Fact And Relevance Essays On Historical Method:

Fact and Relevance Michael Moïsey Postan, 1971-01-02 A collection of fourteen essays in which Professor Postan draws together for the first time his contributions to the debate on historical method and discusses from a variety of different angles the inter relation of history and the social sciences After making in his first three essays a direct statement of his point of view the author deals with two main aspects of the subject time sequences and theoretical relevance of facts He then proceeds to exemplify his point of view more particularly with relation to macro economics and to certain specific issues within economic history as well as to economic history in general In the final two chapters one is on Karl Marx the other on Hugh Gaitskell he seeks to describe the intellectual climate in which the debate on methodology was held and in which his opinions on the subject were formed The essays contained in this book will be of interest to all those involved in the social sciences economics and history as well as to those specifically concerned with historical methodology *Fact and Relevance* M. M. Postan, 1971 *The Palgrave Companion to Cambridge Economics* Robert A. Cord, 2017-02-20 Cambridge University has and continues to be one of the most important centres for economics With nine chapters on themes in Cambridge economics and over 40 chapters on the lives and work of Cambridge economists this volume shows how economics became established at the university how it produced some of the world's best known economists including John Maynard Keynes and Alfred Marshall plus Nobel Prize winners such as Richard Stone and James Mirrlees and how it remains a global force for the very best in teaching and research in economics With original contributions from a stellar cast this volume provides economists especially those interested in macroeconomics and the history of economic thought with the first in depth analysis of Cambridge economics **Methodology and Method in History (RLE Accounting)** Lee D. Parker, Finley O. Graves, 2013-12-04 This bibliography provides the reader with a comprehensive reference tool that will enhance understanding of methodological issues and enable the user to employ research methods appropriate to their subject of study It also provides accounting historians a comprehensive data base for the development of papers addressing methodological issues in an accounting history context Access to this type of resource is particularly crucial to the development of accounting history research since the number of papers dealing with methodological issues published in accounting history literature is very small Hence the references in this bibliography are drawn from the literature of general history economic and business history legal and social history and philosophy The scope and range of its contents are broad references are taken from texts as well as papers published in over 450 journals **Storia della storiografia**, 2008 **A Marginal Economy?** Mark Bailey, 1989-06-29 A theory of the margin has long featured in the work of medieval historians Marginal regions are taken to be those of poor soil or geographical remoteness where farmers experienced particular difficulties in grain production It is argued that such regions were cultivated only when demographic pressure intensified in the thirteenth century but that a combination of soil exhaustion and demographic decline resulted in severe economic contraction by the

end of the fourteenth century Marginal regions are seen not just as sensitive barometers of economic change but as important catalysts in that change Despite the importance placed by historians on the general theory of the margin this book represents the first detailed study of a marginal region It focuses upon East Anglian Breckland whose blowing sands are among the most barren soils in lowland England Drawing upon a wide range of sources this study reconstructs Breckland's late medieval economy and shows it to be more diversified and resilient than the stereotype depicted in marginal theory

(Not) In the Game Regina Seiwald, Edwin Vollans, 2023-08-21 How do games represent history and how do we make sense of the history of games The industry regularly uses history to sell products while processes of creation and of promotion leave behind markers of a game's history The access to this history is often granted by so called paratexts which are accompanying elements orbiting texts Exploring this fully case studies in this work move the focus of debate from the games themselves to wider ancillary materials and ask how history is used in and how we can use history to study games **Love, Hate, and the Law in Tudor England** L. R. Poos, 2022 Love Hate and the Law in Tudor England reconstructs the life of Ralph Rishton a member of the sixteenth century Lancashire gentry who was a child bridegroom and a serial wife discarder who bribed church officials to obtain a forged annulment defrauded a kinsman out of his inheritance and adroitly manipulated his own and other people's land The dozens of lawsuits in which the Rishtons were involved in many different courts elucidate one family's engagement with law in Tudor England how they used and misused law how it shaped their perceptions of rights and mutual obligations and how it framed litigants and witnesses language Drawing upon trial and estate records the core of this study is the central narrative of Ralph Rishton's three wives of litigiousness and violence marriage and property and the pursuit of equitable resolutions to disputes along with countless smaller narratives that vividly capture a culture in its time and place Alongside that central narrative L R Poos uses the Rishton stories as a starting point to analyse child marriage the construction of memory and the development of local historical identity through antiquarians and the Victorian and Edwardian local press demonstrating how from the time of the Rishtons into the twentieth century historical narratives were continually reshaped and repurposed **The Idea of History in Constructing Economics** Michael H. Turk, 2015-08-11 How scientific is economics This question has often been framed by analogies and correspondences made between economics and other seemingly more well established scientific disciplines starting with classical mechanics At the same time economics is likely to be seen in opposition to or in contrast with history where the reliance upon generalizing rules thought experiments and model construction in economics is set against the amassing of particular facts intended to create narratives in history In this new volume Turk explores the relationship between economics and history including the often fraught one between economics and economic history making the case that economics does in fact require the proper grounding in history that has so often been ignored This work challenges the attempt to link economics with other more clearly scientific disciplines as flawed and fundamentally wrongheaded A key element of this book is its examination of the gaps and

