creative and critical works of Nigerian playwright and novelist Femi Euba to demonstrate the place and function of African cultures in modernity and makes the case for the vibrancy of such cultures in the shaping and constitution of the modern world In addition to a critique of Euba's fifty year artistic career this book offers an account of Euba's formative relationship with the 1986 Nobel Prize for Literature winner Wole Soyinka during the promising days of the Nigerian theatre in the immediate post independence period and the effect of this relationship on Euba's artistic choices and reflections Euba contributes to our understanding of Africa's negotiation of modernity in significant ways especially in his sensitive reading of Esu the Yoruba god of fate and chance as an artistic consciousness whose historical and ideological mobility during New World slavery during Africa's colonial period and in the manifestations in the black diaspora today emblemizes the process we call modernity By using ritual myth and satire as avenues to the debate on modernity Euba lays emphasis on the transformative possibilities at the crossroads of history His works engage the psychological interconnections between old gods and new worlds and the dialogic relationship between tradition and modernity Delineating the philosophical and literary debates that reject an easy division between a stereotypically traditional Africa and a modern West the author shows how Euba's plays and novel engage the entwined and intimate relationships between the modern and the traditional in contemporary Africa and thereby she asserts the global resonance of Euba's African and specifically Yoruba conception of the world By meticulously collecting cataloguing and critiquing Euba's works Osagie models a new way of practicing African literary studies and invites us to glimpse narrative genius on the continent that she firmly believes African scholars should both promote and celebrate

Difference Todd May, 1997-04-15 French philosophy since World War II has been preoccupied with the issue of difference. Specifically, it has wanted to promote or to leave room for ways of living and of being that differ from those usually seen in contemporary Western society. Given the experience of the Holocaust, the motivation for such a preoccupation is not difficult to see. For some thinkers, especially Jean-Luc Nancy, Jacques Derrida, Emmanuel Levinas, and Gilles Deleuze, this preoccupation has led to a mode of philosophizing that privileges difference as a philosophical category. Nancy privileges difference as a mode of conceiving community; Derrida as a mode of conceiving linguistic meaning; Levinas as a mode of conceiving ethics; and Deleuze as a mode of conceiving ontology. Reconsidering Difference has a twofold task: the primary one critical and the secondary one reconstructive. The critical task is to show that these various privilegings are philosophical failures. They wind up for reasons unique to each position endorsing positions that are either incoherent or implausible. Todd May considers the incoherencies of each position and offers an alternative approach. His reconstructive task, which he calls contingent holism, takes the phenomena under investigation—community, language, ethics, and ontology—and sketches a way of reconceiving them that preserves the motivations of the rejected positions without falling into the problems that beset them.

English for Academic Research: Vocabulary Exercises Adrian Wallwork, 2012-09-19 This book is based on a study of referees' reports and letters from journal editors on reasons why papers written by non-native researchers are rejected due to problems with English: long sentences, redundancy, poor structure, etc. It draws on English-related errors from around 5000 papers written by non-native authors, around 3000 emails, 500 abstracts by PhD students, and over 1000 hours of teaching researchers how to write and present research papers. The exercises are organized into nine chapters on adjectives and adverbs (e.g., actual vs. current, different vs. several, continually vs. continuously), link words (e.g., on the contrary vs. on the other hand, despite vs. nevertheless), nouns (e.g., danger vs. hazard, measure vs. measurement), prepositions (e.g., among vs. between, in vs. into, with vs. within), verbs (e.g., check vs. control, compose vs. comprise, arise vs. raise), and false friends and synonyms. Spelling and useful phrases are also included. Nearly all exercises require no actual writing but simply choosing between various options, thus facilitating self-study, reading, and rapid progress. The exercises can also be integrated into English for Academic Purposes (EAP) and English for Special Purposes (ESP) courses at universities and research institutes. The book can be used in conjunction with the other exercise books in the series: English for Academic Research Writing Exercises, English for Academic Research Grammar Exercises.

Topsy-turvy 1585 Robin D. Gill, 2004 In 1585, Luis Frois, a 53-year-old Jesuit who spent all of his adult life in Japan, listed 611 ways Europeans and Japanese were contrary, completely opposite to one another. Robin D. Gill, a 53-year-old writer who spent most of his adulthood in Japan, translates these topsy-turvy claims: we sniff the top of our melons to see if they are ripe; they sniff the bottom of theirs. 10% of the book examines their validity; 20% of the book plays with them; 70% of the book is for readers with the intellectual horsepower to enjoy ideas. Readers will be grateful for pages discussing things like the significance of black and white clothing or large eyes vs. small ones, while others with a ken
