Abdel-Kader, 2011-10-26 A comprehensive review of contemporary research in management accounting Provides a thorough critical analysis of recent issues published in the management accounting literature and identifies gaps for future research in each issue reviewed *Environmental Management Accounting for Cleaner Production* Stefan Schaltegger, Martin Bennett, Roger L. Burritt, Christine M. Jasch, 2008-10-10 Sustainability requires companies to develop in an economically environmentally and socially sustainable manner Corporate sustainable development in turn requires movement towards cleaner production In order to recognize the potential from cleaner production reduced costs and fewer environmental impacts through the reduced use of materials environmental management accounting EMA is a necessary information management tool Environmental Management Accounting for Cleaner Production reveals a set of tools for companies to collect evaluate and interpret the information they need to estimate their potential to use cleaner production to realize cost savings and to make the best decisions about the available cleaner production options EMA is therefore the key for driving environmental progress cost savings increased competitiveness and corporate sustainability through the means of cleaner production *Environmental and Material Flow Cost Accounting* Christine M. Jasch, 2008-11-07 Recognizing the increasing importance of environmental issues energy prices material availability and efficiency and the difficulty of adequately managing these issues in traditional accounting systems several companies all over the world have started implementing Environmental and Material Flow Cost Accounting EMA and MFCA Environmental and Material Flow Costs Accounting explains and updates the approach developed for the United Nations Department of Economic and Social Affairs DSD UNDESA and the International Federation of Accountants IFAC and in addition includes experiences of several case studies and recent developments regarding EMA and MFCA in national statistics and ISO standardization Environmental Management Accounting Christian Herzig, Tobias Viere, Stefan Schaltegger, Roger L. Burritt, 2012-03-15 Sustainable

development will not happen without substantial contributions from and leading roles of companies and business organizations. This requires the provision of adequate information on corporate social and ecological impacts and performance. For the last decade progress has been made in developing and adapting accounting mechanisms to these needs but significant work is still needed to tackle the problems associated with conventional accounting. Until recently research on environmental management accounting (EMA) has concentrated on developed countries and on cost benefit analysis of implementing individual EMA tools. Using a comparative case study design this book seeks to redress the balance and improve the understanding of EMA in management decision making in emerging countries focussing specifically on South East Asian companies. Drawing on 12 case studies taken from a variety of industries *Environmental Management Accounting Case Studies of South East Asian Companies* explores the relationship between decision situations and the motivation for and barriers to the application of clusters of EMA tools as well as the implementation process itself. This book will be useful to scholars interested in the environmental and sustainability management accounting research field and those considering specific approaches to EMA within emerging economies. Proceedings of the 5th International Conference on Research in Management and Technovation Nga Thi Hong Nguyen, José António C. Santos, Vijender Kumar Solanki, Anh Ngoc Mai, 2025-01-31. This book bringing together selected papers from the 5th International Conference on Research in Management and Technovation explores the global impact of technology corporate management and innovation. In a time of fast growth and widespread tech use the relationship between business and technology has transformed at a rapid pace. From computers and automation to dealing with the effects of COVID 19 it highlights the need for forward thinking leaders. Both new and established companies now prioritize blending business and technology in their plans stressing the importance of creative strategies. The conference promotes an interdisciplinary approach looking at how these areas connect instead of keeping them separate. Beyond common tech practices like virtual meetings the book shows how business and technology affect decision making in uncertain situations. The research shared in this book focuses on making practical plans for progress using innovations and technology seeing them as crucial tools for society and organizations. Technology is portrayed as a helpful tool allowing managers strategists and researchers to make smart decisions that demonstrate the strength of business and technology in a constantly changing global landscape. *Environmental Management Accounting and Supply Chain Management* Roger L. Burritt, Stefan Schaltegger, Martin Bennett, Tuula Pohjola, Maria Csutora, 2011-05-19. This volume's focus on the environmental accounting of supply chain processes is of particular relevance because these processes supply data about the environmental impact of relationships between business organisations an area where the boundary separating internal and external accounting is ill defined. Here contributors advocate what they term accounting for cooperation as a more environmentally positive complement to the paradigmatic practice of accounting for competition. **Journal of Environmental Accounting and Management** Zhifeng Yang, Sergio Ulgiati, 2018-07-01. his peer reviewed journal