associations that exist in or are seen through linkages with thermodynamics classical mechanics biology literature mathematics philosophy and sociology This exploration is frequently undertaken through study of the work of one or more major figures in the history of economic thought ranging from Quesnay and Smith through Walras and Max Weber to Robinson Krugman David and Arthur Through the possibility of an alternative to the gaps noted in each such comparison the underlying necessary connection between economics and history can be brought out The book concludes by exploring the basis for the positive construction of a historical economics This book is suited for those who study history of economic thought and philosophy of economics **A History of Financial Accounting (RLE Accounting)** J. Edwards, 2013-12-04

This volume deals with the evolution of accounting from earliest times and gives particular attention to corporate accounting developments since the Industrial Revolution The author identifies the various sources of accounting practices employed by British companies to demonstrate the main changes which have taken place when they occurred and why The author emphasises the need to understand the legal social and economic context in which accountancy changes take place and also studies the conflicts which arise between suppliers and users of accounting statements The study concludes with an examination of the duties performed by the professional accountant the extent to which these have changed in the course of time and how his position in society is reinforced by the activities of professional institutions **England 1175-1425**

Edmund King, 2025-05-01 During the years 1175 1425 English society developed in many ways First published in 1979 England 1175 1425 offers an ideal introduction to the period presenting as it does a view of a whole society that is derived from a study of economic social political and administrative history It argues that the later Middle Ages in England saw the creation of a single integrated society with a national economy and a national political consciousness and it shows how this integration came about The foundations of a unified community are seen in chapters on settlement on lordship and on the world of ideas while the development of this community is seen in chapters on political and social themes The author describes how parliament became the political focus of the nation and stresses the importance of warfare and war taxation in this development Original features of the book are the integration into a general survey of work on medieval archaeology and a chapter on ideas which uses a wide range of material to present a picture of the attitudes which governed men s lives The Peasants Revolt of 1381 demonstrates especially clearly the argument that all classes of society shared similar ideas and the episode is examined in detail There is an emphasis throughout on quotations from original sources and these together with the illustrative matter provide a clear picture of a society in a period of change Town and Countryside in Western

Berkshire, C.1327-c.1600 Margaret Yates, 2007 A fresh examination of how society and economy changed at the end of the middle ages comparing urban and rural experience The traditional boundary between the medieval and early modern periods is challenged in this new study of social and economic change that bridges the fifteenth and sixteenth centuries It addresses the large historical questions what changed when and why through a detailed case study of western Berkshire and Newbury

integrating the experiences of both town and countryside Newbury is of particular interest being a rising cloth manufacturing centre that had contacts with London and overseas due to its specialist production of kerseys The evidence comes from original documentary research and the data are clearly presented in tables and graphs It is a book alive with the actions of people famous men such as the clothier John Winchcombe known as Jack of Newbury but more notably by the hundreds of individuals such as William Eyston or Isabella Bullford who acquired property cultivated their lands or in the case of Isabella managed the mill complex after her husband's death MARGARET YATES is Lecturer in History at the University of Reading

Marxism and Historiography Paolo Favilli, 2021-10-22 Eminent Italian historian Giovanni Levi once notably remarked that no one is a Marxist anymore pointing to a paradox in Italian cultural history While what is called Marxism was supposedly hegemonic over Italian culture and especially history writing for decades in the postwar period it then seems to have suddenly disappeared This study questions such a vision of a monolithic and hegemonic Marxism It starts from the most effective anecdote to all ideologising narratives that is research into the texts themselves It sees the Marxist historiography of the post 1945 period as a history in the making in which references to Marxian theory were a fundamental factor driving historiographical innovation This allows the book to bring to light a highly original experience in the development of historiography based on the long Italian tradition of reflection on historical knowledge

