**Ornaments and Other Ambiguous Artifacts from Franchthi** Catherine Perlès, 2023-12-05 The famous Franchthi Cave excavations in Greece brought to light an exceptionally long sequence of ornaments spanning from the earliest Upper Paleolithic to the end of the Neolithic This volume focuses on the Neolithic whose assemblages are far more diversified than those of earlier times The introduction during the Neolithic of entirely artificial shapes geometric and anthropomorphic creates a marked departure from earlier periods and shows new directions in creativity by the bead makers It also denotes a conceptual break in the treatment of shell no longer solely a natural element barely modified by perforation but now also a raw material rendered anonymous by workmanship Due to the systematic sieving of the sediments and its location by the sea the Franchthi cave and its outdoor settlement the Paralia yielded one of the richest collection of ornaments for Neolithic Greece **The Wider Island of Pelops** David Michael Smith, William G. Cavanagh, Angelos Papadopoulos, 2023-03-23 This volume explores the myriad ways in which pottery was created utilized and experienced in the prehistoric Aegean across a period of more than 4000 years between the Middle Neolithic and the Early Iron Age transition Deities, Dolls, and

Devices Lauren E. Talalay, 2018-10-26 A report on the prehistoric ceramic figurines recovered from the Franchthi Cave in Greece Talalay reports on a small body of figurines twenty four figurines and twenty one fragments recovered during excavations at Franchthi Cave and at the nearby open air settlement along the present shoreline She also reexamines the theoretical and methodological foundations of scholarship in the field of figurine studies A thorough and pathfinding study of the most important body of figurines from southern Greece this book will be especially valuable to specialists in prehistoric Greece and to all scholars interested in early representations of the human figure in prehistoric art and in the significance of these representations to the members of early human communities The book also makes a contribution to the growing body of literature on gender in early societies with a critical evaluation of the uses of evidence in addressing gender issues Do I Really Want to Be an Archaeologist? Mattson,2021-06-09 Objects of adornment have been a subject of archaeological historical and

ethnographic study for well over a century Within archaeology personal ornaments have traditionally been viewed as decorative embellishments associated with status and wealth materializations of power relations and social strategies or markers of underlying social categories such as those related to gender class and ethnic affiliation *Personal Adornment and the Construction of Identity* seeks to understand these artefacts not as signals of steady pre existing cultural units and relations but as important components in the active and contingent constitution of identities Drawing on contemporary scholarship on materiality and relationality in archaeological and social theory this book uses one genre of material culture items of bodily adornment to illustrate how humans and objects construct one another Providing case studies spanning 10 countries three continents and more than 9 000 years of human history the authors demonstrate the myriad and dynamic ways personal ornaments were intertwined with embodied practice and identity performativity the creation and remaking of social memories and relational collections of persons materials and practices in the past The authors careful analyses of production methods and composition curation heirlooming and reworking decorative attributes and iconography position within assemblages and depositional context illuminate the varied material and relational axes along which objects of adornment contained social value and meaning When paired with the broad temporal and geographic scope collectively represented by these studies we gain a deeper appreciation for the subtle but vital roles these items played in human lives

Theory and Practice in Mediterranean Archaeology Richard M. Leventhal, John K. Papadopoulos, 2003-12-31 *Theory and Practice in Mediterranean Archaeology Old World and New World Perspectives* brings together leading scholars from the Old World and the Americas to discuss some of the most pressing issues facing archaeology today These topics include archaeology and text the future of large scale archaeological fieldwork at individual sites interpretation and preservation of archaeological sites and landscapes past trajectories and new approaches to regional survey and debates surrounding landscape and settlement archaeology Essays by Old World archaeologists provide an overview of these themes as well as a history of research over the last hundred years These scholars review the major successes and shortcomings of that work identifying critical issues that determine and define the field These essays serve as a springboard for discussion and response by archaeologists working in the Americas and in other parts of the world The combination of an Old World focus with responses from New World archaeologists provides a uniquely broad assessment of contemporary archaeological theory methods and practice throughout the world

**Living Well Together? Settlement and Materiality in the Neolithic of South-East and Central Europe** Alasdair Whittle, Daniela Hofmann, Douglass W. Bailey, 2008-03-15 *Living*

Well Together investigates the development of the Neolithic in southeast and central Europe from 6500-3500 cal BC with special reference to the manifestations of settling down. A collection of reports and comments on recent fieldwork in the region. Living Well Together provides 14 tightly written and targeted papers presenting interpretive discussions from important excavations and reassessments of our understanding of the Neolithic. Each paper makes a significant contribution to existing knowledge about the period and the book like its companion *Unsettling the Neolithic Oxbow* 2005 will be a benchmark text for work in this region. The reports in Living Well Together play out the critical questions posed in the earlier volume: how should one interpret settlement? what of the difference between tells and flat sites? what do we mean by permanent occupation? can we avoid the assumptions that underlie claims for year-round residence or seasonal occupation? why in some regions and at some times did people maintain residence for so many generations? that monumental tell settlements grew to dominate the visual and social landscape? what would a viewshed analysis of tells reveal? what are the dynamics of households in Neolithic Greece? how should we see the emergence of pottery in terms of material culture and what were the origins of the LBK and how can we understand its development? The volume's authors have succeeded in attacking existing thought in provoking new discussion and in creating new paths to understanding the nature of human existence in the Neolithic. Together they set a new agenda for studying the Neolithic across and beyond southeastern and central Europe.

