the Arab Islamic world      *Revival: Achieving Schooling for All in Africa (2003)* Christopher Colclough, Samer Al-Samarrai, Mercy Tembon, 2017-09-29 This title was first published in 2003 Sub Saharan Africa has the lowest primary enrolments of any major region in the developing world and the number of children out of school is increasing at a faster rate here than anywhere else in the developing world This timely study in line with the Millennium Development Goals examines the methods adopted by the international community to tackle the chronic problems of schooling and poverty in developing countries Incorporating the results of research conducted at both macro and micro levels using a range of methodologies it examines the national differences in school enrolments using a regional and international comparative framework Utilizing both cross section and household survey data the book examines the causes of under enrolment in a micro context based on results from a major international research programme on gender and primary schooling in Africa The challenges for international aid to provide resources and help secure reforms in support of the international development goals in education are also outlined This book will appeal to researchers and teachers on African development officials in international agencies working on education and development and Government officials in African education      **Contemporary Women's Movements in Hungary** Katalin Fábián, 2009-10-14 As the first and only book in any language on contemporary women s movements in Hungary this groundbreaking study focuses on the role of women s activism in a society where women are not yet adequately represented by established parties and political institutions Drawing on eyewitness accounts of meetings and protests as well as first person interviews with leading female activists Katalin F bi n examines the interactions between women s groups in Hungary and studies the unique brand of democracy they have forged in postcommunist Eastern Europe Through her analysis she demonstrates how democratization and globalization with their attendant range of challenges and opportunities have led women to redefine public private divides      *Perspectives Of The Silent Majority : Air Pollution, Livelihood And Food Security* Amitava Mukherjee, 2002      **Poverty Reduction in the 1990s** Alison Evans, 2000-01-01 The World Development Report 1990 Poverty provided the foundation for the World Bank strategy to help achieve global poverty reduction This report is a contribution to the strategy review process It examines the implementation of the 1990 strategy maps changes against assessment of Bank performance at both the country and the project level and assesses the relevance of key elements of the 1990 strategy in light of new data and shifts in the development assistance environment The report concludes that the 1990 strategy remains relevant but needs to be combined with a more comprehensive approach Lessons from experience confirm the importance of a holistic approach to reach the poor more effectively This includes a focus on local level institutions and building on existing institutional frameworks wherever possible and on working across sectors for maximum impact The 1990 strategy and the operational guidelines based on it have failed to generate a clear emphasis on measuring and monitoring results A critical test of the Bank s evolving poverty strategy will be the design of a credible framework for measuring the results of the Bank s country assistance and helping to build local capacity for monitoring the

impact of poverty reduction programmes The report is in English with the foreword and the executive summary given in English Spanish and French      **The Right to Development and International Economic Law** Isabella D

Bunn,2012-03-01 The United Nations is commemorating the 25th anniversary of the 1986 Declaration on the Right to Development which proclaimed the right to be an inalienable human right by virtue of which every human person and all peoples are entitled to participate in contribute to and enjoy economic social cultural and political development in which all human rights and fundamental freedoms can be realized The UN now aims to mainstream the right into its policies and operational activities and is reviewing prospects for an internationally binding legal instrument The evolution of the right to development however has been dominated by debates about its conceptual validity and practical ramifications It has been hailed as the cornerstone of the entire human rights system and criticized as a distracting ideological initiative Questions also persist about the role of the right in reforming the international economic order This book examines the legal and moral foundations of the right to development addressing the major issues It then considers the right to development in the global economy noting the challenges of globalization and identifying key principles such as differential treatment of developing countries participation and accountability It relates the right to broad objectives such as the Millennium Development Goals the human rights based approach to development and environmental sustainability Implications for international economic law and policy in the areas of trade development finance and corporate responsibility are assessed The conclusion looks to the legal and ethical contributions and limitations of the right to development in this new context With an academic and professional background in international law human rights and moral theology the author brings a unique interdisciplinary focus to this timely project      The Civil Corporation Simon Zadek,2012-05-04 The Civil Corporation is an award winning classic well recognized as the most insightful exploration of contemporary developments in responsible business practices and their implications for business strategy and public policy This revised second edition adds a significant new section describing and reflecting on developments since the book s first publication in 2001 This new material draws on the author s practical experience over the last five years working as Chief Executive of Account Ability with some of the world s leading businesses and public bodies on policies and practices that advance the emerging shift in businesses role in society This book is top drawer reading for business professionals management students and academics and activists and public servants It goes to the heart of the issue of business in society cutting through the rhetoric of campaigners and business speak alike in framing the tough questions in balanced and yet provocative terms Crucially it connects an insightful vista of the broader landscape with a set of practical dos for businesses and their stakeholders that have stood the test of time The accolade of winning the prestigious Academy of Management Award in 2006 confirms that Zadek has achieved what every author aspires to a book that is both timely and timeless in its application This revised edition builds on this success by providing new information and insights for practitioners academics and students      *Comparative Economic Systems* Steven