Farming the North Sea Coast, 900-2000 Piet van Cruyningen, 2025-04 The author opens a powerful dialogue between agricultural history on the one hand and environmental history on the other a brilliant and provocative synthesis of a thousand years of coastal farming Tim Soens University of Antwerp Belgium The fascinating story of how the North Sea coast has been farmed is ever changing Long before the industrial revolution the inhospitable fens and marshes of the low lying coastal wetlands on both sides of the Sea had been transformed into one of the most productive agricultural regions in Europe Agriculture in the coastlands reached its apogee during the eighteenth and nineteenth centuries as is witnessed by the many impressive farm buildings established then However more recently it has become clear that lowland farming and even the physical existence of the lowlands are in jeopardy owing to rising sea levels and problems of drainage This book offers a history of farming and water management on the North Sea coast assessing the forces driving and inhibiting agricultural progress more broadly It examines the ways in which farmers in the past dealt with the two main constraints on their decision making the natural environment and the human environment of institutional rules and customs regulating behaviour It looks in particular at how setbacks were overcome and how farming practices were improved which then raised the money with which to finance the maintenance of dykes canals and sluices

The Institutional Framework of Russian Serfdom Tracy Dennison, 2011-04-28 Russian rural history has long been based on a Peasant Myth originating with nineteenth century Romantics and still accepted by many historians today In this book Tracy Dennison shows how Russian society looked from below and finds nothing like the collective redistributive and market averse behaviour often attributed to Russian peasants

On the contrary the Russian rural population was as integrated into regional and even national markets as many of its west European counterparts Serfdom was a loose garment that enabled different landlords to shape economic institutions especially property rights in widely diverse ways Highly coercive and backward regimes on some landlords estates existed side by side with surprisingly liberal approximations to a rule of law This book paints a vivid and colourful picture of the everyday reality of rural Russia before the 1861 abolition of serfdom

Custom and Commercialisation in English Rural Society J. Bowen, A. Brown, 2016-03-01 English rural society underwent fundamental changes between the thirteenth and eighteenth centuries with urbanization commercialization and industrialization producing new challenges and opportunities for inhabitants of rural communities However our understanding of this period has been shaped by the compartmentalization of history into medieval and early modern specialisms and by the debates surrounding the transition from feudalism to capitalism and landlord tenant relations Inspired by the classic works of Tawney and Postan this collection of essays examines their relevance to historians today distinguishing between their contrasting approaches to the pre industrial economy and exploring the development of agriculture and rural industry changes in land and property rights and competition over resources in the English countryside

Historical Judgement Jonathan Gorman, 2014-11-27 The historical profession is not noted for examining its own methodologies Indeed most historians are averse to historical theory In Historical Judgement Jonathan Gorman s response to this state of affairs is to argue that if we want to characterize a discipline we need to look to persons who successfully occupy the role of being practitioners of that discipline So to model historiography we must do so from the views of historians Gorman begins by showing what it is to model a discipline by using recent philosophy of law and philosophy of science There are different models at work whose rivalry and resolution are to be historically understood With this approach in place he is able to develop the history of historiography and explore the character of historiography as presented by historians He reveals that historians conform to various norms that historians now and in the past have agreed and disagreed about the same set of interrelated matters truth telling moral judgement and the synthesis of facts and it is this internal understanding that we need to recover if we are to arrive at a correct characterization of the discipline of historiography Demonstrating how the practice of historiography requires choices and therefore the exercise of judgement Gorman is able to show that in their making of judgements historians enjoy the immense benefit of hindsight He shows how in reflecting on their own discipline historians have typically failed to attend adequately to the history of historiography neglecting to situate previous historians within their historical contexts or to pay adequate

attention to the fact that present historians too are within a context that will change In addition Gorman s approach which emphasizes the power and necessity of choice and which rests on the pragmatic holistic empiricism of Quine shows postmodernism not to be the threat that some historians feel it to be indeed it is shown to be a radical form of empiricism Gorman shows how the historical enterprise may be established in our factual and moral understanding in the light of our choices and commitments to a shared world Historical Judgement is an original and important contribution to the philosophy of history By bringing together the ideas of historians and philosophers Gorman presents a much more practitioner focused examination of the discipline of history one that will hopefully encourage historians to think more about the nature of what they do

The Population of the South Dudley L. Poston,Robert H. Weller,2014-11-06 The expression the New South was introduced by Henry Grady editor of the Atlanta Constitution to a New York audience in 1886 every generation of writers since has used the term The southern population unique in its socioeconomic and cultural characteristics has always been a topic of major interest with U S demographers The articles in this book the majority of which were originally presented at the Southern Regional Demographic Group meeting in 1976 deal with fertility mortality migration and the factors that influence these components A number of the contributors trace patterns of demographic change in the South showing convergence with the rest of the United States Questions are raised about whether the convergence represents a permanent trend possibly due to increased communication or whether further divergence may be expected in the future The contributors include Dudley L Poston Jr William J Serow Robert H Weller Ronald R Rindfuss Harry M Rosenberg Drusilla Burnham David F Sly Omer R Galle Robert N Stern Joachim Singelmann Susan E Clarke and George C Myers
