Vanhoozer, 2003-07-31 Postmodernity allows for no absolutes and no essence Yet theology is concerned with the absolute the essential How then does theology sit within postmodernity Is postmodern theology possible or is such a concept a contradiction in terms Should theology bother about postmodernism or just get on with its own thing Can it Theologians have responded in many different ways to the challenges posed by theories of postmodernity In this introductory 2003 guide to a complex area editor Kevin J Vanhoozer addresses the issue head on in a lively survey of what talk about God might mean in a postmodern age and vice versa The book then offers examples of different types of contemporary theology in relation to

postmodernity while the second part examines the key Christian doctrines in postmodern perspective. Leading theologians contribute to this clear and informative Companion which no student of theology should be without. Encyclopedia of Religion and Nature Bron Taylor, 2008-06-10. The Encyclopedia of Religion and Nature originally published in 2005 is a landmark work in the burgeoning field of religion and nature. It covers a vast and interdisciplinary range of material from thinkers to religious traditions and beyond with clarity and style. Widely praised by reviewers and the recipient of two reference work awards since its publication, see [www.religionandnature.com](http://www.religionandnature.com). **Making a Way Out of No Way** Monica A. Coleman, 2008. A womanist theology of change. Integrates postmodern thought, womanist theology, and process philosophy. *Shadowing the Anthropocene: Eco-Realism for Turbulent Times* Adrian Ivakhiv, 2018. A spectre is haunting humanity: the spectre of a reality that will outwit and in the end bury us. The Anthropocene or The Human Era is an attempt to name our geological fate that we will one day disappear into the layer cake of Earth's geology while highlighting humanity in the starring role of today's earthly drama. In *Shadowing the Anthropocene*, Adrian Ivakhiv proposes an ecological realism that takes as its starting point humanity's eventual demise. The only question for a realist today, he suggests, is what to do now and what quality of compost to leave behind with our burial. The book engages with the challenges of the Anthropocene and with a series of philosophical efforts to address them, including those of Slavoj Žižek and Charles Taylor, Graham Harman, and Timothy Morton, Isabelle Stengers, and Bruno Latour, and William Connolly and Jane Bennett. Along the way, there are volcanic eruptions and revolutions, ant cities and dog parks, data clouds and space junk, pagan gods and sacrificial altars, dark flow, souls of things, and jazz. Ivakhiv draws from centuries-old process-relational thinking that harkens back to Daoist and Buddhist sages but gains incisive reinvigoration in the philosophies of Charles Sanders Peirce and Alfred North Whitehead. He translates those insights into practices of engaged Anthropocenic bodymindfulness, aesthetic, ethical, and ecological practices for living in the shadow of the Anthropocene. Development and Justice Rajula Annie Watson, 2004. Restoring the health of the land is indispensable, not only because it is the ground of our sustenance and survival but also because land has in itself the inherent worth. This book challenges humanity's indulgence and activities of development, science, and technology and insists on human responsibility and moral duties towards the land, the sustaining mother earth, which is abused, ransacked of its wealth, and ignored of its intrinsic value. The study attempts to bring together perspectives and values that are important for preserving the rights of the land and proposes the contour of a land ethic. **After Nature's Revolt** Dieter T. Hessel, 2003-03-27. Living with the consequences of modern Western abuse of the environment has alerted many to the need to change, not simply their habits but also their worldview. A true faith-centered eco-justice ethic asserts the contributors to this volume will recognize the intrinsic links between social justice questions and environmental ones. It will also demand reassessment of fundamental assumptions, many of them from Christian theology, that

