**Liberation Technology** Larry Diamond, Marc F. Plattner, 2012-07-30 The revolutions sweeping the Middle East provide dramatic evidence of the role that technology plays in mobilizing citizen protest and upending seemingly invulnerable authoritarian regimes A grainy cell phone video of a Tunisian street vendor's self immolation helped spark the massive protests that toppled longtime ruler Zine El Abidine Ben Ali and Egypt's Facebook revolution forced the ruling regime out of power and into exile While such liberation technology has been instrumental in freeing Egypt and Tunisia other cases such as China and Iran demonstrate that it can be deployed just as effectively by authoritarian regimes seeking to control the Internet stifle protest and target dissenters This two sided dynamic has set off an intense technological race between netizens demanding freedom and authoritarians determined to retain their grip on power Liberation Technology brings together cutting edge scholarship from scholars and practitioners at the forefront of this burgeoning field of study An introductory section defines the debate with a foundational piece on liberation technology and is then followed by essays discussing the popular dichotomy of liberation versus control with regard to the Internet and the sociopolitical dimensions of such controls Additional chapters delve into the cases of individual countries China Egypt Iran and Tunisia This book also includes in depth analysis of specific technologies such as Ushahidi a platform developed to document human rights abuses in the wake of Kenya's 2007 elections and alKasir a tool that has been used widely throughout the Middle East to circumvent cyber censorship Liberation Technology will prove an essential resource for all students seeking to understand the intersection of information and communications technology and the global struggle for democracy Contributors Walid Al Saqaf Daniel Calingaert Ronald Deibert Larry Diamond Elham Gheytanchi Philip N Howard Muzammil M Hussain Rebecca MacKinnon Patrick Meier Evgeny Morozov Xiao Qiang Rafal Rohozinski Mehdi Yahyanejad

Not in Front of the Children Marjorie Heins, 2007-09-11 From Huckleberry Finn to Harry Potter from Internet filters to the v chip censorship exercised on behalf of children and adolescents is often based on the assumption that they must be protected from indecent information that might harm their development whether in art in literature or on a Web site But where does this assumption come from and is it true In Not in Front of the Children Marjorie Heins explores the fascinating history of indecency laws and other restrictions aimed at protecting youth From Plato's argument for rigid censorship through Victorian laws aimed at repressing libidinous thoughts to contemporary battles over sex education in public schools and violence in the media Heins guides us through what became and remains an ideological minefield With fascinating examples drawn from around the globe she suggests that the harm to minors argument rests on shaky foundations

**Computer Crime** Indira Carr,2017-07-05 Alongside its positive impact of providing a global reach the Internet is prone to a variety of abuses In the 1990s it was unauthorised access of computers and impairment of the operation of computers through the introduction of viruses and worms that took centre stage Since then the potential of the Internet for fraudulent activities has been realised by the criminal fraternity and in recent years we have seen for instance the rise of identity theft and the widespread distribution of offensive and illegal materials The collection of essays in this volume while being highly selective provides a snapshot of the parameters of computer crime the legal response and discussions surrounding ways to improve the security of cyberspace

*Holocaust Denial and the Law* R. Kahn,2004-06-18 From 1978 1996 Holocaust denial emerged as a major concern for the liberal democracies of Europe and North America This period also saw the first prosecutions of Holocaust deniers But these prosecutions often ran into trouble Holocaust Denial and the Law relates how courts in four countries Canada France Germany and the United States resolved the dilemmas posed by Holocaust denial litigation It also describes how in the United States student editors had to decide whether to run ads denying the Holocaust The book concludes that a given country's resolution of these dilemmas turns on its specific legal traditions and historical experiences

**Crime and the Internet** David Wall,2003-09-02 Is the internet really powerful enough to allow a sixteen year old to become the biggest threat to world peace since Adolf Hitler Are we all now susceptible to cyber criminals who can steal from us without even having to leave the comfort of their own armchairs These are fears which have been articulated since the popular development of the internet yet criminologists have been slow to respond to them Consequently questions about what cybercrimes are what their impacts will be and how we respond to them remain largely unanswered Organised into three sections this book engages with the various criminological debates that are emerging over cybercrime The first section looks at the general problem of crime and the internet It then describes what is understood by the term cybercrime by identifying some of the challenges for criminology The second section explores the different types of cybercrime and their attendant problems The final section contemplates some of the challenges that cybercrimes give rise to for the criminal justice system

Adams,2009-03-09 Geographies of Media and Communication From the invention of the telegraph to the emergence of the Internet communications technologies have transformed the ways that people and places relate to each other Geographies of Media and Communication is the first textbook to treat all aspects of geography's variegated encounter with communication Connecting geographical ideas with communication theories such as intertextuality audience centered theory and semiotics Paul C Adams explores media representations of places the spatial diffusion of communication technologies and the power of

communication technologies to transform places and to dictate who does and does not belong in them      **Cybercrime** David Wall,2007-09-17 Looking at the full range of cybercrime and computer security he shows how the increase in personal computing power available within a globalized communications network has affected the nature of and response to criminal activities We have now entered the world of low impact multiple victim crimes in which bank robbers for example no longer have to meticulously plan the theft of millions of dollars New technological capabilities at their disposal now mean that one person can effectively commit millions of robberies of one dollar each Against this background David Wall scrutinizes the regulatory challenges that cybercrime poses for the criminal and civil justice processes at both the national and the international levels Book jacket      Threat Talk Mary Manjikian,2016-02-24 Threat Talk exposes how US and Chinese scientists and policy makers have understood and responded to the problem of internet addiction in their societies Is the internet good or bad for society American analysts like Lessig and Zittrain suggest that the internet is inherently liberating and positive for society while Morozov and Sageman warn that the internet poses risks to citizens and societies Using a comparative framework to illustrate how the two states differ in their assessments of the risks to citizens posed by the introduction of new technology Mary Manjikian compellingly argues that both risk and disease are ideas which are understood differently at different historic periods and in different cultures Her culturalist approach claims that the internet is neither inherently helpful nor inherently threatening Rather its role and the dangers it poses may be understood differently by different societies Is the internet good or bad for society The answer it appears is it depends      Cyberprotest Jenny Pickerill,2013-07-19 Uses case studies and voices of activists themselves to examine the role of the internet at all levels of environmental activism Contemporary analysis of forms and processes of radical environmental activism Contemporary analysis of forms and processes of radical environmental activism Documents the negotiations and achievements of environmentalists both in dealing with the tensions of using environmentally damaging technology and in avoiding surveillance and counter strategies Will be of interest to students and academics of politics sociology environmental studies and anyone who has ever wondered if signing an email petition will make a difference
