Humanitarian Challenges And Intervention:

Humanitarian Challenges And Intervention Thomas G Weiss, Cindy Collins, 1996-09-30 There are two distinct contemporary challenges to the relief of war induced human suffering one that occurs within the institutions that make up the international humanitarian system the other on the ground in war zones Varied interests resources and organizational structures within institutions hamper the efficiency and effectiveness of humanitarian operations At the same time on the ground ethical legal and operational challenges and dilemmas continually arise that require humanitarian actors to choose a course of action with associated necessary evils Humanitarian Challenges and Intervention shows how institutional concerns combined with the domestic context of armed conflicts often yield policies that do not serve the immediate requirements of victims for relief stabilization and community reconstruction Based on case studies of the post Cold War experience in Central America northern Iraq Somalia the former Yugoslavia and Rwanda the authors make recommendations for a more effective and efficient humanitarian system

G Weiss and Cindy Collins make recommendations for a more effective international humanitarian system The Prevention and Intervention of Genocide Samuel Totten, 2011-12-31 Over the last twenty years the world has witnessed four major genocides There was the genocide in Iraq 1988 in Rwanda 1994 in Srebrenica 1995 and in Darfur 2003 and continuing Most observers agree there is an urgent need to assess the international community's efforts to prevent genocide and to intervene once a genocide is under way in an effective and timely manner This volume the latest in a widely respected series on the subject of genocide provides an overview of a host of issues germane to this task The book begins with a cogent discussion of the issues of prevention and intervention during the Cold War years The second chapter discusses the abject failures and moderate though in some cases highly controversial successes at prevention and intervention carried out in the 1990s and early 2000s Further chapters examine latest efforts to develop an effective genocide early warning system and examine the complexity of and barriers to prevention The pros and cons of sanctions and the problems of enforcement and evaluation their effectiveness are then discussed Conflicts between state sovereignty and the protection of threatened populations are examined both in historical context and by incorporating the latest thinking Later chapters treat the issue of intervention why and how it has met with only limited success Concentrating on Rwanda and Srebrenica chapter 8 discusses various peace operations that were abject failures and those that were moderately successful The concept of an anti genocide regime is examined in terms of progress in developing such a regime as well as what the international community must do in order to implement it Chapters discuss key issues related to post genocidal periods those that need to be addressed in order to establish stability in a wounded land and populace as well as to prevent future genocides The final chapter asks whether bringing perpetrators to justice has any impact in breaking impunity ensuring deterrence and bringing about reconciliation The contributors to the volume are all noted scholars some of whom specialize in the study of genocide and others who specialize in such areas as early warning peacekeeping and sanctions *Humanitarianism and Challenges of Cooperation* Volker Heins, Kai Koddenbrock, Christine Unrau, 2016-02-05 Humanitarianism as a moral concept and an organized practice has become a major factor in world society It channels an enormous amount of resources and serves as an argument for different kinds of interference into the internal affairs of countries and regions At the same time and for these very reasons it is an ideal testing ground for successful and unsuccessful cooperation across borders Humanitarianism and the Challenges of Cooperation examines the multiple humanitarianisms of today as a testing ground for new ways of global cooperation General trends in the contemporary transformation of humanitarianism are studied and individual cases of how humanitarian actors cooperate with others on the ground are investigated This book offers a highly innovative empirically informed account of global humanitarianism from the point of view of cooperation research in which internationally renowned contributors analyse broad trends and present case studies based on meticulous fieldwork This book will be of great interest to students and researchers in the areas of political science international relations and humanitarianism It is also a valuable

resource for humanitarian aid workers **Emerging Security Challenges** Seung-Whan Choi, 2018-02-16 This book looks into four areas of our world's international security crisis: the growing threat of America's homegrown jihadists; the continuing rise of terrorism; the causes of gross violations of human rights; and the pervasiveness of civil war. When American jihadists join such international terrorist organizations as the Islamic State of Iraq and Syria and Al Qaeda, the danger to security and stability is often magnified on both global and domestic fronts. The global rise of terrorism in turn causes a deterioration in the quality of human rights for politically disadvantaged people or minority groups within a national territory; meanwhile, the internal crisis created by terrorist violence and human rights violations can expedite the development of civil war, which is likely to endanger domestic and international stability. Taking a consistent theoretical and empirical approach, *Emerging Security Challenges: American Jihad, Terrorism, Civil War, and Human Rights* explicates the relationships among these four closely related areas of concern for national security. Each chapter presents systematic empirical evidence of security trends for more than 100 sample countries, determined using the most current statistical methods, and concludes with practical policy recommendations.

