Scientific Thinking in Speech and Language Therapy Carmel Lum, 2005-04-11 Speech and language pathologists like all professionals who claim to be scientific in their practice make a public commitment to operate on the basis of knowledge derived in accordance with sound scientific standards Yet students in communication disorders are given relatively little grounding in the fundamentals of science indeed they often receive implicit encouragement to rely on clinical wisdom This pathbreaking text introduces the principles of critical scientific thinking as they relate to assessing communication problems deciding about alternative approaches to intervention and evaluating outcomes The author provides many illustrative examples to help readers contextualize the ideas Her clear presentation will help not only undergraduate and graduate students but also established professionals reason more effectively about what they are doing and why Though the examples come from speech and language pathology this illuminating and readable book constitutes a valuable resource for all clinical practitioners

Oxford Textbook of Neurorehabilitation Volker Dietz, Nick S. Ward, 2020-05-28 Neurorehabilitation is an expanding field with an increasing clinical impact due to an ageing population During the last 20 years neurorehabilitation has developed from a discipline with little scientific background separated from other medical centers to a medical entity largely based on the principles of evidenced based medicine with strong ties to basic research and clinical neurology Today neurorehabilitation is still a work in progress and treatment standards are not yet established for all aspects of the field There are very few books that address contemporary neurorehabilitation from this perspective This new edition of the Oxford Textbook of Neurorehabilitation provides an understanding of the theoretical underpinnings of the subject as well as a clear perspective on how and why to approach treatment decisions on an individualized basis The book has been thoroughly updated to reflect novel important developments in the field and includes new chapters on vocational rehabilitation self

management strategies in neurorehabilitation and music supported therapy in neurorehabilitation This indispensable book will be of great interest to rehabilitation physicians neurologists and allied health care professionals who look after patients requiring neurorehabilitation *Child and Adolescent Therapy* Jeremy P. Shapiro,Robert D. Friedberg,Karen K.

Bardenstein,2012-06-22 This comprehensive guide to child therapy provides a thorough introduction to the principles and practice of psychotherapy with children and adolescents It provides balanced coverage of child therapy theory research and practice Adopting an integrated approach the authors bring both the science of evidence based practice and the art of therapy into each chapter **Psychiatry** Allan Tasman,Jerald Kay,Jeffrey A. spectrum disorders Roberto Canitano,Yuri Bozzi,2015-04-17 Developing novel and more effective treatments that improve quality of life for individuals with autism spectrum disorders is urgently needed To date a wide range of behavioral interventions have been shown to be safe and effective for improving language and cognition and adaptive behavior in children and adolescents with ASD However many people with ASD can receive additional benefit from targeted pharmacological interventions One of the major drawback in setting up therapeutics intervention is the remarkable individual differences found across individuals with ASD As a matter of fact the medications that are currently available address only symptoms associated with ASD and not the core domains of social and communication dysfunction The pathogenesis paradigm shift of ASD towards synaptic abnormalities moved the research to pathway to disease that involve multiple systems and that are becoming the forefront of ASD treatment and are pointing toward the development of new targeted treatments Some new therapeutics have been tested and others are being studied In this context single gene disorders frequently associated with ASD such as Rett Syndrome Fragile X and Tuberous Sclerosis have been of significant aid as neurobiology of these disorders is more clear and has a potential to shed light on the altered signaling in ASD However much research is needed to further understand the basic mechanisms of disease and the relationship to idiopathic ASD Clinical trials in children are underway with agents directed to core symptoms and to the associated disorders in the search of new therapeutics and progress are expected with possible new option for therapeutics in ASD in the upcoming future Children

and Adolescents with ASD and their families can provide important information about their experience with new treatments and this should be a priority for future research In addition research performed on genetic mouse models of ASD will keep on providing useful information on the molecular pathways disrupted in the disease thus contributing to identify novel drug targets

Embedding Evidence-Based Practice in Speech and Language Therapy Hazel Roddam, Jemma

Skeat, 2010-04-05 Like all health professionals speech and language therapists SLTs need to keep themselves up to date with the research evidence base that is relevant to their field of practice and be able to show how this contributes to their clinical decision making However it is not always clear to practitioners how evidence based practice EBP can be properly embedded in their day to day activities In this valuable book Hazel Roddam and Jemma Skeat present a wealth of instructive examples by SLT contributors from around the world showing how clinicians educators and researchers have risen to the EBP challenge Embedding evidence based practice in speech and language therapy showcases the creative ways that SLTs are developing knowledge and skills for EBP creating contexts that support the use of evidence in practice and working towards making evidence easily accessible and usable It includes real life examples of how SLTs have encountered a clinical problem or situation and have accessed and used the evidence within their day to day practice The contributors come from a wide range of work settings from services situated within large organizations to those in independent practice and represent a range of clinical areas from paediatric to adult and across speech language voice fluency Augmentative and Alternative Communication AAC and dysphagia This book is written for an audience of clinical practitioners at any stage of their career and is additionally a valuable resource for SLT students and lecturers
