Inside Architecture The Graham Foundation Mit Press Series In Contemporary Architectural Discourse:

Inside Architecture Vittorio Gregotti, 1996 Inside Architecture is a concise insightful examination of the role the modernist project has played in late twentieth century building as well as an attempt to reconcile the dilemmas and shortcomings of modern orthodoxy with a renewed vision of modernism Gregotti first identifies the elements of mass culture and public institutions that have led to the deterioration of natural and man made environments He then investigates eight issues precision technique monumentality modification atopia simplicity procedure and image that influence the activities of contemporary architects Gregotti is particularly suspicious of the deconstructivist argument and its heavy reliance on literary models And he provides an incisive critique of the recent interest in modernist aesthetics warning against reviving the forms of an old movement without considering the cultural and social criteria that once gave it purpose and meaning The Cultivated Wilderness Paul Shephard, 1997-01-22 Paul Shephard's previous book What is Architecture was about making real material things in the world landscapes buildings and machines The Cultivated Wilderness is about those landscapes and about the strategies that govern what we've done in shaping them In the author's words this book is about seeing things that are too big to see His emphasis on strategy makes landscape fundamental he says that every architectural move is set in a landscape Norman England for example was constructed as a network of strong points in a strategy of occupation The eighteenth century grid cities of the New World reflect a strategy of reason Our current strategy is the economic exploitation of the Earth an intricately woven blanket of commerce that covers up a multitude of other possibilities many other ways to treat the surface of the globe some of which are the landscapes revealed in this book In a series of first person narratives reminiscent of his last book the author pairs six landscapes in order of descending scale from global to local from the seven wonders of the ancient world to the condensed destruction of World War I's Western Front In an engaging style Shephard takes the reader on an odyssey through these landscapes meeting people and seeing places He states that now at the end of a century in which the appropriate landscape was sought but never found the strategy of turning the land to profit is under review and offers this book as his contribution to that review Important Notice The digital edition of this book is missing some of the images found in the physical edition **Thirteen Ways** Robert Harbison, 1997 Robert Harbison offers a novel interpretation of what architectural theory might look like The title is based on Wallace Stevens Thirteen Ways of Looking at a Blackbird and like the poem Harbison's work is a composite structure built of oblique meanings and shifts that give a portrait of architecture in which symbol and metaphor coexist 10 illustrations **Graham Foundation/MIT Press series in contemporary architectural discourse** Graham Foundation for Advanced Studies in the Fine Arts (Chicago, IL), 19?? **Design Issues**, 1999 *The Publishers Weekly*, 1996 The Architects' Journal, 1996-07 Assemblage, 1998 **Inland Architect**, 1999 *Landscape Architecture*, 1997 Documents, 1998 **Bibliographie D'histoire de L'art**, 1991 **Subject Guide to Books in Print**, 1997 Annual Bibliography of Modern Art Museum of Modern Art (New

York, N.Y.). Library,1996 *Whitaker's Books in Print* ,1998 *Lingua Franca* ,1995 *American Book Publishing Record* ,1985 Forthcoming Books Rose Arny,1998 *Drawing Futures* Bob Sheil,Frédéric Migayrou,Luke Pearson,Laura Allen,2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture Despite numerous developments in technological manufacture and computational design that provide new grounds for designers the act of drawing still plays a central role as a vehicle for speculation There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation Drawing Futures will present a compendium of projects writings and interviews that critically reassess the act of drawing and where its future may lie Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments The book coincides with an international conference of the same name taking place at The Bartlett School of Architecture UCL in November 2016 Bringing together practitioners from many creative fields the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas **Retrospective** Ipek Türeli,2002