stand behind Western social economic and technological patterns Introduced by Hessel s illuminating assessment of specific environmental challenges the theologians in this volume rethink aspects of Christian doctrines lifestyle and spirituality They tackle key environmental issues And together they pioneer a theological perspective that moves beyond anthropocentrism to a new center in creation itself Ecotheology David G. Hallman,2009-09-01 A new and urgent item on the agenda of churches around the world is the theological and ethical dimensions of the ecological crisis Highlighted by the United Nations Earth Summit in Brazil the issues covered in this volume raise unavoidable and fundamental questions of the life style and Christian witness in the face of threats to the very survival of humankind and planet Earth The groundbreaking essays by more than two dozen contributors in this book are divided into five sections biblical witness theological challenges insights from ecofeminism insights from indigenous people and ethical implications Contributors include Jos P M Cunanan Philippines Margot Kaessmann Germany Renthly Keitzar India K C Abraham India Tony Brun Costa Rica Milton B Efthimiou United States Wesley Granberg Michaelson World Council of Churches Kwok Pui lan Hong Kong Larry Rasmussen United States Samuel Rayan India M Adebisi Sowunmi Nigeria Tsehai Berhane Selassie Ethiopia Chung Hyun Kyung South Korea Aruna Gnanadason India Anne Primavesi United Kingdom Rosemary Radford Ruether United States Rob Cooper New Zealand Stan McKay Canada George Tinker United States Edward Antonio Zimbabwe Leonardo Boff Brazil M L Daneel South Africa David G Hallman Canada Dieter T Hessel United States Catherine Keller United States Theological Foundations for Environmental Ethics Jame Schaefer,2009 This book asks whether religion can make a positive contribution to preventing further destruction of biological diversity and ecosystems and threats to our earth The author reconstructs the teachings of Augustine Thomas Aquinas and other classic thinkers to reflect our current scientific understanding of the world

Nicholson,John Dupré,2018 Against the traditional view of the living world as fundamentally composed of enduring things this book argues for the radical alternative is that it essentially consists of processes Biology is the study of the processes that constitute living beings and the things biologists study ultimately derive their existence from more basic processes Nature and Time, Volume II Dong In Baek,2025-02-20 Unlock a transformative perspective on peace and reconciliation with Nature and Time Volume II Paths to Justice and Transformation In this compelling work Baek Dong In invites the reader to reimagine the intricate interplay between nature time and history transcending traditional boundaries to offer fresh insights into unity on the Korean Peninsula Drawing from the profound ideas of philosophers like Heidegger Kant and Nietzsche this book challenges the notion of Korea as a static entity mired in past conflicts Instead it portrays the peninsula as a dynamic evolving space shaped by diverse historical cultural and ideological currents By weaving together theology philosophy and socio political analysis Baek reveals how the rhythms of nature and the cycles of time can illuminate new paths toward reconciliation This isn t just a

theoretical exploration it s a call to action Nature and Time Volume II encourages readers to engage deeply with the forces that shape the world offering a holistic approach to healing divisions and fostering peace not only in Korea but wherever conflict persists Join this enlightening journey and discover how the convergence of nature and time can inspire justice and transformation in the shared human experience      **Whitehead and China** Wenyu Xie,Zhihe Wang,George E.

Adams,Josephine Donovan,1995-11-14 Animals and Women is a collection of pioneering essays that explores the theoretical connections between feminism and animal defense Offering a feminist perspective on the status of animals this unique volume argues persuasively that both the social construction and oppressions of women are inextricably connected to the ways in which we comprehend and abuse other species Furthermore it demonstrates that such a focus does not distract from the struggle for women s rights but rather contributes to it This wide ranging multidisciplinary anthology presents original material from scholars in a variety of fields as well as a rare early article by Virginia Woolf Exploring the leading edge of the species gender boundary it addresses such issues as the relationship between abortion rights and animal rights the connection between woman battering and animal abuse and the speciesist basis for much sexist language Also considered are the ways in which animals have been regarded by science literature and the environmentalist movement A striking meditation on women and wolves is presented as is an examination of sexual harassment and the taxonomy of hunters and hunting Finally this compelling collection suggests that the subordination and degradation of women is a prototype for other forms of abuse and that to deny this connection is to participate in the continued mistreatment of animals and women
