Intelligent Search on XML Data Henk Blanken, Torsten Grabs, Hans-Jörg Schek, 2014-09-12 Intelligent Search on XML Data Henk M. Blanken, 2003-09-03 Recently we have seen a steep increase in the popularity and adoption of XML in areas such as traditional databases e business the scientific environment and on the web Querying XML documents and data efficiently is a challenging issue this book approaches search on XML data by combining content based methods from information retrieval and structure based XML query methods and presents the following parts applications query languages retrieval models implementing intelligent XML systems and evaluation To appreciate the book basic knowledge of traditional database technology information retrieval and XML is needed The book is ideally suited for courses or seminars at the graduate level as well as for education of research and development professionals working on Web applications digital libraries database systems and information retrieval **Legal Knowledge and Information Systems** Thomas F.

Gordon, 2004 This volume contains the proceedings of the seventeenth Jurix conference on Legal Knowledge and Information Systems Jurix 2004 which was held at the Harnack Haus of the Max Planck Society in Berlin Germany Although the Jurix conference moved from The Netherlands to Germany almost half of the papers are from The Netherlands Except for a paper from Canada the others are from 5 other countries in Western Europe The effort to extend Jurix beyond The Netherlands and establish it as the leading European conference on legal knowledge systems is making progress The papers in this publication focus on the topics of legal knowledge management and information retrieval legal knowledge acquisition using natural language processing legal ontologies case based reasoning reasoning about evidence and legal reasoning support

Information Extraction: Algorithms and Prospects in a Retrieval Context Marie-Francine Moens, 2006-10-10 Currently there is a considerable interest in integrating the results of information extraction in retrieval systems because of the growing demand for search engines that return precise answers to flexible information queries Advanced retrieval models satisfy that need and they rely on tools that automatically build a probabilistic model of the content of a multi media document The book focuses on content recognition in text It elaborates on the past and current most successful algorithms and their application in a variety of domains e g news filtering mining of biomedical text intelligence gathering competitive intelligence legal information searching and processing of informal text An important part discusses current statistical and machine learning algorithms for information detection and classification and integrates their results in probabilistic retrieval models The book also reveals a number of ideas towards an advanced understanding and synthesis of textual content

Current Trends in Database Technology - EDBT 2004 Workshops Wolfgang Lindner, Marco Mesiti, Can Türker, Yannis Tzitzikas, Athena Vakali, 2004-11-18 This volume comprises papers from the following five workshops

that were part of the complete program for the International Conference on Extending Database Technology EDBT held in Heraklion Greece March 2004 ICDE EDBT Joint Ph D Workshop PhD Database Technologies for Handling XML information on the Web DataX Pervasive Information Management PIM Peer to Peer Computing and Databases P2P DB Clustering Information Over the Web ClustWeb Together the ve workshops featured 61 high quality papers selected from approximately 180 submissions It was therefore difficult to decide on the papers that were to be accepted for presentation We believe that the accepted papers substantially contribute to their particular fields of research The workshops were an excellent basis for intense and highly fruitful discussions The quality and quantity of papers show that the areas of interest for the workshops are highly active A large number of excellent researchers are working on the aforementioned fields producing research output that is not only of interest for other researchers but also for industry The organizers and participants of the workshops were highly satisfied with the output The high quality of the presenters and workshop participants contributed to the success of each workshop The amazing environment of Heraklion and the location of the EDBT conference also contributed to the overall success Last but not least our sincere thanks to the conference organizers the organizing team was always willing to help and if there were things that did not work assistance was quickly available

Knowledge Architectures Denise Bedford, 2020-12-31 Knowledge Architectures reviews traditional approaches to managing information and explains why they need to adapt to support 21st century information management and discovery Exploring the rapidly changing environment in which information is being managed and accessed the book considers how to use knowledge architectures the basic structures and designs that underlie all of the parts of an effective information system to best advantage Drawing on 40 years of work with a variety of organizations Bedford explains that failure to understand the structure behind any given system can be the difference between an effective solution and a significant and costly failure Demonstrating that the information user environment has shifted significantly in the past 20 years the book explains that end users now expect designs and behaviors that are much closer to the way they think work and act Acknowledging how important it is that those responsible for developing an information or knowledge management system understand knowledge structures the book goes beyond a traditional library science perspective and uses case studies to help translate the abstract and theoretical to the practical and concrete Explaining the structures in a simple and intuitive way and providing examples that clearly illustrate the challenges faced by a range of different organizations Knowledge Architectures is essential reading for those studying and working in library and information science data science systems development database design and search system architecture and engineering

XML Retrieval Mounia Lalmas, 2022-05-31 Documents usually have a content and a structure The content refers to the text of the document whereas the structure refers to how a document is logically organized An increasingly common way to encode the structure is through the use of a mark up language Nowadays the most widely used mark up language for representing structure is the eXtensible Mark up Language

XML XML can be used to provide a focused access to documents i.e returning XML elements such as sections and paragraphs instead of whole documents in response to a query Such focused strategies are of particular benefit for information repositories containing long documents or documents covering a wide variety of topics where users are directed to the most relevant content within a document The increased adoption of XML to represent a document structure requires the development of tools to effectively access documents marked up in XML This book provides a detailed description of query languages indexing strategies ranking algorithms presentation scenarios developed to access XML documents Major advances in XML retrieval were seen from 2002 as a result of INEX the Initiative for Evaluation of XML Retrieval INEX also described in this book provided test sets for evaluating XML retrieval effectiveness Many of the developments and results described in this book were investigated within INEX