You Decide! Edward R. Drachman, Alan Shank, 2003 The book touches on nearly every facet of international relations today, including terrorism, global warming, child labor, and AIDS.

Culture and International Law Hikmahanto Juwana, Jeffrey Thomas, Mohd Hazmi Mohd Rusli, Dhiana Puspitawati, 2019-09-03 In this era of globalization, International Law plays a significant role in facing rapid development of various legal issues. Cultural preservation has emerged as an important legal issue that should be considered by States. This book consists of academic papers presented and discussed during the 9th International Conference of the Centre of International Law Studies (CILS) Conference held in Malang, Indonesia, 2-3 October 2018. The title of the book represents the major theme of the conference: Culture and International Law. It is argued that along with globalization, cultural preservation is slowly ignored by States. Various papers presented in the book cover five topics: cultural heritage, cultural rights, culture and economic activity, culture and armed conflict, and a general topic. The authors of the papers are outstanding academics from various countries: Lithuania, United States of America, Australia, Thailand, and Indonesia. The conference was organized by Universitas Indonesia in collaboration with Brawijaya University. This book aims to give a useful contribution to the existing literature on International Law, specifically focussing on cultural issues from the perspective of cultural heritage and rights, economic as well as armed conflict.

International Intervention in the Post-Cold War World Michael C. Davis, Wolfgang Dietrich, Bettina Scholdan, 2017-07-28 International intervention on humanitarian grounds has been a contentious issue for decades. First, it pits the principle of state sovereignty against claims of universal human rights. Second, the motivations of intervening states may be open to question when avowals of moral action are arguably the fig leaf covering an assertion of power for political advantage. These questions have been salient in the context of the Balkan and African wars and U.S. policy in the Middle East. This volume undertakes a serious, systematic, and broadly international review of the issues.

NATO and Peace Support

Operations, 1991-1999 Henning Frantzen,2004-12-17 This new book addresses the key question of how NATO and three of its member states are configuring their policies and military doctrines in order to handle the new strategic environment This environment is increasingly dominated by new wars more precisely civil wars within states and peacekeeping as the strategy devised by outside actors for dealing with them The book seeks to explain how this new strategic environment has been interpreted and how the new conflicts and peacekeeping have been fitted into defence and war key concepts in the field of security studies

Protection Against Genocide Neal Riemer,2000-03-30 Without succumbing to utopian fantasies or realistic pessimism Riemer and his contributors call for strengthening the key institutions of a global human rights regime developing an effective policy of prudent prevention of genocide working out a sagacious strategy of keenly targeted sanctions political economic military judicial and adopting a guiding philosophy of just humanitarian intervention They underscore significant changes in the international system the end of the Cold War economic globalization the communications revolution that hold open the opportunity for significant if modest movement toward strengthening key institutions The essays explore key problems in working toward prevention of genocide They highlight the existence of considerable early warning of genocide and emphasize that the real problem is a lack of political will in key global institutions Sanctions especially economic sanctions may punish a genocidal regime but at the expense of innocent civilians Thus more clearly targeted sanctions are seen as essential The argument on behalf of a standing police force to deal with the crime of genocide as they show is powerful and controversial powerful because the need is persuasive controversial because political realists question its cost and political feasibility Implementing a philosophy of just humanitarian intervention requires an appreciation of the difficulties of interpreting those principles in difficult concrete situations A permanent international criminal tribunal to deter and punish genocide they argue will put into place a much needed component of a global human rights regime A thoughtful analysis for scholars and students of international politics and law and human rights in general

International Law and the Use of Force Anthony Clark Arend,Robert J. Beck,2014-02-04 When the United Nations Charter was adopted in 1945 states established a legal paradigm for regulating the recourse to armed force In the years since then however significant developments have challenged the paradigm s validity causing a paradigmatic shift International Law and the Use of Force traces this shift and explores its implications for contemporary international law and practice