Rosefielde,2015-04-30 Comparative Economic Systems Culture Wealth and Power in the 21st Century explains how culture in various guises modifies the standard rules of economic engagement creating systems that differ markedly from those predicted by the theory of general market competition This analysis is grounded in established principles but also assumes that individual utility seeking may be culturally determined that political goals may take precedence over public well being and that business misconduct may be socially detrimental *Positive Psychology in Practice* P. Alex Linley,Stephen Joseph,2012-06-27 A thorough and up to date guide to putting positive psychology into practice From the Foreword This volume is the cutting edge of positive psychology and the emblem of its future Martin E P Seligman Ph D Fox Leadership Professor of Psychology University of Pennsylvania and author of Authentic Happiness Positive psychology is an exciting new orientation in the field going beyond psychology s traditional focus on illness and pathology to look at areas like well being and fulfillment While the larger question of optimal human functioning is hardly new Aristotle addressed it in his treatises on eudaimonia positive psychology offers a common language on this subject to professionals working in a variety of subdisciplines and practices Applicable in many settings and relevant for individuals groups organizations communities and societies positive psychology is a genuinely integrative approach to professional practice Positive Psychology in Practice fills the need for a broad comprehensive and state of the art reference for this burgeoning new perspective Cutting across traditional lines of thinking in psychology this resource bridges theory research and applications to offer valuable information to a wide range of professionals and students in the social and behavioral sciences A group of major international contributors covers The applied positive psychology perspective Historical and philosophical foundations Values and choices in pursuit of the good life Lifestyle practices for health and well being Methods and processes for teaching and learning Positive psychology at work The best and most thorough treatment of this cutting edge discipline Positive Psychology in Practice is an essential resource for understanding this important new theory and applying its principles to all areas of professional practice Private or Socialistic Forestry? Matti Palo,Erkki Lehto,2012-02-13 While deforestation continues at an alarming rate around the world discussions on the range of underlying causes continue The premise is that studying successful transitions from deforestation to sustainable forestry ex post in Finland can provide novel insights into how deforestation in the tropics might be reduced in the future Our fundamental question here is why Finland succeeded to stop deforestation for a century ago and why not the same is feasible in the contemporary tropical countries This book presents a novel integrated theory within which this case study on Finland and contemporary modeling of underlying causes of tropical deforestation are developed Finland remains the world s second largest net exporter of forest products while maintaining the highest forest cover in Europe A transition from deforestation to sustainable industrial forestry took place in Finland during the first part of the 20th century The underlying causes of this transition are compared via our theory with deforestation in 74 contemporary tropical countries Both appear similar and support our theory The interaction of public policies and market

institutions has appeared to be critical during this transition The study s findings suggest that private forest ownership with a continuous increase in the real value of forests and alleviation of poverty under non corruptive conditions has been a necessary but not a sufficient condition for this transition In a parallel way public policies have also proved to be a necessary but not sufficient condition in this transition The conclusion is that socialistic forestry along with corruption is artificially maintaining too low values in the tropical forests The opportunity cost of sustainable forestry remains too high and deforestation by extensification of agriculture therefore continues The prevailing socialistic forestry with dominating public forest ownership is by purpose maintaining administratively set low stumpage prices leading to low value of forests wide corruption and continuous forest degradation and deforestation An effective remedy to raise the value of forests is found to be within forestry

*The Capability Approach and Sustainability* Ortrud Lessmann, Felix Rauschmayer, 2016-03-16 This is the first book dedicated exclusively to the question of the relationships between sustainability and the capability approach It is rather astonishing that the issue of sustainability first posed by the Brundtland commission in 1987 has gained so little attention from capability scholars despite the approach s focus on human well being This book starts with a seminal contribution by Sen on the Ends and Means of Sustainability delivered as a keynote in 2000 All contributions to the book focus on the difficulties that arise from a freedom oriented view of sustainability they argue for taking note of the impact of human life on nature they question the meaning of intergenerational justice when measured in the currency of substantive freedoms capabilities they raise the issue of collective responsibility and suggest ways to model and operationalize the capability approach to sustainable development The book presents the state of the art concerning The capability approach and sustainability while admitting that it is only a first contribution to a growing field that deserves our attention Defining what is to be sustained and asking how it can be sustained This book was published as a special issue of the Journal of Human Development and Capabilities

**Politics as Usual** Thomas W. Pogge, 2013-04-24 Worldwide human lives are rapidly improving Education health care technology and political participation are becoming ever more universal empowering human beings everywhere to enjoy security economic sufficiency equal citizenship and a life in dignity To be sure there are some specially difficult areas disfavoured by climate geography local diseases unenlightened cultures or political tyranny Here progress is slow and there may be set backs But the affluent states and many international organizations are working steadily to extend the blessings of modernity through trade and generous development assistance and it won t be long until the last pockets of severe oppression and poverty are gone Heavily promoted by Western governments and media this comforting view of the world is widely shared at least among the affluent Pogge s new book presents an alternative view Poverty and oppression persist on a massive scale political and economic inequalities are rising dramatically both intra nationally and globally The affluent states and the international organizations they control knowingly contribute greatly to these evils selfishly promoting rules and policies harmful to the poor while hypocritically pretending to

set and promote ambitious development goals Pogge s case studies include the 1 day poverty measurement exercise the cosmetic statistics behind the first Millennium Development Goal the War on Terror and the proposed relaxation of the constraints on humanitarian intervention A powerful moral analysis that shows what Western states would do if they really cared about the values they profess      **Nationalism and Exclusion of Migrants** Mérove Gijsberts,Louk Hagendoorn,2017-07-05 This ground breaking book draws on a variety of comparative surveys to provide a unique account of the relationship between nationalist attitudes and the exclusion of migrants across a range of European countries the US Canada and Australia      Geography of Deprivation Bimalendu Bhattacharya,2014-01-01 Poverty Hunger and Malnutrition worldwide are the major focus of this book taken up as the principal areas of human deprivation with wide geographical variations as determined by different factors Gender discrimination in its various manifestations and child abuse also feature very prominently as other forms of deprivation corroding life and attitudes of people requiring very serious concern to deal with the prevailing humiliating situation along with an assessment of the earth s capability of redressing human sufferance through poverty and hunger      **Assessing Quality of Life and Living Conditions to Guide National Policy** Michael R.