Ceramics Before Farming Peter Jordan, Marek Zvelebil, 2016-06-03 A long overdue advancement in ceramic studies this volume sheds new light on the adoption and dispersal of pottery by non-agricultural societies of prehistoric Eurasia. Major contributions from Western Europe, Eastern Europe and Asia make this a truly international work that brings together different theories and material for the first time. Researchers and scholars studying the origins and dispersal of pottery, the prehistoric peoples of Eurasia and flow of ancient technologies will all benefit from this book.

**The Neolithic Settlement** Elizabeth C. Banks, 2016-01-28 This volume complements *Lerna V: The Neolithic Pottery of Lerna* by K. D. Vitelli and completes the primary publication of the results of the Neolithic remains retrieved during the excavations conducted by the American School of Classical Studies at Athens from 1952 through 1958 at Lerna in the Argolid. It presents the buildings and other features of the Neolithic settlement with listings of related pottery, minor objects, lithics, fauna and a catalogue of the minor objects. The study reveals a small agricultural community of Middle Neolithic date with houses of mud brick on stone foundations and various storage and thermal installations with a few burials scattered among them. A small Final Neolithic presence is documented by two graves and a group of ash pits of uncertain use. A catalogue of the minor objects includes mostly utilitarian objects of typical forms in stone, bone and terracotta and a few objects of decorative value: ear studs and symbolic significance, terracotta tangas and figurines. Appendixes include lists of walls and pottery lots, the inventory lot numbers of the lithics published elsewhere by J. Kozłowski et al. 1996 and a summary of the fauna by D. S. Reese that clarifies and amplifies the earlier faunal study by N. G. Gejvall. *Lerna I: The Rise of Metallurgy in Eurasia* Miljana

Radivojević, Benjamin Roberts, Miroslav Marić, Julka Kuzmanović-Cvetković, Thilo Rehren, 2021-12-23 The Rise of Metallurgy in Eurasia is a landmark study in the evolution of early metallurgy in the Balkans It demonstrates that far from being a rare and elite practice the earliest metallurgy in the world was a common and communal craft activity **The Competition of**

**Fibres** Wolfram Schier, Susan Pollock, 2020-04-30 The central issues discussed in this new collected work in the highly successful ancient textiles series are the relationships between fiber resources and availability on the one hand and the ways those resources were exploited to produce textiles on the other Technological and economic practices for example the strategies by which raw materials were acquired and prepared in the production of textiles play a major role in the papers collected here Contributions investigate the beginnings of wool use in western Asia and southeastern Europe The importance of wool in considerations of early textiles is due to at least two factors First both wild as well as some domesticated sheep are characterized by a hairy rather than a woolly coat This raises the question of when and where woolly sheep emerged a question that has not up to now been resolvable by genetic or other biological analyses Second wool as a fiber has played a major role both economically and socially in both western Asian and European societies from as early as the 3rd millennium BCE in Mesopotamia and it continues to do so in different ways up to the modern day Despite the importance of wool as a fiber resource contributors demonstrate clearly that its development and use can only be properly addressed in the context of a consideration of other fibers both plant and animal Only within a framework that takes into account historically and regionally variable strategies of procurement processing and the products of different types of fibers is it possible to gain real insights into the changing roles played by fibers and textiles in the lives of people in different places and times in the past With relatively rare albeit sometimes spectacular exceptions archaeological contexts offer only poor conditions of preservation for textiles As a result archaeologists are dependent on indirect or proxy indicators such as textile tools e g loom weights spindle whorls and the analysis of faunal remains to explore a range of such proxies and methods by which they may be analyzed and evaluated in order to contribute to an understanding of fiber and textile production and use in the past

Balkan Prehistory Douglass W. Bailey, 2002-09-11 Douglass Bailey's volume fills the huge gap that existed for a comprehensive synthesis in English of the archaeology of the Balkans between 6 500 and 2 000 BC much research on the prehistory of Eastern Europe was inaccessible to a western audience before now because of linguistic barriers Bailey argues against traditional interpretations of the period which focus on the origins of agriculture and animal breeding He demonstrates that this was a period when monumental social and material changes occurred in the lives of the people in this region with new technologies and ways of displaying identity Balkan Prehistory will be required reading for everyone studying the Neolithic Copper and early Bronze Ages of Eastern Europe *Prehistoric Figurines* Douglass Bailey, 2005-11-03 Here is a radical new approach to one of the most exciting but poorly understood artefacts from our prehistoric past Studying their roles and functions in society from past to present day archaeology students will find this an invaluable asset
