Faculty Of Nursing On The Move:

Faculty of Nursing on the Move Geertje Boschma, 2005 Faculty of Nursing on the Move provides a historical analysis of the Faculty of Nursing at the University of Calgary in contrast and comparison to the broader evolution of academic nursing in Canada. It addresses how the faculty has responded to important social trends and changes in health care policy and helps the reader to understand contemporary nursing issues. Starting with the dramatic changes in health care policy after the Second World War, it establishes the role of nursing education as pivotal to a growing health care industry. The book then moves on to describe the challenge of developing an identity for an academic unit within the larger academic and health care structure. This book will be of particular interest to anyone involved in women's studies as it represents a case study for broader women's issues within an academic environment.

Dr. Nurse Dominique A. Tobbell, 2022-12-28 An analysis of the efforts of American nurses to establish nursing as an academic discipline and nurses as valued researchers in the decades after World War II. Nurses represent the largest segment of the US health care workforce and spend significantly more time with patients than any other member of the health care team. Dr. Nurse probes their history to examine major changes that have taken place in American health care in the second half of the twentieth century. The book examines the major changes in nursing education and the place of nursing in the post-war research university, revealing how federal and state health and higher education policies shaped education within health professions after World War II. Starting in the 1950s, academic nurses sought to construct a science of nursing distinct from that of the related biomedical or behavioral sciences that would provide the basis of nursing practice. Facing broad changes in patient care driven by the introduction of new medical innovations, they worked both to develop science-based nursing practice and to secure their roles within the post-war research university. By their efforts, academic nurses transformed nursing's labor into a valuable site of knowledge production and demonstrated how the application of this knowledge was integral to improving patient outcomes and healthcare delivery. Exploring the knowledge claims, strategies, and politics involved as academic nurses negotiated their roles and nursing's future, Dr. Nurse reveals how state-supported health centers have profoundly shaped nursing education and health care delivery.

Mentoring in Nursing through Narrative Stories Across the World Nancy Rollins Gantz, Thóra B. Hafsteinsdóttir, 2023-07-15 The book explores the theoretical background of mentoring and how mentoring is used by nurses in all arenas where they work in health care, education, research, policy, politics, and academia in supporting nurses with their professional and career development. Over 300 mentors and mentees from a wide range of countries across all continents share their stories of mentoring, reflecting on their development in leadership, clinical practice, education, research, and politics. The book describes various types of mentoring, including more traditional types of mentoring as well as virtual, online, and peer mentoring. During the mentorship trajectories, the nurses address an inclusive collection of issues that they are faced with and share supporting strategies. The book highlights the importance of mentoring for nurses to support

their personal and professional leadership development Also it emphasizes the importance of mentoring for when nurses engaged in variety of projects that could entail or encompass evidence based clinical practice development within education research in the clinical arena policy formation political affairs or cultural inclusion that present significant impact in patient care and healthcare outcomes within and across countries With The Future of Nursing 2020 2030 Charting a Path to Achieve Health Equity report from the National Academies of Sciences published in 2021 the role of nursing will become ever more dynamic and therefore the profession of nursing must be visible in improving and securing the future for patients families and communities across the globe Mentoring practices to build the profession s leaders are forever essential acute and imperative This book shows how mentoring can support nurses in further developing nursing as a profession and scientific discipline across countries to support clinical application of evidence based practice and nursing education and research dissemination Accordingly this book shares essential diverse and pioneering expertise through wide range of narrative stories that will benefit nurses at all years of experience from early career nurses emerging leaders nurse educators leaders policy makers and nurse scientists around the globe The nursing profession must magnify its position in health care and nurses need to proliferate their contributions throughout the globe They can accomplish that through mentoring and growing and nurturing other nurses to advance and thrive in today s world *Advanced Practice Nursing* Lucille A Joel,2017-10-20 Meet all the challenges of professional practice whatever your specialty or environment Noted nursing professionals and educators explore all of the non clinical roles and responsibilities of an APN and chart a course that will enable you to meet them successfully You ll follow the evolution of the APN s role from a historical perspective to the present and examine the issues and challenges you ll encounter in the future **The British Journal of Nursing with which is Incorporated the Nursing Record ...** ,1919 **Curriculum Development and Evaluation in Nursing Education** Sarah B.