Globalizing Care Fiona Robinson,2018-10-08 This book broadens the scope of thinking about ethics in global social relations criticizing the leading traditions in international ethics and exploring the ways in which some strands of feminist moral philosophy may offer an alternative perspective to view ethics in international relations

Human Rights, Human Security, and State Security Saul Takahashi,2014-07-15 This book provides innovative thinking from a variety of perspectives on the important human rights human security and national security policy issues of today and how these issues intersect The issue of human security comes into play in nearly every important policy debate in global politics and the

protection of human rights is now recognized as one of the main functions of any legitimate modern state How can the international community best ensure that human rights are protected while simultaneously protecting state security Who should intervene in cases of mass gross violations and when are military actions justified This book seeks to address and explore these difficult and pressing questions by presenting the differing views of commentators from various ends of the spectrum Human Rights Human Security and State Security The Intersection consists of three volumes with each focusing primarily on one of the three broad areas while also drawing connections between them A powerful resource for policy makers and practitioners in national governments members of international organizations and scholars the innovative thinking presented will give readers a deepened understanding of the various international issues and help them to formulate effective policies in today's complex international landscape

International Law and Ethnic Conflict David

Wippman, 2018-09-05 The breakup of the former Yugoslavia demonstrates the limitations of international law in the face of ethnic conflict The contributors to this book examine the various roles international law and international institutions play in dealing with ethnic conflict International Law and Ethnic Conflict first covers general philosophical historical and cultural issues arising from attempts to apply international law to ethnic conflict The authors assess the legitimacy of demands based on group identity the legal rights of ethnic groups the validity of various entitlement claims and the meaning of statehood They then consider the institutional and policy responses of international organizations and states in their attempts to deal with ethnic conflict and analyze the extent to which various forms of intervention prove successful

UN-Tied Nations

Kate Seaman, 2016-02-24 With the recent developments in Syria the United Nations is once again making headlines The failure to reach an agreement on a Security Council resolution demonstrates the continued problems in forging a coherent international response to crisis situations This lack of coherence continues despite recognition of the need for more cooperation to solve the growing list of global problems With the relative success of global governance initiatives in relation to the environment health issues and economic problems the focus has increasingly shifted to the problems of international security This timely and important book represents a response to that shift and the implications this has for the wider international system Using a number of relevant case studies including the UN interventions in Bosnia Somalia Burundi the Democratic Republic of Congo and East Timor it examines the securitisation of global governance through the prism of United Nations Peacekeeping Operations and demonstrates that the development of both global governance and global security governance have transformed the environment in which international organisations such as the United Nations are operating Moreover this book brings together a number of the key academic debates surrounding both global security governance and peacekeeping It combines an examination of the power relations of global security governance with the changing nature of peacekeeping operations By bringing the two areas together the book for the first time bridges existing literatures and debates from theoretical discussions of global governance to practical examinations of peacekeeping

operations UN Tied Nations provides a concise and analytical introduction to the ongoing debates around the development of global governance global security governance and the continuous impact these are having on the ability of the United Nations to act as an international peacekeeper *Strategy in the Contemporary World* John Baylis,2007 Provides a coverage of issues of war and peace such as terrorism irregular warfare and weapons of mass destruction This work contains a set of reflections on the role of military power in the contemporary world It analyzes conflicts from Afghanistan to the Iraq War and looks at the debates about the lessons that can be learned from these wars **Leashing the Dogs of War** Chester A. Crocker,Fen Osler Hampson,Pamela R. Aall,2007 The definitive volume on the sources of contemporary conflict and the array of possible responses to it **UN Peacekeeping Operations and the Protection of Civilians** Conor Foley,2017-09-07 This book is based on the author s experience of working for more than two decades in over thirty conflict and post conflict zones It is written for those involved in UN peacekeeping and the protection of civilians It is intended to be accessible to non lawyers working in the field who may need to know the applicable legal standards relating to issues such as the use of force and arrest and detention powers on the one hand and the delivery of life saving assistance according to humanitarian principles on the other It will also be of interest to scholars and students of peacekeeping international law and international relations on the practical dilemmas facing those trying to operationalise the various conceptions of protection during humanitarian crises in recent years
