Human Rights An Interdisciplinary Approach Key Concepts:

Human Rights Michael Freeman, 2011-04-11 Introducing readers to the theory and practice of human rights this text emphasises how the experiences of the victims of human rights violations are related to legal philosophical and social scientific approaches to human rights

Human Rights Michael Freeman, 2002-12-02 Human Rights is an introductory text that is both innovative and challenging It invites students to think conceptually about one of the most important and influential political concepts of our time In this unique interdisciplinary approach Michael Freeman emphasizes the complex ways in which the experiences of the victims of human rights violations are related to legal philosophical and social scientific approaches to human rights By tracing the history of the concept the book shows that there is a fundamental tension between the philosophy of human rights and the way in which it is understood in the social sciences This analysis throws light on some of the most controversial issues in the field Is the idea of the universality of human rights consistent with respect for cultural difference Are there collective human rights Should feminists embrace revise or reject the idea of human rights Does the idea of human rights distract our attention from the structural causes of oppression and exploitation What are the underlying causes of human rights violations And why do some countries have much worse human rights records than others The book will appeal to students in the social sciences as well as students of human rights law who want an introduction to the non legal aspects of their subject It will also be read by scholars interested in ethics and the social sciences as well as the general reader

Human Rights Michael A. Freeman, 2003-09

The Idea of a Human Rights Museum Karen Busby, Adam Muller, Andrew Woolford, 2015-09-25 The Idea of a Human Rights Museum is the first book to examine the formation of the Canadian Museum for Human Rights and to situate the museum within the context of the international proliferation of such institutions Sixteen essays consider the wider political cultural and architectural contexts within which the museum physically and conceptually evolved drawing comparisons between the CMHR and institutions elsewhere in the world that emphasize human rights and social justice This collection brings together authors from diverse fields law cultural studies museum studies sociology history political science and literature to critically assess the potentials and pitfalls of human rights education through ideas museums Accessible engaging and informative the collection s essays will encourage museum goers to think more deeply about the content of human rights exhibits The Idea of a Human Rights Museum is the first title in the University of Manitoba Press s Human Rights and Social Justice Series This series publishes work that explores the quest for social justice and the basic rights and freedoms to which all human beings are entitled including civil political economic social collective and cultural rights

Human Rights Worldwide Zehra F. Kabasakal Arat, 2006-06-08 This work offers an insightful guide to the global struggle for human rights the problems and shortcomings of the international human rights regime and the resources essential to human rights studies From royal decrees in the ancient kingdoms of Persia and Babylon to the latest controversies over reform of the United Nations establishing

international human rights norms has been a recurrent if sometimes elusive objective in world affairs Internationally and domestically controversies over human rights continue to fuel endless debate in politics legal discourse and the media International human rights norms and treaties have helped to put Balkan war criminals behind bars but genocidal acts continue in other parts of the world Can governments equipped with coercive power eliminate human rights abuses Who will counterbalance the increasing power of transnational corporations How effective are the NGOs Do human rights become a luxury under threats to the national security

Globalization: The Key Concepts Annabelle Mooney, Betsy Evans, 2007-03-12 Viewed as a destructive force or an inevitability of modern society globalization is the focus of a multitude of disciplines A clear understanding of its processes and terminology is imperative for anyone engaging with this ubiquitous topic Globalization the Key Concepts offers a comprehensive guide to this cross disciplinary subject and covers concepts such as homogenization neo Liberalism risk knowledge society time space compression reflexivity With extensive cross referencing and suggestions for further reading this book is an essential resource for students and interested readers alike as they navigate the literature on globalization studies

