish Civil War to US actions in Central America by a woman singularly unafraid of guns Vanity Fair For nearly sixty years Martha Gellhorn's fearless war correspondence made her a leading journalistic voice of her generation From the Spanish Civil War in 1937 through the Central American wars of the mid eighties Gellhorn's candid reporting reflected her deep empathy for people regardless of their political ideology Collecting the best of Gellhorn's writing on foreign conflicts and now with a new introduction by Lauren Elkin The Face of War is a classic of frontline journalism by the premier war correspondent of the twentieth century Ward Just The New York Times Magazine Whether in Java Finland the

Middle East or Vietnam she used the same vigorous approach I wrote very fast as I had to she says afraid that I would forget the exact sound smell words gestures which were special to this moment and this place As Merle Rubin noted in his review of this volume for The Christian Science Monitor Martha Gellhorn's courageous independent minded reportage breaks through geopolitical abstractions and ideological propaganda to take the reader straight to the scene of the event     *The Four Faces of Nuclear Terrorism* Charles D. ethical moral and normative implications whether incremental transformative or revolutionary of synthesizing man and machine in future algorithmic warfare or AI enabled centaur warfighting At the heart of these vexing questions are whether we are inevitably moving toward a situation in which AI enabled autonomous weapons will make strategic decisions in place of humans and thus become the owners of those decisions Can AI powered systems replace human commanders And more importantly should they The AI Commander argues that AI cannot be merely passive and neutral force multipliers of human cognition Instead they will likely become either by conscious choice or inadvertently strategic actors in war AI will transform the role and nature of human warfare but not necessarily in the ways most observers expect
