Innovations In Computerized Assessment:

Innovations in Computerized Assessment Fritz Drasgow, Julie B. Olson-Buchanan, 1999-03-01 Computerized assessment offers many opportunities for innovations in measurement In contrast to static paper and pencil instruments computerized assessment can capitalize on the dynamic capabilities of the computer For example the difficulty of administered items can be adopted to the ability of the examinee thus eliminating items that are too hard or too easy Multimedia computers provide the opportunity to revolutionize assessment Stereo sound animation and full motion video can be incorporated into assessment tools and aid in the measurement of individual differences ranging from musical skills to interpersonal abilities Innovations in Computerized Assessment presents the experiences of leading researchers in computerized assessment The book places particular emphasis on the dilemmas that were faced by the researchers Questions addressed include What problems did they confront What were the pros and cons of various options How were dilemmas resolved Were the solutions good ones *Innovations in Computerized Assessment* Fritz Drasgow, Julie B. Olson-Buchanan, 1999-03 This book presents the challenges dilemmas faced by leading researchers as they created their new computerized assessments It examines the potential for computerized assessment in the fields of psychometrics I O psychology educational measurement

Computer-Based Testing Craig N. Mills, Maria T. Potenza, John J. Fremer, William C. Ward, 2005-04-11 Although computer based tests CBT have been administered for many years improvements in the speed and power of computers coupled with reductions in their cost have made large scale computer delivery of tests increasingly feasible CBT is now a common form of test delivery for licensure certification and admissions tests Many large scale high stakes testing programs have introduced CBT either as an option or as the sole means of test delivery Although this movement to CBT has to a great extent been successful it has not been without problems Advances in psychometrics are required to ensure that those who rely on test results can have at least the same confidence in CBTs as they have in traditional forms of assessment This volume stems from an ETS sponsored colloquium in which more than 200 measurement professionals from eight countries and 29 states convened to assess the current and future status of CBT The formal agenda for the colloquium was divided into three major segments Test Models Test Administration and Test Analysis and Scoring Each segment consisted of several presentations followed by comments from noted psychometricians and a break out session in which presenters and discussants identified important issues and established priorities for a CBT research agenda This volume contains the papers presented at the colloquium the discussant remarks based on those papers and the research agenda that was generated from the break out sessions Computer Based Testing Building the Foundation for Future Assessments is must reading for professionals scholars and advanced students working in the testing field as well as people in the information technology field who have an interest in testing

Computer-Based Testing and the Internet Dave Bartram, Ron Hambleton, 2005-09-27 No topic is more central to innovation and current practice in testing and assessment

Development and Validation of a Computerized Adaptive EFL Test Lianzhen He, Shangchao Min, 2024-02-27 The book reports on the development and validation of a computerized adaptive EFL test which is used as an exit requirement for non English major undergraduates at a major Chinese university Unlike the tests reported in previous research on computerized adaptive language test CALT which were mostly designed to assess vocabulary grammar and reading this test consists of listening and reading components using both dichotomously scored stand alone items and polytomously scored testlet based items The book is an essential and stimulating read for researchers and graduate students in the testing domain particularly for those who are interested in CALT item response theory IRT and quantitative research methods in general It also constitutes a solid reference resource for L2 teachers and test developers One of the distinctive features of the book is its operationalization of assessment use argument AUA in the investigation of the construct validity of the CALT Another strength of this book is that it provides insight into the specific procedures that are followed in the development of CALTs and addresses a few key issues such as local item dependence and DIF detection that were ignored in previous CALT development research

Advances in Computerized Scoring of Complex Item Formats Brian E. Clauser, 2014-07-16 This special issue was motivated by the move from research to operations for computerized delivery and scoring of complex constructed response items The four papers presented provide an overview of the state of the art for such applications The issue begins by describing the range of computer delivered formats and computerized scoring systems that are currently in use The remaining papers provide three views of validity in the context of computer delivered and scoring assessments It is hoped that together these articles will provide the reader with both an appreciation of the state of the art for computer automated scoring systems as well as a perspective on the issues that must be considered and the evidence that must be collected to produce automated scoring systems that allow for valid inference