Human Rights Albert A. Zinnos, 2007 Human rights refers to the concept of human beings as having universal rights or status regardless of legal jurisdiction and likewise other localising factors such as ethnicity and nationality For many the concept of human rights is based in religious principles However because a formal concept of human rights has not been universally accepted the term has some degree of variance between its use in different local jurisdictions difference in both meaningful substance as well as in protocols for and styles of application Ultimately the most general meaning of the term is one which can only apply universally and hence the term human rights is often itself an appeal to such transcended principles without basing such on existing legal concepts The term humanism refers to the developing doctrine of such universally applicable values and it is on the basic concept that human beings have innate rights that more specific local legal concepts are often based Within particular societies human rights refers to standards of behaviour as accepted within their respective legal systems regarding 1 the well being of individuals 2 the freedom and autonomy of individuals and 3 the representation of the human interest in government These rights commonly include the right to life the right to an adequate standard of living the prohibition of genocide freedom from torture and other mistreatment freedom of expression freedom of movement the right to self determination the right to education and the right to participation in cultural and political life These norms are based on the legal and political traditions of United Nations member states and are incorporated into international human rights instruments This new book brings together the latest book literature centred on this crucial topic

Decolonization and the Evolution of International Human Rights Roland Burke, 2011-06-06 In the decades following the triumphant proclamation of the Universal Declaration of Human Rights in 1948 the UN General Assembly was transformed by the arrival of newly independent states from Asia Africa and the Middle East This diverse constellation of states introduced new ideas methods and priorities to the human

rights program Their influence was magnified by the highly effective nature of Asian Arab and African diplomacy in the UN human rights bodies and the sheer numerical superiority of the so called Afro Asian bloc Owing to the nature of General Assembly procedure the Third World states dominated the human rights agenda and enthusiastic support for universal human rights was replaced by decades of authoritarianism and an increasingly strident rejection of the ideas laid out in the Universal Declaration In *Decolonization and the Evolution of International Human Rights* Roland Burke explores the changing impact of decolonization on the UN human rights program By recovering the contributions of those Asian African and Arab voices that joined the global rights debate Burke demonstrates the central importance of Third World influence across the most pivotal battles in the United Nations from those that secured the principle of universality to the passage of the first binding human rights treaties to the flawed but radical step of studying individual pleas for help The very presence of so many independent voices from outside the West and the often defensive nature of Western interventions complicates the common presumption that the postwar human rights project was driven by Europe and the United States Drawing on UN transcripts archives and the personal papers of key historical actors this book challenges the notion that the international rights order was imposed on an unwilling and marginalized Third World Far from being excluded Asian African and Middle Eastern diplomats were powerful agents in both advancing and later obstructing the promotion of human rights

Rights
Lydia Morris, 2006-04-18 This pioneering book demonstrates how different traditions of sociological thought can contribute to an understanding of the theory and practice of rights It provides a sociological treatment of a wide range of substantive issues but never loses sight of the key theoretical questions It considers some varied cases of public intervention including welfare caring mental health provisions pensions justice and free speech alongside the rights issues they raise examines the question of rights from the point of view of distinctive population groups such as prisoners and victims women ethnic minorities indigenous peoples and lesbians and gays A key strength is its detailed presentation and analysis of different aspects of rights and its exploration of a variety of analytical perspectives Rights are viewed not in terms of ethical certainty but as the product of social processes and part of shifting terrain which is open to negotiation Including a theoretical critique of existing perspectives *Rights* offers a diverse and detailed exploration of the contribution sociological thought can make to this increasingly important aspect of social life and is an invaluable aid to students studying in this area

Statehood and Self-Determination Duncan French, 2013-02-21 The concepts of statehood and self determination provide the normative structure on which the international legal order is ultimately premised As a system of law founded upon the issue of territorial control ascertaining and determining which entities are entitled to the privileges of statehood continues to be one of the most difficult and complex issues Moreover although the process of decolonisation is almost complete the principle of self determination has raised new challenges for the metropolitan territories of established states including the extent to which internal self determination guarantees additional rights for minority and other groups As the controversies

surrounding remedial secession have revealed the territorial integrity of a state can be questioned if there are serious and persistent breaches of a people's human rights This volume brings together such debates to reflect further on the current state of international law regarding these fundamental issues **Reconciliation and Colonial Power** Damien

Short, 2016-04-08 In 1991 Australia instigated a national reconciliation project between indigenous and non-indigenous people Despite being the longest running reconciliation process there has been no authoritative study of Australian reconciliation to date **Reconciliation and Colonial Power** is the first book to analyze Australian reconciliation as a process filling a significant gap in theoretical and empirical understanding Damien Short offers a sociological interpretation of this process which suggests that rather than being a genuine attempt at atonement Australian reconciliation is perhaps better understood as the latest stage in the colonial project He considers the relevance of acknowledgement and apology restitution and rights nation building and state legitimacy to the reconciliation project This work compliments the burgeoning literature on reconciliation theory and practice and provides fertile material for comparisons with reconciliation processes in other countries such as Chile and South Africa **The Multilingual Citizen** Lisa Lim, Christopher Stroud, Lionel Wee, 2018-02-27

In this ground breaking collection of essays the editors and authors develop the idea of Linguistic Citizenship This notion highlights the importance of practices whereby vulnerable speakers themselves exercise control over their languages and draws attention to the ways in which alternative voices can be inserted into processes and structures that otherwise alienate those they were designed to support The chapters discuss issues of decoloniality and multilingualism in the global South and together retheorize how to accommodate diversity in complexly multilingual multicultural societies Offering a framework anchored in transformative notions of democratic and reflexive citizenship it prompts readers to critically rethink how existing contemporary frameworks such as Linguistic Human Rights rest on disempowering forms of multilingualism that channel discourses of diversity into specific predetermined cultural and linguistic identities **Handbook of Probation**

Loraine Gelsthorpe, Rod Morgan, 2013-05-13 This Handbook provides a comprehensive authoritative and up to date source of information and analysis about all aspects of the work of the Probation Service It takes full account of the many changes that the Probation Service has undergone over the last few years and is currently undergoing as probation becomes part of the broader National Offender Management Service Contributors to the book are drawn from leading academics and practitioners in the field drawing upon the best expertise available Running through the book is a concern with a range of key current issues such as addressing the diversity of offenders and creating effective links with other criminal justice agencies and it includes perspectives from both probation service staff and from offenders and victims This book is an essential text for practitioners trainees and students of probation and those studying it as part of a wider criminology or criminal justice course **Key Concepts in Public Archaeology** Gabriel Moshenska, 2017-09-28 This book provides a

broad overview of the key concepts in public archaeology a research field that examines the relationship between

archaeology and the public in both theoretical and practical terms While based on the long standing programme of undergraduate and graduate teaching in public archaeology at UCL's renowned Institute of Archaeology the book also takes into account the growth of scholarship from around the world and seeks to clarify what exactly public archaeology is by promoting an inclusive socially and politically engaged vision of the discipline Written for students and practitioners the individual chapters provide textbook level introductions to the themes theories and controversies that connect archaeology to wider society from the trade in illicit antiquities to the use of digital media in public engagement and point readers to the most relevant case studies and learning resources to aid their further study This book was produced as part of JISC's Institution as e Textbook Publisher project Find out more at <https://www.jisc.ac.uk/rd/projects/institution-as-e-textbook-publisher> Praise for *Key Concepts in Archaeology* Littered throughout with concise and well chosen case studies *Key Concepts in Public Archaeology* could become essential reading for undergraduates and is a welcome reminder of where archaeology sits in UK society today *British Archaeology* [Routledge International Handbook of Children's Rights Studies](#) Wouter Vandenhoe, Ellen Desmet, Didier Reynaert, Sara Lembrechts, 2015-03-24 Since the adoption of the UN Convention on the Rights of the Child 1989 children's rights have assumed a central position in a wide variety of disciplines and policies This handbook offers an engaging overview of the contemporary research landscape for those people in the theory and practice of children's rights The volume offers a multidisciplinary approach to children's rights as well as key thematic issues in children's rights at the intersection of global and local concerns The main approaches and topics within the volume are Law social work and the sociology of childhood and anthropology Geography childhood studies gender studies and citizenship studies Participation education and health Juvenile justice and alternative care Violence against children and female genital mutilation Child labour working children and child poverty Migration indigenous children and resource exploitation The specially commissioned chapters have been written by renowned scholars and researchers and come together to provide a critical and invaluable guide to the challenges and dilemmas currently facing children's rights *An Interdisciplinary Approach to Vulnerability* Carolina Montero Orphanopoulos, 2025-05-17 This book examines vulnerability as an anthropological category unveiling its profound role in defining human existence Through an exploration of relationality dependence and finitude it sheds light on how vulnerability shapes human experience and our shared fragility Engaging with key philosophical psychological bioethical and sociological traditions the volume invites readers to reconsider vulnerability not as a limitation but as a foundation for connection and solidarity With this approach the book lays the groundwork for a deeper understanding of human nature enriched by interdisciplinary dialogue A precursor to the theological and ethical reflections developed in the second volume this work redefines vulnerability as central to the human condition [Sedation at the End-of-life: An Interdisciplinary Approach](#) Paulina Taboada, 2014-10-21 The book's main contribution is its interdisciplinary approach to the issue of sedation at the end of life Because it occurs at the end of life palliative sedation

raises a number of important ethical and legal questions including whether it is a covert form of euthanasia and for what purposes it may legally be used Many of the book chapters address the first question and almost all deal with a specific form of the second whether palliative sedation should be used for those experiencing existential suffering This raises the question of what existential suffering is a topic that is also discussed in the book The different chapters address these issues from the perspectives of the relevant disciplines Palliative Medicine Bioethics Law and Theology Hence helpful accounts of the clinical and historical background for this issue are provided and the importance of drawing accurate ethical and legal distinctions is stressed throughout the whole book So the volume represents a valuable contribution to the emerging literature on this topic and should be helpful across a broad spectrum of readers philosophers theologians and physicians [Encyclopedia of Anthropology](#) H. Constitutionalism, Democracy and Religious Freedom Hans-Martien ten Napel, 2017-05-18 In both Europe and North America it can be argued that the associational and institutional dimensions of the right to freedom of religion or belief are increasingly coming under pressure This book demonstrates why a more classical understanding of the idea of a liberal democracy can allow for greater respect for the right to freedom of religion or belief The book examines the major direction in which liberal democracy has developed over the last fifty years and contends that this is not the most legitimate type of liberal democracy for religiously divided societies Drawing on theoretical developments in the field of transnational constitutionalism Hans Martien ten Napel argues that redirecting the concept and practice of liberal democracy toward the more classical notion of limited constitutional government with a considerable degree of autonomy for civil society organizations would allow greater religious pluralism The book shows how in a postsecular and multicultural context modern

sources of constitutionalism and democracy supplemented by premodern transcendental legitimation continue to provide the best means of legitimating Western constitutional and political orders

Exploring Betty A. Reardon's Perspective on Peace Education Dale T. Snauwaert, 2019-05-15 This book presents commentaries by a leading international group of peace education scholars and practitioners concerning Reardon's peace education theory and intellectual legacy. The guiding question throughout the book is: How can her foundational work be used to advance the theory and practice of peace education? In an attempt to find answers, the contributing authors explore three general areas of inquiry: 1. Theoretical Foundations of Peace and Human Rights Education; 2. Feminism and the Gender Perspective as Pathways of Transformation Toward Peace and Justice; and 3. Peace Education Pedagogy and Practices. A contemplative commentary by Reardon herself rounds out the coverage.

Embracing the Song of Appearance: An Emotional Symphony within **Human Rights An Interdisciplinary Approach Key Concepts**

In a world taken by monitors and the ceaseless chatter of instant transmission, the melodic splendor and psychological symphony developed by the prepared word often disappear in to the back ground, eclipsed by the persistent sound and distractions that permeate our lives. Nevertheless, set within the pages of **Human Rights An Interdisciplinary Approach Key Concepts** a marvelous fictional treasure brimming with raw thoughts, lies an immersive symphony waiting to be embraced. Crafted by a masterful composer of language, this interesting masterpiece conducts viewers on a psychological trip, well unraveling the hidden melodies and profound influence resonating within each carefully constructed phrase. Within the depths of this poignant evaluation, we will investigate the book is main harmonies, analyze its enthralling publishing style, and surrender ourselves to the profound resonance that echoes in the depths of readers souls.
